Failing NEDCO may cost producers \$10 million

BY JAMES H. EVERHART

SYRACUSE, NY — The financially troubled Northeast Dairy Cooperative Federation is on the brink of complete bankruptcy, a failure that could cost hundreds of Pennsylvania and New York dairymen placed at up to \$10 million.

The federation just last week

allowed Dairylea Cooperative to begin servicing its marketing members, beginning with June 15th deliveries. For those producers, the payments from Dairylea will be the first in 45 days.

NEDCO spokesman Bill Douglass said they made the arrangement with Dairylea after determining that they could no

longer guarantee that money would be available to pay producers for any June deliveries. Dairymen in NEDCO's marketing program also have not been paid for May milk deliveries.

He was not able to say how many producers or cooperatives remained in the federation as marketing members. Others still

belong to NEDCO as "affiliates," who handle their own milk marketing.

Douglass said NEDCO was not planning to file for bankruptcy, although he admitted that substantial questions remained about the economic viability of the organization.

One possible scenario was that NEDCO would return to the basic "service" orientation it once had, handling basic service functions in check-writing, testing and quality control for producers or cooperatives. It would not, however, be involved in direct marketing of milk, he said.

A variety of industry sources discounted that possibility, noting that the failed federation would have little credibility as a check-writing entity, and adding that most of the functions are not needed in the Pennsylvania and New York areas NEDCO now covers.

Added one knowledgeable observer, who asked not to be identified, "if you can't pay your

producers, you're done. Forget all this other —."

Douglass said he did not know for sure how many marketing members remained in the NEDCO organization, since numbers were changing almost daily. He admitted that they were declining, down considerably from the 3,200 listed late last year.

NEDCO's problems first became critical in February, when the federation surpassed its line of credit and many producers' milk checks were returned. At the same time, the organization levied a \$1.50 per hundredweight assessment on members' milk checks.

Dairylea spokesman Bruce Snow said his organization's efforts to help NEDCO producers did not involve pledging Dairylea funds in the relief effort.

His organization simply was guaranteeing the payment for the milk delivered, the proceeds coming from the sale of that producer's milk.

\$13,000 Bid Tops Ogston Sale

BY ROBIN PHILLIPS

Staff Correspondent

COLUMBUS, N.J. — A chapter of Jersey breed history was written here on Thursday as 182 animals were dispersed from the Ogston herd of John Bishop VI.

The Ogston Golden Opportunity Sale featured the cows and bloodlines that have made headlines in the Jersey breed for more than 15 years. And following on the heels of the AJCC and NAJ annual meetings, held in Lancaster this week, the sale drew bidders from every corner of the United States.

The sale average reached a high of \$1892 on the 182 Ogston animals to parade through the sale ring.

Crowning the sale bids was a \$13,000 nod from Bob Gluck and Tom Cope of Danville, Vt. for Ogston TBS Bessie. She sold with a contract from Select Sires to purchase a bull calf from her by Magic of Ogston.

For her top record, the VG-85 Top Brass daughter produced 17,190 pounds of 4.4 percent milk, 758 pounds fat and 596 pounds protein at three years and five months. She is out of the Ogston Beacon Bessie cow.

Ogston Ultimate Nun, a heifer carrying a full sister or brother to Ogston TBS Bessie, sold for \$5200 to Texan Wilbert Layne.

Vermont breeders Gluck and Cope also picked up the fancy Ogston Magics Adora for a bid of \$7600, third highest of the sale. A Magic of Ogston out of Ogston Appollo Adora, Magics Adora was milking 58 pounds of 4.1 percent milk in April and is bred to Top Brass.

Gluck and Cope selected Magics Adora over Ogstons Samson Slipperette-ET in buyer's choice bidding.

The second highest price in the Ogston Golden Opportunity Sale was placed on Ogston S.B. Sound. Another Vermont operation, Comfort Hill Jersey Farm, purchased the two-year-old for \$11,000.

(Turn to Page A25)

For complete coverage of the National Jersey Convention, turn to page A24. Jersey Junior activities can be found on A26, and the National Heifer Sale results are on page A36.

Bidding was intensive in Thursday's Ogston Golden Opportunity Sale in Columbus, NJ

Ogston TBS Bessie, the top selling animal, brought \$13,000 at the Ogston Golden Opportunity Sale.

100th anniversary Holstein Convention to open Sunday

BY JOYCE BUPP
Staff Correspondent

HARTFORD, Conn. — The National Holstein Association comes "home" to New England this week, to celebrate its hundred-year-birthday here where the breed industry first put down roots.

A full scope of gala events is planned for this Centennial celebration of registered Holsteins in the United States, running June 23 through 26. Activities range from today's New England Convention Classic show in Massachusetts through a 100th-birthday-party banquet climax Wednesday evening at the Hartford Civic Center.

Pennsylvania's delegation, traditionally a large one, is expected to turn out in full force for this anniversary event. The state's

Holstein Association

official voting delegation of 33, second in number only to Wisconsin, will join in Tuesday's general session crammed with special industry speakers and Wednesday's annual business session.

Monday's popular Host Day features a selection of tours, with visits to the National Association headquarters in Brattleboro, Vermont, the city of Boston, and the recreated colonial Mystic Seaport. A Monday evening clambake and the 100 Years of

June is Dairy Month at Lancaster Farming

Week 4. Products

LANCASTER — Dairy month coverage in Lancaster Farming this week focuses on products and processing — the growing concern about what happens to raw milk products after they leave the farm.

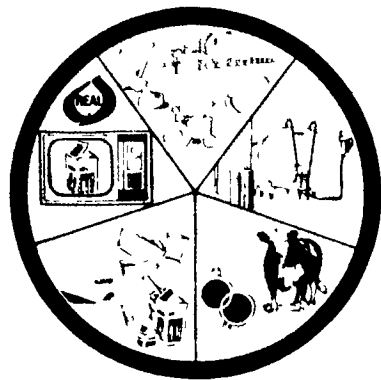

Writers and correspondents visited a variety of processing facilities throughout the region, to cover the situation at small, entrepreneurial facilities as well as at state-of-the-art processing complexes.

Stories focus on the giant Weis Market fluid milk facility in Sunbury, the strict quality story of Dairy Maid Dairy in Frederick, MD, and the Jefferson Cheese plant operation, which produces 20,000 pounds of mozzarella cheese daily in Hagerstown, MD.

In a broader look at the products scene, editor Jim Everhart discusses the new products which have appeared on the scene over the past few months, and talks about the attention the huge food conglomerates are beginning to focus on dairy products.

There's also extensive coverage of this week's National Jersey Cattle Club Convention in Lancaster, including the page one story about the Ogston Golden Opportunity Sale Thursday in Columbus, NJ.

Finally, Lancaster Farming includes coverage of the many Dairy Princess pageants being held this month throughout the state. This week's edition includes results from Lancaster, Armstrong, Lebanon, Adams, Franklin, Huntingdon, Jefferson, Cumberland, and Mercer counties, and the combined Washington-Greene County pageant.

Lancaster County dairy princess Janae Martin.

Philadelphia Eggs

Thursday, June 20

Report supplied by USDA

Market Comment: Prices unchanged. Cartoned egg demand continued irregular as some traders noted movement as fairly good and other slow to light and unaggressive. Supplies were building at varying rates, and except for seasonally tight stocks of jumbos, all sizes were at least adequate. Undertone was only steady at best.

Prices to retailers: sales to volume buyers, consumer grades white eggs in cartons delivered store door:

A Extra Large .65-.70; A Large .64-.69; A Medium .54-.57.

New York Multiple Drop Broiler Report

Thursday, June 20

Report supplied by USDA

Current broiler-fryer negotiated prices for immediate delivery includes mostly multiple drop shipments to New York City from Delmarva.

Range: U.S. Grade A .52-.60.

Weighted AVG.: U.S. Grade A .57.19.

Premium (X) Boxes 10,744.

(X) Includes special services, selected competitive brands, etc.

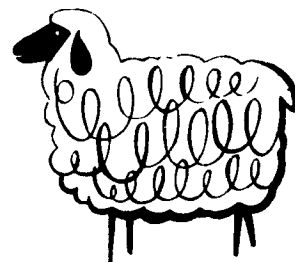

Eastern Pa. & N.J. Poultry

Wednesday, June 19

Report supplied by USDA

Market Comment: Prices edging higher in limited trading. Off farm movement restricted, causing plants to work minimal schedules during the last several weeks. Increased offerings noted for next week as some sellers decided to move product a bit earlier than previously planned due to current pricing.

Prices Paid at Farm:
Light Type Hens: .13¼-.16½.
F.O.B. Plant: .15-17½, mostly .17-17½.

Delmarva Poultry

Thursday, June 20

Report supplied by USDA

Market Comment: Demand for ready to cook whole birds varied from plant to plant but most sellers noted clearances as satisfactory. Interest in parts was selective and again best on breast and wings.

Live supplies were fully adequate. Weights continued in a full range.

Slaughter schedules were moderately heavy. Undertone was steady.

Today's L.T.L. asking prices were unchanged on U.S. Grade A at 53-60 cents.

Estimated slaughter of broiler fryers in Delmarva (000).

Estimated 6/20 1,987,000; Actual 6/13 1,731,000; Actual 6/18 1,939,000; Average Weights 6/18 4.37; Average Weights 6/11 4.39.

Body Condition - Barn Meetings.....

Almost everyone is familiar with the "fat cow syndrome" and all the problems that can accompany it: - calving problems, milk fever, retained placentas, metritis, ketosis, displaced abomasum, and downer cow syndrome.

Most of these problems can be avoided if cows are fed balanced late-lactation and dry-cow rations and calve at an optimum body condition.

Recent research at Cornell University done by Dr. Brian Perkins, Dr. Dave Smith, and Dr. Charlie Sniffen indicates that body condition (degree of fattening) can influence a dairy cow's production, reproduction, and health.

The purpose of these barn meetings is to show dairymen how to monitor the body condition of their cows and to provide recommendations for optimum body condition scores at various stages of lactation.

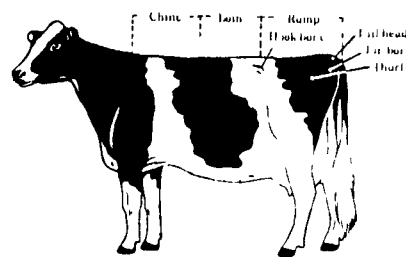

Figure 1. The areas of particular interest when body condition scoring a cow include the loin, backbone, hooks, pins, and the area between the hooks and pins.

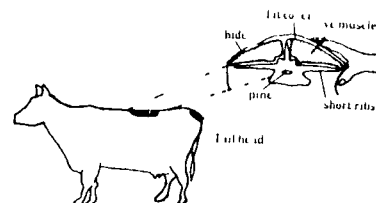

Figure 2. The amount of flesh covering the bony structures such as the loin region is estimated by palpation.

FEATURED SPEAKER

Dr. Brian Perkins, Ph.D. is Manager of Dairy and Livestock Nutrition for Pennfield Corporation. He is a graduate of Cornell University where he specialized in Reproductive Physiology and Ruminant Nutrition.

AGENDA

- Body Condition - Milk Production & Reproduction
- Scoring Cows
- How To Score Your Herd
- How To Determine Body Condition
- Questions And Answers

THE OLD FARMER'S ALMANAC

JUNE 24-30, 1985

Warm rain makes weeds a pain.

Pick peas from the garden now. Average length of days for the week 15 hours, 16 minutes. First quarter of the moon June 25 (Tues). Battle of the Little Bighorn fought June 25, 1876. Larry Corcoran pitched his third career no hitter, June 27, 1884. John Winthrop governor of the Massachusetts Bay Colony, introduced first table fork in America June 25, 1630. John Tyler married Julia Gardiner and became first incumbent president to wed June 26, 1844. A warm heart requires a cool head.

Ask the Old Farmer: I have always taken it for granted that the authorized American spread eagle could be used facing either to the right or left. Recently I have heard that eagles always face left. Is this right? J.F. Atlanta
Our understanding is that the eagle always faces toward the olive branch — on the Great Seal of the United States — which is the military right.
Home Hints: Clean ivory handled knives with a lemon dipped in salt.

OLD FARMER'S WEATHER FORECAST

New England: Rain, warm temperatures at week's beginning, mid through end of week seasonable.
Greater New York-New Jersey: Through midweek rainy and warm, end of week partly cloudy, mild.
Middle Atlantic Coastal: Showers at week's beginning, midweek rain, very warm end of week partly cloudy and cool.
Piedmont & Southeast Coastal: Sunny with possible showers through midweek end of week warm.

Play to win with our complete Checker Mates Hog Breeding Program. It's the result of many years of genetic research.

It can pay off in bigger, healthier litters in the farrowing house thanks to the maternal heterosis of Checker Gilts. Plus, the money saving performance punch contributed by Checker Boars when your pigs reach the finishing house.

But it's more than boars and gilts. It's a complete breeding program aimed at making you a winner. Stop in and ask us about it today.

Lancaster County Extension director Jay Irwin discusses this year's corn crop with Extension program leader Marion Deppen. Irwin received the USDA's Distinguished Service Award from Secretary John Block on Wednesday.

Irwin receives Extension Service's highest honor

BY JACK HUBLEY

LANCASTER — For his work in coordinating the battle against avian influenza, Lancaster County Extension director Jay Irwin received the U.S. Department of Agriculture's Distinguished Service Award at ceremonies held in Washington, D.C. on Wednesday. He is one of only three Extension employees in the country to receive the honor this year, and the first Pennsylvania recipient since 1965.

Irwin played a central role in the fight against the deadly H5N2 virus that was responsible for the death or depopulation of 16 million birds in 250 Lancaster County flocks.

The Extension director notes that many people were responsible for the success of the eradication effort, which began with the initial diagnosis of the disease in Lancaster County by Dr. Robert Eckrode and his staff at the University of Pennsylvania's New Bolton Center in April, 1983.

He also praised former Penn State Extension poultry specialist Dwight Schwartz for his input. "Dwight played a key role because he came in here and put on training sessions for the USDA veterinarians," Irwin pointed out.

Irwin noted that the county's previous experience with Laryngotracheitis (LT) gave producers and the Extension office valuable experience in fighting contagious poultry diseases. "We already had developed LT guidelines during the late 1970's when we had 500,000 birds under quarantine," Irwin said. "So that gave us a jump on this (avian flu)."

Marion Deppen, the Extension Service's Southeast program leader, noted what he termed three dimensions to Irwin's work. "He oriented the Task Force on how to

act, both professionally and personally, in order to gain the respect of the community," Deppen said. "That respect was necessary if their authority was to be real."

And Task Force leader Dr. Gerald Fichtner concurs. "When we rolled into town (Lancaster served as Task Force headquarters) in November, the first person we met was Irwin, and he, more than anyone else, helped us understand how to be good citizens in the Lancaster community."

Deppen also praised Irwin's ability to deal with the stress experienced in the agricultural community during the crisis. Irwin met frequently with producers to explain the importance of the eradication program, and counseled 50 rural ministers on the situation in order that they might deal more effectively with congregation members experiencing severe losses in the epidemic.

Finally, Deppen pointed out that Irwin was instrumental in developing adequate biosecurity measures for the affected region.

"One of the most difficult parts of dealing with the virus was trying to find out how it was being spread," Irwin said, adding that the last recorded outbreak of the H5N2 virus occurred in 1929, and very little was known about the disease. "It's a real tribute to farmers that they contained it as well as they did."

Although USDA had predicted a three-year recovery period, Irwin pointed out that nearly all the major producers that suffered losses are currently back in business. "That shows the faith the

producers had in their industry," he concluded.

A graduate of Penn State University, Irwin joined the Lancaster Extension in 1967, and has served as director since 1981.

THE BIBLE SPEAKS
BY LAWRENCE W. ALTHOUSE
WHEN GOD COMPLAINS
June 23, 1985

Background Scripture:

Micah 3:6.

Devotional Reading:

Micah 2:5-13.

Imagine, if you will, this scene:

JUDAH: "Well, Israel, why are you looking so upset?"

ISRAEL: "Oh, I just received this nasty letter from the Lord."

JUDAH: "A nasty letter?"

ISRAEL: "Yeah, it's a letter of complaint."

JUDAH: "What's the complaint?"

ISRAEL: "Oh, God's mad because I have such a bad memory."

JUDAH: "What did you forget?"

ISRAEL: "Really just two things: what he's done for me in the past and what he wants to do right now, that's all!"

FOR YOU TO KNOW

Israel couldn't understand why God was making such a complaint. So, they didn't always remember what God wanted them to remember! Nevertheless, were they not the chosen few, the only people in the world who acknowledged God as the Lord?

As far as their reasoning went, they were right. They alone were the people of God. But it was precisely because of this that God was making his serious complaint against them. Because they were "special" to him he expected

more, not less, from them. And his complaint was that he was getting substantially less, not more:

They covet fields and seize them; and houses, and take them away; they oppress a man and his house, a man and his inheritance. (2:2).

As God's chosen people, as the leaders of the people, more, not less, was expected of Israel: "Hear, you heads of Jacob and rulers of the house of Israel, is it not for you to know justice?" (3:1). In other words, God does not judge us by the same standards with which he judges those who do not acknowledge him as Lord. In fact, he judges us more stringently because he expects more of us.

WHAT IS GOOD?

And what is this "more" that he expects? "With what shall I come before the Lord, and bow myself before God on high? Shall I come to him with burnt offerings, with calves a year old?" (6:6). Will my church pledge satisfy him? My hours of service on the committees of my parish? My attendance at prayer breakfasts? The snappy (perhaps smug) motto on the license plate of my car? Will any of these turn away God's complaint? After all, what does God want?

Good question! And now the answer from Micah:

He has showed you, O man, what is good; and what does the Lord require of you but to do justice, and to love kindness, and to walk humbly with your God. (6:8).

The problem is not that we don't know what he wants from us, but that we do know and conveniently forget, offering him something else. So long as we continue to forget this, God will continue to make his complaint.

NOW IS THE TIME

To Control Flies

The good growing conditions we've experienced this spring for field crops also favor the build-up of fly populations. The needed moisture presents ideal conditions for maggots to develop into flies.

We suggest that livestock and poultry operators use residual insecticides on their buildings and pit walls to cut down on fly problems. Also, you may want to use different materials at different intervals to break the cycle. Flies are immune to most of the old-line materials. Fly baits along with the spray is also recommended. For laying hens, the recently approved Larvadex, as a feed through, is giving good results. Follow label instructions for rate of application.

One of the most important practices in keeping down the number of flies is to clean up the place and eliminate fly breeding areas. Manure packs and other debris are good fly breeding places.

Good sanitation along with insecticides goes a long way in keeping flies under control.

To Feed Dry Matter on Pasture

Pastures are very lush due to the good moisture content. This means that livestock can utilize some dry matter while on pasture. This can include hay, straw or silage. With the dry matter present, they will consume a moderate amount along with the fresh grass.

The dry matter slows down the passage of the lush forage through the digestive system. Also, it reduces the danger of bloating when there is clover or alfalfa in a forage mixture. If the animals are out all of the time, then a portable hay rack would be the best way to feed hay or straw. Dry matter intake is important when pastures are lush and high in water content.

To Check Lighting For Layers

One of the cardinal rules for poultry management is to never decrease the light period of flocks in production. Most flock managers would never intentionally decrease the day length to a flock in production but we are in the season of the year when this can happen accidentally.

Most layers are in light-

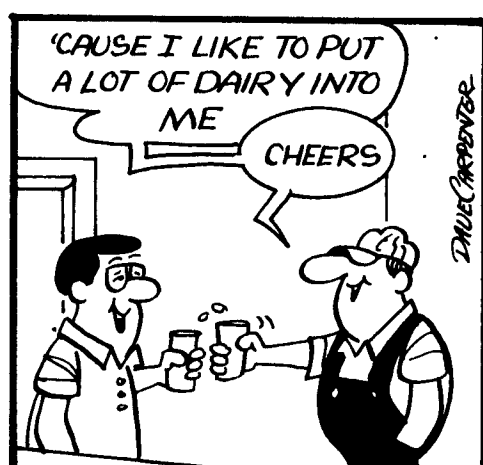

controlled not light-tight housing. The major sources of light leakage are the exhaust fans and air intake. Pullet flocks placed in the laying house during late fall, winter or spring can be given a 14-hour day. As summer approaches and natural day length exceeds 14 hours, layers in non-light tight housing will be exposed to an increasing day length due to the light entering the building through fans and air intakes.

This increase in day length causes no problem. The longest day occurs on June 21 and decreases until December 21. It is this decrease in day length that can cause layers to go out of production unless the time clocks controlling the lights are readjusted to provide the layers with the day length they received on June 21.

To Renovate Strawberries

Since the harvest of the strawberry crop is nearly over, it is a good time to plan for next year. In most cases, plants that have yielded two or more crops cannot be expected to do as well in the future. However, if the current planting is to be used for another year we suggest that the rows be worked by the use of mechanical cultivation and followed by top-dressing with fertilizer. These practices will keep berry plants in a row and encourage additional runners to increase next year's yield.

In the case of a new planting of strawberries, we urge you to fertilize them in June and again in early August. This extra plant food will enable the setting of runners and will help increase yield next year.

Anthracnose and early blight. Bravo 500 beats them both.

...on the market can match Bravo 500 fungicide for effectiveness.

And you get that same kind of first-rate performance against anthracnose too.

Which makes Bravo 500 the one fungicide you can count on to beat your two toughest diseases.

In fact, Bravo 500 consistently provides unsurpassed protection against 9 major tomato diseases.

What's more, you can apply Bravo right up to harvest no matter whether your crop is mechanically harvested or handpicked.

So this season, make it Bravo 500. It's all the fungicide you'll need to beat your two toughest tomato diseases. And the best part is you'll have healthier vines, a healthier crop and a bigger top quality yield to show for it.

Bravo 500 from SDS Biotech. Because you give it all you've got.

Always follow label directions carefully when using agricultural chemicals.

Spray

additives fact sheet

NEWARK, De. — With today's sophisticated, multi-use pesticides, spray additives have come into widespread use. They enhance the activity of many agricultural chemicals, making them more efficient.

Choosing which additive to use, and when, can be confusing, given all the surfactants, compatibility agents, stickers, penetrants and anti-drift agents on the market today.

To help farmers decide, University of Delaware extension weed specialist Frank Webb has prepared a four-page fact sheet which describes the functions of different additives. It goes into considerable detail on the most commonly used types—wetting agents (nonionic, anionic and cationic), compatibility agents, penetrating adjuvants (water- and oil-based), spreader-stickers, buffering agents, anti-drift agents and spreader-binders.

Webb discusses the purpose of each material, tells how it works and when it should be used to improve pesticide performance. He also tells when NOT to use certain materials because of potential management or production problems.

For a copy of this practical guide, Delaware farmers are encouraged to contact the county extension office.

THE RESISTANCE IS SPREADING!

Fight the Colorado Potato Beetle resistance with rotenone-based Penick Noxfire and PBO or new pre-mixed PB-NOX.

The most destructive pest your potato crop will ever have to face is back in your own backyard.

The Colorado Potato Beetle's built-up resistance to pyrethroid-based insecticides is costing potato farmers in your area and throughout the country millions of dollars in lost yields each year.

But there is a way to stop them dead.

It's Penick's new rotenone-based PB-NOX, the convenient, ready-mixed combination of two federally registered Penick products that proved to be so effective against pyrethroid-resistant Colorado Potato Beetles last year.

Now you can reduce losses due to spillage or mixing errors and get maximum acreage protection with super effective Noxfire® insecticide with 5%

rotenone pre-mixed with Penick's piperonyl butoxide 92% emulsified concentrate.

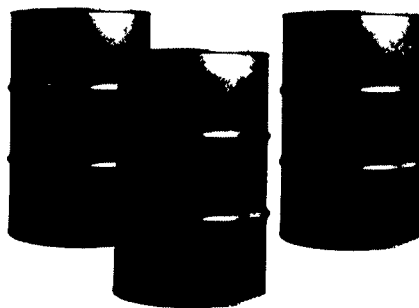

Or, purchase the same ingredients separately in 1, 5, 30 or 55 gallon containers and mix your own.

Either way you'll stop the Colorado Potato Beetle's spreading resistance in your acreage and erosion of your profits.

Hit 'em with the most economical and effective protection you can get against resistant Colorado Potato Beetles.

Hit 'em with new PB-NOX or Noxfire and PBO and knock 'em dead.

For more information or to order call your nearest Penick distributor or contact Penick Corporation Pesticides Division, 1050 Wall Street West, Lyndhurst, NJ 07071, or call (201) 935-6600.

'Moving-market' price policy attacked by NFU

DENVER — Adamant opposition to the use of the so-called "moving average" of commodity prices for either the past three or five years to determine future farm support levels was unanimously expressed by members of the National Farmers Union Executive Committee. At a meeting here this week, attended by nearly all of the Farmers Union state presidents and its legislative staff, the committee and this method currently under review in Congress is self-defeating because it would lead to a lower commodity price each year.

As it writes the 1985 Farm Bill, Congress is considering setting farm commodity support prices at an average of market prices for either the past three or five years. Low commodity prices during the past several years are largely responsible for the current rural economic depression, the NFU leaders pointed out. To set support prices at an average of already unacceptable commodity prices is not tolerable, they said.

In addition, the NFU leaders said they support the concept of a

proposal to create the Agricultural Conservation Corporation as part of the Farm Credit System to purchase farmland and prevent land prices from bottoming out.

"There is a strong feeling among the Farmers Union leadership that we're willing to help the Farm Credit System obtain that goal if they are also willing to help us get some kind of farm bill that will correct the already low commodity prices and defeat this market-averaging concept," said NFU Executive Committee Chairman Harold Dodd, president of the Illinois Farmers Union.

"We believe the Farm Credit System is an essential part of our rural community. However, the Farm Credit System should actively and aggressively support a farm program that enables producers to service their debts from profitable operations. Basic

borrower income and reasonable repayment rescheduling can protect the solvency of the leading institutions themselves," he said.

The new farm program must return profitability to agriculture

in order to enable producers to maintain their operations and service their debts, thereby providing economic recovery for businesses in the nation's depressed rural communities, the executive committee said.

The committee went on record in support of commodity loans related to parity prices, with appropriate limitations for large producers and direct benefits to small and medium sized operators

US restricts bee trade

WASHINGTON — The U.S. Department of Agriculture is imposing restrictions on imports of bees, used beekeeping equipment, honey, beeswax and pollen for bee feed to prevent entry of exotic bee pests and diseases into the United States.

"The restrictions will apply to all countries except Canada," said Bert W. Hawkins, administrator of USDA's Animal and Plant Health Inspection Service.

Hawkins said Canada is exempt because it is free of exotic bee

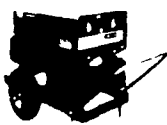

pests and diseases and has effective import regulations of its own.

The articles may be imported only if requirements involving permits, inspections, treatments, marking and shipping, and other restrictions are satisfied.

Anyone desiring more information or wishing to obtain a permit to import these articles should write to: Biological Assessment Support Staff, Plant Protection and Quarantine, APHIS, USDA, Federal Building,

Hyattsville, Md. 20782. Included should be the name, address and telephone number of the importer, the quantity of kinds of articles to be imported; the country or locality of origin; the intended U.S. port of entry; the means of transportation; and the expected date of arrival. Applications for permits must be submitted at least 30 days prior to the arrival date of the articles.

This action is effective upon publication in the June 10 Federal Register.

Lamanchas top annual state dairy goat shows

BY BETSY STITT
Staff Correspondent

HUNTINGDON — Goat breeders from Pennsylvania and surrounding states gathered June 15 and 16 at the Huntingdon County Fairgrounds for their annual state dairy goat shows and activities.

In addition to the show competition, the 1985 Dairy Goat Youth Representative was named during the weekend events.

The youth and buck shows were held on Saturday. More than 150 dairy goat breeders competed for top spots in the youth division, and the buck show had 66 entries.

Theresa Wigel, of Keemar, Md., judged the competition and remarked on the many top quality goats exhibited at the event.

Sue Miller, of Furlong, received the top honor in the doe show. Her six-year Lamancha was named the best doe of the show.

Two other Lamanchas earned best-of-show titles. The best buck of the show was shown by Dawn Spitler. And Deborah Van Valkenberg, a New Jersey entrant, showed the best baby buck of the show.

On Sunday during the open class competition, Deb Smeltzer of Centre Hall dominated the junior doe show by winning both the best baby doe and best junior doe prizes. She showed Posey Acres CS Wildfire, a Lamancha, to the winners' circle.

Brad and Terry Wigel won best senior doe of show with Gaymore's Likely Chemise, an Alpine.

Also selected during the weekend activities was the 1985 Pennsylvania Dairy Goat Youth Representative.

The 1984 representative, Leslie Bowen, handed over her title to Jonathan Merkle of Warriors Mark Glenda Hockenberry of Port Royal was named the alternate representative.

In addition to the main show, a special costume class was also held. Exhibitors and their goats came dressed in everything ranging from a Frito Bandito to the rock star Madonna. The audience helped pick the winners by applauding their favorite.

Out of about 15 entries, Dondee Reichel, Joe Reichel, and Jane Smeltzer earned first-place honors in the costume class.

And a "Miss Pennsylvania" of

the dairy goats was also selected following the shows. Jubilee Mt Misty, a Toggenberg owned by Dan Harter, earned that honor.

Following are the results from Saturday's youth and buck shows

Weather climate data now available from Cornell

ITHACA, NY — People interested in quickly obtaining accurate and up-to-date weather and climate information can do so, thanks to a new computer-assisted information system recently installed at Cornell University.

For a modest fee, subscribers with computer on-line capabilities can receive weather maps and forecasts for the United States, wind chill and dewpoint figures, historical climate data for the Northeast since the late 1800s, graphs of daily, weekly, and monthly temperatures; and monthly climate summaries.

The new system upgrades the dissemination of weather and climate information by receiving data via satellite and displays it on an interactive computer system. This recent breakthrough has been developed by the Northeast Regional Climate Center (NRCC), established at Cornell in 1983.

The center is the keystone in constructing a nationwide system of climate services required by the National Climate Program Act, according to Bernard E. Dethier, director of the NRCC. Dethier, a professor of meteorology in the meteorology unit of the agronomy department in the New York State College of Agriculture and Life Sciences at Cornell, is also a

climatologist for New York State and Maine.

The NRCC acts as a climate resource for more than 50 million people throughout the Northeast and adjacent areas of the United States, and strengthens the growing meteorology industry by helping make the study of weather more accurate, says Dethier.

The NRCC conducts research and provides services to meet the needs of its users throughout the northeastern region of the country. In addition to meteorologists, users of the NRCC services include more than 100 local, state, and federal government offices, 125 schools and universities, the news media, Cooperative Extension agricultural agents in New York and other states, ski-area operators, and contractors.

NRCC staffers, with the cooperation of state climatologists and scientists throughout the Northeast, assess effects of climate to develop new applications of weather data to agriculture, commerce, and industry, Dethier explains.

An extensive historical and real-time data bank in the NRCC computer is now available for users. This information enables users to take most of the guesswork out of activities such as

developing planting schedules or construction starts.

Cornell's Dethier says that users with computer access have more than 1,700 products available to them through the center's CLIMOD (Climate Information for Management and Operational Decisions) program.

In addition to the computer program, the NRCC issues special fact sheets on abnormal climatic events affecting the Northeast as they occur and monthly publications, including weather highlights, drought maps, monthly regional outlooks, and pertinent articles on climate and past weather trends.

Dethier says the response to the services provided by the center has been enthusiastic, with more than 1,000 subscribers already using the services. As the pioneer of such a regional program, the NRCC serves state climatologists in many states.

A typical project for the NRCC is its work with New Jersey, for example, it details the history of drought in the region, Dethier notes. Data compiled by the NRCC is displayed through maps and graphs, thus enabling planners to pinpoint areas of concern.

The NRCC also works closely with climatologists and scientists

throughout the Northeast to assess the impact of climate variables on agriculture.

The NRCC is funded by Cornell and the National Climate Program Office. Users pay a modest subscription fee to offset some of the federal budget cuts.

Despite the relatively low cost to subscribers, many of the resources provided by the NRCC remain untapped.

"Many users of climate information are unaware of the

existence of this valuable information," Dethier points out.

Dethier hopes to expand the program's capabilities by installing a toll-free telephone number to make the NRCC's computer-generated information and services more appealing to potential users.

In the meantime, anyone wanting more information about the services available through the Northeast Regional Climate Center should contact Dethier at (607) 256-3034.

Maryland prof named as Presidential advisor

COLLEGE PARK, MD — Robert G. Chambers, an associate professor with the University of Maryland's Agricultural Experiment Station (UMAES), has been named as a senior staff economist to President Reagan's Council of Economic Advisors.

Chambers, 35, will assume his duties today.

A native of Rockville, Md., Chambers was assigned to the department of agricultural and research economics at the university in 1979.

His major research interests include marketing and trade, production, econometrics, and policy analysis.

In his new post with the President's advisory council, Chambers will be primarily responsible for food and agricultural problems.

Chambers received his undergraduate degree in international relations from Georgetown University in 1972. He received the master's in agricultural economics from the University of Maryland in 1975.

Congratulations to the Kreider Family for 50 years of Commitment to Agriculture.

Hamilton Bank believes "The Family Farm is the Backbone of Agriculture." On behalf of all dairymen, we are pleased to salute the success of the Noah W. Kreider family from near Manheim. Pictured (l. to r.) are Darwin E. Boyd, Vice President and Director of the Agri-Finance Department for Hamilton Bank; Noah J., Jim, Ron, Rick and Richard Kreider; and Eric A. Rebert, Vice President and Commercial Loan Officer for Hamilton Bank. The Kreider family dairy is involved in producing milk from a substantial herd of Holstein and selling milk through two dairy stores. Additionally, they provide free milk to customers they serve at the Kreider Dairy Farms Family Restaurant, along Route 72 near Manheim.

A salute to dairymen. Every month is dairy month with us.

In June a lot of people pay tribute to dairy farmers. It's National Dairy Month.

At Hamilton Bank, we feel you deserve credit a lot more often than that. Managing a successful dairy operation requires working capital all year round. So we're here to help you meet your capital requirements whenever you need us.

The total annual volume of dairy production for our six-county area is over \$413,000,000. This represents 31% of the yearly production for Pennsylvania. Now that's a record you can point to with pride, and we're proud to be able to

help—anyway, anytime. At Hamilton Bank, every month is dairy month.

Contact your local office for complete details on Hamilton Bank Agri-Finance Programs.

Purina funds research

ST. LOUIS, Mo. — Six graduate students in agricultural colleges have been named recipients of Ralston Purina Company Research Fellowships, announced W.M. Jones, President of Purina Mills, Inc., a subsidiary of Ralston Purina. Each Fellowship, worth \$6,400, will be applied to the 1985-86 academic year.

"The purpose of our Fellowship program, which began in 1949, is to help train outstanding graduate students for leadership positions in the critically important areas of livestock and poultry science," Jones says. "The awards reflect the value we place on agriculture youth, who will be tomorrow's agriculture leaders."

Recipients in the field of Dairy Science are: Kimberly A. Cassida of Penn State University, James K. Drackley of Iowa State University and Roberto D. Sainz of the University of California at Davis. In the field of Animal Science, Donald W. Giesting of the University of Illinois and Joseph D. Jerry of Penn State University and in the field of Poultry Science, Beth Anne Davison of the University of Maryland.

"As the premiere company serving the needs of American agriculture, we feel it is important that we support today's livestock and poultry producer in every way we can," Jones concludes. "These recipients will help do just that."

Smiling in defeat

Vaughn King, right, of Delmarva North, Perdue, Inc., is a good loser. Smiling broadly, he accepts the "horse's tail" award to the worst chicken plucker in the Delmarva Chicken Plucking Contest. Presented by Kurt Schuster, Intervet, chairman of the event, the plaque was provided by the Waukesha Rubber Co.

Chicken-plucking champ

Otto Lange, right, of Buyers' Marketing Service, Salisbury, Md., claimed his fourth chicken plucking championship during a competition staged at the 37th Delmarva Chicken Festival. Kurt Schuster, Intervet, Millsboro, Del., chairman of the festival's Chicken Capers, congratulates the winner and presents the trophy by Waukesha Rubber Co., Inc., Waukesha, Wis.

Bill extends insurance to 'prevented planting'

WASHINGTON — A congressional subcommittee doing preliminary work on the 1985 Farm Bill has approved an amendment by U.S. Rep. Berkley Bedell, D-Iowa, to require disaster payments for losses caused when farmers are prevented by weather from planting crops in the spring.

"Over the past few years many producers have discovered—the hard way—that Federal Crop Insurance is not an all-risk program," Bedell said. "The Federal Crop Insurance program does not offer prevented planting coverage, and thus farmers could not protect themselves from this risk even if they wanted to."

"With my amendment, a producer would receive disaster payments for prevented planting whether or not he is eligible for Federal Crop Insurance. The amendment also would allow the Agriculture Secretary to make those payments in cash or surplus commodities."

The amendment was approved by the House of Representatives Agriculture Subcommittee on Wheat, Soybeans and Feed Grains, which is drafting provisions for the part of the Farm Bill that applies to those commodities. The subcommittee is expected to conduct several more sessions before it completes its proposal.

"I believe that this amendment is necessary in order to reduce this important risk facing farmers today," Bedell said. "I might add that improving the prevented planting disaster program should serve as an incentive to encourage producers to sign up for the wheat or feed grains program, and thus boost program participation."

National Jersey breeders convene in Lancaster

LANCASTER — A record crowd of Jersey breeders from across the United States converged on Lancaster this week for the annual meetings of the American Jersey Cattle Club and National All-Jersey, Inc.

Nearly 600 Jersey cattle enthusiasts attended the national meetings, the highest ever in the AJCC's 117-year history.

Many individuals were feted during the four-day event, including some aggressive new leaders in the Jersey breed, as well as some long-time contributors to the growth and success of the Jersey organization.

Among the Jersey newcomers were the recipients of the highly coveted Young Jersey Dairyman Awards. Seven couples overcame stiff national competition to earn these Young Jersey honors, which were awarded during the AJCC Awards Breakfast on Wednesday morning. The winners were:

- Dean and Chris Blackhurst, of Pleasant Grove, Utah;
- Dennis and Cheryl Cline, of Waterville, Iowa;
- Edwin and Cheryl Ettinger, Mocksville, N.C.;
- Roger and Anita Marcott, Greenville, Ill.;
- Bill and Kathleen Schaeffer, Acme, Wash.;
- Richard and Paula Schlotterbeck, Lewisburg, Ohio, and;
- Dan and Connie Schweigert,

Tremont, Ill.

Also presented at the Wednesday morning awards breakfast were national production trophies, which went to a couple of the Jersey breed's old favorites.

Referred to as the "perennial winner," Basil Lucy Minnie Pansy captured two lifetime awards. The 19-year-old Pansy, owned by William Henry Diley and Sons, of Canal Winchester, Ohio, received for the seventh time the Ogston Farm Trophy for Living Lifetime Milk and the High Lawn Farm Trophy for Living Lifetime Fat.

Her lifetime production record stands at 275,624 milk, and 13,342 fat in 5,173 days.

Winning the President's Trophy for the breed's top lactation was SLJ Faithful Mary Francis, owned by Hays State Line Jerseys, Seneca, Mo. At 7 years and 6 months she produced 22,910 pounds milk and 1,285 pounds fat in 305 days.

Among the veteran Jersey breeders to earn recognition at the national conference was Newell Mills, of Fallon, Nev. During the AJCC annual meeting, he was honored with the receipt of the club's Master Breeder Award.

Also at the annual meeting, retiring executive secretary J.F. Cavanaugh presented his final annual meeting address, in which he expressed his optimism for the future of the Jersey breed. "I like

Co-chairs Helene and Robert Dreisbach (left) and Angie and Donald Koontz were congratulated and thanked for organizing the successful AJCC/NAJ annual meetings.

our goal," he concluded with his trademark phrase, "Making owning Jerseys more profitable

M.E. Core, soon-to-be AJCC executive secretary.

than owning any other breed of dairy cattle."

Assuming the position of executive secretary will be current treasurer and assistant secretary, M.E. Core. During the AJCC annual meeting, he reviewed the breed organization's favorable performance status and financial stability.

Participation in Jersey performance programs is now at a 20-year high with 724 TPE and DHIR herds, and type appraisers scored a record number 40,567 cows on over 1000 farms this year.

DHIR production per cow has risen to a new high of 12,501 pounds milk, and 598 pounds fat.

During Tuesday's National All-

Jersey, Inc. annual meeting, the year-end review was also bright. Assistant Secretary Calvin Covington stated, "NAJ is making you money. In 1984 as a result of being paid on an Equity Pricing system, Jersey dairymen received an additional \$16 million."

In addition, over 100,000 pounds of Jersey Pride Natural Cheese was sold in 1984, the first full year of the commodity's existence.

In addition to attending the AJCC and NAJ annual meetings, convention participants also enjoyed the festive Tuesday evening annual banquet, which honored Jim Cavanaugh. Other conference highlights included the National Heifer Sale, held at the Solanco Fairgrounds, and several tours of Lancaster County Jersey farms.

The Pennsylvania Jersey Cattle Club was congratulated for hosting the highly successful annual meeting. Due to the hard work and fund-raising efforts of the club members, conference costs were kept to a minimum, which contributed to the record attendance figures.

Co-chairing the national Jersey convention were Robert and Helene Dreisbach, Hamburg, and Donald and Angie Koontz, Fredonia

Ten busloads of Jersey breeders came to view the cows at George and Doris Hough's MilkHoney Farm, as well as several other top Jersey herds in Lancaster County.

Cavanaugh recognized for service

BY ROBIN PHILLIPS
Staff Correspondent

LANCASTER — The crowd was billed as the largest ever as almost 600 Jersey breeders gathered at the Americana Host Farm Resort Tuesday evening to honor their retiring leader, J.F. "Jim" Cavanaugh.

Recognizing 38 years of dedicated service and leadership to the Jersey breed, "The J.F. Cavanaugh Recognition Banquet," part of the American Jersey Cattle Club's annual meeting, honored the retiring executive secretary of the Club.

For his outstanding and unselfish service toward the advancement of the Jersey breed, Cavanaugh was honored with the AJCC Distinguished Service Award at the banquet. Presented by C.L. Collins Jr., AJCC president, the award marked the celebration of accomplishments by Cavanaugh for the Jersey cow.

A major and combat fighter in the Army Air Corps for four years during World War II,

Cavanaugh left in 1946 to return to the Hoard's Dairyman staff. He joined the AJCC staff in 1947 as assistant secretary, and in 1953 he became the first editor of the Jersey Journal.

Instrumental in launching the All-Jersey milk program in 1957, he continually emphasized the increase of production of the Jersey cow and the expansion of milk marketing programs.

He preached improving the profitability of the Jersey cow and urged breeders "to make owning Jerseys more profitable than owning any other kind of dairy cattle."

Because of Cavanaugh's foresight, a major advancement toward this end came with the AJCC adoption of the USDA Sire Summary in 1967 as the official method of ranking Jerseys.

Cavanaugh's leadership brought the Jersey breed to its present strong position in the dairy marketplace. Under his guidance the Genetic Recovery Program advanced, the Equity Program began, and the Jersey

Pride Cheese Program was launched. Jersey Marketing Service also expanded, and the linear appraisal system was also initiated.

As the first breed association to ever begin many of these programs, the AJCC and Jersey breeders enjoyed countless advancements and recognition under Cavanaugh's 38-year tenure, the longest in the 117-year history of the AJCC.

His friends and co-workers at the banquet on Tuesday evening roasted the celebrated leader as Jersey breeders filled in the applause. Numerous gifts and plaques were also presented by several state clubs to the distinguished executive secretary.

As host of this annual meeting, the Pennsylvania Jersey Cattle Club presented Cavanaugh with a quilted wall hanging of a Jersey cow at the conclusion of the banquet. Angie Koontz, Fredonia, made the presentation and echoed the sentiments of Jersey breeders nationwide.

Retiring AJCC Executive Secretary J.F. "Jim" Cavanaugh receives best wishes and a fancy Jersey cow from Angie Koontz, representative of the Pennsylvania Jersey Cattle Club.

Ogston Sale

(Continued from Page A1)

Projected at over 17,000 pounds milk and 870 pounds fat, Ogston S.B. Sound is a Soldier Boy out of Quicksilvers Sound of Ogston.

Bringing \$4700 was Ogston Chocolate Sound, also out of the Ex-90 Quicksilvers Sound of Ogston dam. New York Jersey breeder George Hanford purchased the Observer Chocolate Soldier daughter.

Liking the looks of Ogston Chocolate Sound, Hanford also purchased her daughter, Ogstons Generators Sound, who boasts a two-year-old record of nearly 14,000 pounds of 4.8 percent milk.

Maryland's Windy Knoll Farm also made a top purchase during the sale, buying Ogston TB Velda, a Top Brass daughter out of Ogston

PSU dairy science club named nation's best

STATE COLLEGE — The Penn State Dairy Science Club's successful year culminated last week when it was honored as the nation's top dairy science chapter.

The outstanding chapter award was presented during the 80th Annual Meeting of the American Dairy Science Association in Champaign-Urbana, Ill. Last year the Penn State Club was tied for

SB Velde, for \$5200.

The Ogston Golden Opportunity Sale average reached nearly \$1900.

With 182 head sold at this dispersal sale, the productive, functional genetics developed by Jack Bishop at Ogston will now be spreading nationwide.

first place with Virginia Polytechnic University.

Also earning recognition during the ADSA meeting were Penn State dairy science professor Larry Muller, and dairy science club member Kim Kriebel.

Judging of the 20 clubs competing for the award was based on club activities, a club display, and student participation at the ADSA meetings.

Highlighting the Penn State Dairy Science Club's activities this year was the successful management of the first Nittany Lion Fall Classic, a consignment sale held in November at Penn State's Ag Arena. The Classic saw 57 Holsteins bring an average of just over \$2000, ranking it among

the top ten club sales last year.

The club's other activities include: a Christmas cheese box sale, a dairy promotion day at a local shopping mall, a spring dairy judging contest, and the Dairy Expo, a fitting and showmanship contest.

During the ADSA meeting, a slide show and discussion of sale activities was presented by Deb Price of Douglasville.

In addition to the Penn State club's recognition, Kim Kriebel, of Millerstown, was elected president of the ADSA Student Affiliate Chapter for 1985-86. Kriebel served last year as officer-at-large of the student affiliate.

Penn State dairy science professor Dr. Larry Muller was also recognized during the ADSA

meeting for his outstanding teaching record. Muller was awarded the Ralston-Purina Company Teaching Award, presented annually to one professor in the nation.

Muller and Dr. Thomas Sweeney, serve as advisors to the Penn State Dairy Science Club.

Other Penn State dairy science students were also honored during the ADSA meeting. Karen Long, Akron, and Tom Roth, Pottstown, represented the club with presentations on "Calcium — Milk's Precious Mineral" and "Stray Voltage."

Nine club members were also recognized for superior scholastic achievement at Penn State. Eleven Penn State students and two advisors attended the ADSA meeting.

Dairy farmers to receive

\$13.78 for May milk

NEW YORK — Dairy farmers who supplied milk plants regulated under the New York-New Jersey marketing orders during May 1985 will be paid on the basis of a uniform price of \$11.78 per hundredweight. Market Administrator Thomas A. Wilson also stated that the price was \$12.19 in April 1985 and \$12.26 in May 1984. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The seasonal incentive plan removed \$.40 per hundredweight from the May uniform price, a total of \$4,353,369.00. Deductions will continue through June and will be returned in the August through November uniform price calculations.

May's uniform price was lowered \$.05 per hundredweight because \$520,276.35 less was available in unreserved cash from the April 1985 pool. Failure of Northeast Dairy Cooperative Federation, Inc. to pay its pool obligation for April accounted for this shortage.

A total of 16,580 dairy farmers supplied the New York-New Jersey Milk Marketing Area with 1,088,342,251 pounds of milk during May 1985, an increase of 3.9 per-

cent (about 41 million pounds) from last year. The gross value to dairy farmers was \$130,434,214.02. This included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmer.

Regulated milk dealers (handlers) used 397,448,034 pounds of milk for Class I, 36.5 percent of the total. This milk is used for fluid milk products such as homogenized, flavored, low test, and skim milks. For May 1985, handlers paid \$14.20 per hundredweight for Class I milk compared with \$14.33 a year ago.

The balance (690,894,217 pounds or 63.5 percent) was used to manufacture Class II products including butter, cheese, ice cream, and yogurt. Handlers paid \$11.34 per hundredweight for this milk.

The uniform price is based on milk containing 3.5 percent butterfat. For May 1985, there was a price differential of 16.3 cents for each one-tenth of one percent that the milk tested above or below the 3.5 percent standard.

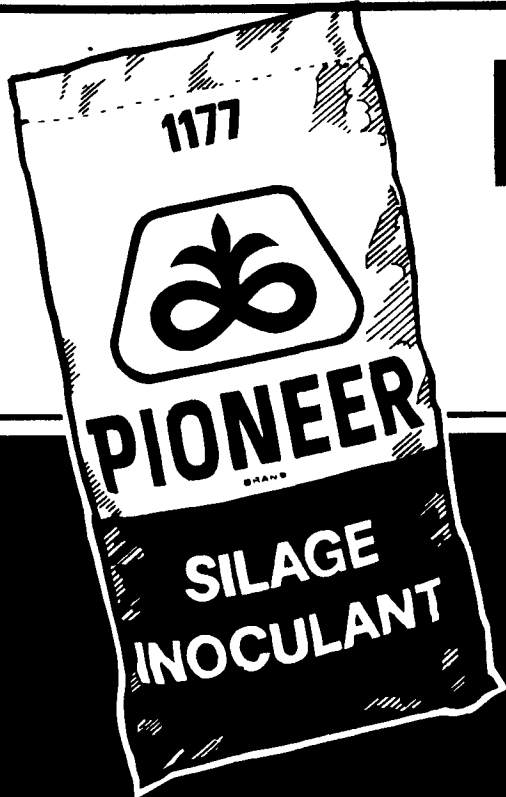

All prices quoted are for bulk tank milk received within the 201-210 mile zone from New York City.

Valiant daughter tops Sonlight Dispersal

This Bell daughter by a Persuader was one of 100 animals sold at the Sonlight Farm Dispersal of Don and Doris Neff of Ronks last Friday. This two-year-old heifer sold to John A. Brubaker Jr. of Christiana for \$2,100.

Topping the sale was a Valiant daughter bred in November to Columbus. She is out of Plushanski Kingpin Fanny, whose top 365-day record stands at over 29,000 pounds of milk. Fred P. Wainwright Jr. of New Jersey purchased the cow for \$2,975. Mel Kolb Inc. served as sale manager.

Jersey juniors attend national convention

LANCASTER — Over 80 Jersey juniors from across the states accompanied their parents to the national Jersey convention this past week in Lancaster to enjoy the festivities that the Pennsylvania Junior Jersey Club had planned for them.

Beginning with pool parties, the youth enjoyed junior breakfasts,

an inspiring presentation by Dieter Krieg, Farmshine editor, and much fellowship as they became better acquainted.

Using the Jet Shake machine and milk as their official beverage, the Pennsylvania juniors hosted their guests by the pools at the Americana Host Farm Resort. Two junior breakfasts were also

held for juniors only.

Doris Hough, a Lancaster County Jersey breeder was honored at the breakfast on Tuesday morning. The illustrator of the Jersey cookbooks and Jersey stationery, which are proving to be major money makers for the junior club, Hough was applauded and presented several copies of the newly published cookbook.

After the presentation Hough commented that she enjoyed supporting the junior club and will continue to donate her talents where they can be used.

Dairy royalty presided over the youth activities, as the Pennsylvania State Dairy Princess Lynette Loper was present, as well as the National Jersey Queen, Carol Dreisbach, and state Jersey Queen Carol Hobaugh.

Patty Dreisbach, president of the Pennsylvania Junior Jersey Club and former National Jersey Queen, presents Doris Hough with a "TMR" Cookbook in appreciation of her contributions to the Jersey juniors.

Betsy Dupuis, Pennsylvania Junior Jersey Club secretary and cookbook editor, says the funds raised by the Pennsylvania juniors and adults made the national convention affordable for Jersey breeders from across the states.

July 1st deadline for Ayrshire production contest

CONNOQUENESSING — Pennsylvania Ayrshire juniors have two special contests to look forward to at the Ayrshire Breeders annual field day, scheduled for July 13th, at Harold and Barbara Raders' Homestead Acres, Connoquenessing.

Juniors can compete for milk and fat production awards or submit entries for the scrapbook contest to be held during the field day.

To qualify for the production awards, Ayrshire juniors must send in their applications by July 1.

Rules for the production awards include:

- The animal must have completed an actual 305 day record of at least 11,000 pounds milk and 450 pounds fat.

- The junior must have owned the animal since the beginning of her qualifying record. Only records completed in the 1984 calendar year will be accepted.

- Milk and fat awards will be given in five categories: yearling (calving up to 24 months of age); two-year-old (calving between 24-35 months); three-year-old (calving between 36-47 months); four-year-old (48-59 months); and aged (after 60 months).

- Entries need not have been shown to qualify for the contest.

For entry blanks for the production awards contact Harold or Barbara Rader.

Juniors are also eligible for a newly created scrapbook contest. Youth are encouraged to enter a scrapbook on their Ayrshire projects.

Scrapbooks should be brought to the field day or given to a member of the youth committee prior to the event. Judging in different age-group categories will be done at

the field day and prizes will be awarded immediately following the judging.

Suggested items to include in the scrapbook are cover page, photo of applicant, name, age, address and phone; story of Ayrshire work

photos; pedigrees; 4-H or FFA project books; and other mementos of interest and information.

First-year members and youth of all ages are encouraged to

submit their scrapbooks to the contest.

Members of the Ayrshire youth committee include: Barbara Rader, Box 216, Connoquenessing, PA 16027. John Ocker III, R.R.5,

Shippensburg, PA 17257. Sandy Shetterly, R.D.1, Box 188, Millersburg, PA 17061. Harold Kulp, 1096 Spiece Road, Pottstown, PA 19464. Milton Brubaker, 595 Snyder Road, Lititz, PA 17543.

Pennsylvania Ayrshire Breeders plan summer field day

CONNOQUENESSING — The Pennsylvania Ayrshire Breeders' Association field day is set for July 13th, at Homestead Acres, owned by Harold and Barbara Rader, Connoquenessing. Special activities are scheduled for adults and juniors during the day.

Ayrshire breeders from across the state will be welcomed to the farm at 10 a.m. The first speaker of the day will be Butler County Extension agent Robert Rugaber, presenting a program on heifer measuring.

At 11 a.m., adults and youth will have an opportunity to participate in a dairy judging session. Dale Wack, of Harmony, will be the official judge.

A pig roast is scheduled for the noon meal, and at 1:30 the "Anything Goes Auction" will be held, with auctioneer Sherman Allen, Conneaut Lake. This will be the primary fund raiser for the Pa. Ayrshire youth and will help finance the 1986 national Ayrshire convention, to be held in Grantville.

Donations for the "Anything Goes Auction" are still being sought. To donate items to the auction contact Harold or Barbara Rader.

Field day activities will continue at 2:30 with prizes for all the contests and milk production certificates being awarded.

At 3 p.m. a brief business meeting will be held, and the 1986 national convention committees will meet. Overall chairman Earl Keefer, Millersburg, will update everyone on plans for the convention.

The Raders' Homestead Acres is located about 40 miles north of Pittsburgh, on Route 68 between Butler and Evans City. When travelling to the field day, watch for signs at the Connoquenessing

Elementary School.

For more information, write Harold and Barbara Rader, Box 216, Connoquenessing, PA 16027. Or call (412) 789-7413 or (412) 789-7417.

EPA should rethink cut in gasoline lead, group says

WASHINGTON — A spokesman for the National Council of Farmer Cooperatives (NCFC) today called upon the Environmental Protection Agency (EPA) to act responsibly in addressing concerns of U.S. agriculture before taking any final action to eliminate lead in gasoline.

R. Thomas Van Arsdall, NCFC energy vice president, warned that, "based on the best information we have available, it appears that a large number of gasoline engines on farms could be damaged if the EPA moves too quickly in removing the last increment of lead in gasoline."

The co-op energy spokesman observed that EPA had already issued a final rule which would remove 90 percent of the remaining lead in gasoline by Jan. 1, 1986, due to reported health

hazards. The EPA has issued a notice of inquiry which suggests that it is considering the removal of all lead by Jan. 1, 1988.

"Lead provides a dual function, in that it boosts gasoline octane to an acceptable level and serves as a valve lubricant," Van Arsdall noted. "While octane can be replaced through additional refining or by adding ethanol, there is no known substitute which can be used as a valve lubricant."

There are an estimated 1.7 million gasoline-powered tractors and 308,000 gasoline-powered combines still on farms, plus more than 100,000 other gasoline-powered machines, according to USDA data. Van Arsdall said farmers could experience excessive engine wear and expensive repairs in many of those engines if all lead is removed from gasoline.

We are not trying to become health experts, or impede EPA in meeting its health objectives," Van Arsdall declared. "But we are concerned that farmers could be subjected to severe adverse economic impact by any solution carelessly constructed, even though the agricultural community is not the source of the lead problem."

The NCFC spokesman noted that the EPA could address agriculture's concerns effectively in one of three ways: (1) suc-

cessfully testing farm-type engines under farm operating conditions, to show that risk of engine damage doesn't increase significantly from using unleaded gasoline; (2) introducing an alternative additive which is technically-effective, environmentally-acceptable and affordable; or (3) providing a transition period in which farmers would be allowed to retire engines or retrofit them during scheduled overhaul.

The co-op spokesman commended Rep. Edward R. Madigan (R-IL.) for his thoughtful leadership on this issue. "I understand that Congressman Madigan intends to introduce legislation shortly which would prevent the EPA from taking final action until agriculture's concerns are addressed," Van Arsdall noted.

The National Council of Farmer Cooperatives is an association of cooperative businesses which are owned and controlled by farmers. Its membership includes supply cooperatives which own and operate five refineries and market petroleum products in more than 40 states, accounting for about 40 percent of on-farm fuel use and a large portion of rural needs. NCFC represents about 90 percent of the nearly 6,000 local farmer cooperatives in the nation, with a combined membership of nearly two million farmers.

WESTFALIA HIGH TECH DAIRYING®

WESTFALIA...

Leading the way for leading dairymen.

The Westfalia Bio-Milker — It's Something Else

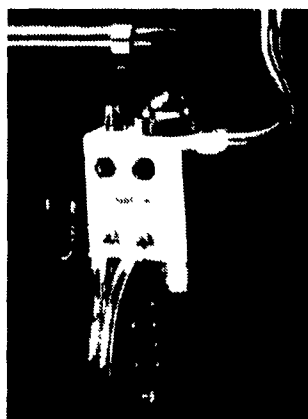

It's products like the Westfalia Bio-Milker that serve notice to the dairy industry that Westfalia is the High-Tech leader. Who is the patented Bio-Milker for? Any dairyman concerned with both udder health and milking efficiency.

The Bio-Milker features a synchro-

nized automatic air-inlet valve just under the teat tip. Air enters only during the release phase. A perfectly timed air burst quickly moves the milk away from the teat. This reduces the risk of infection by limiting teat impacts. Also, vacuum is utilized to provide a biologically desired pressure release of teat tissue. Westfalia's Bio-Milker is the ultimate in milking quality.

Visotron Engineered To Get

All The Milk

Looking for that individual treatment of your cows in your stanchion barn?

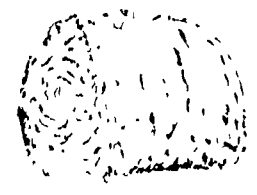

You're looking at it. Westfalia calls it Visotron. It lets you deal with individual milking characteristics of each and

every cow in the barn. You can monitor milk flow visually, control pulsation and regulate vacuum on a per cow basis.

This very simply results in maximum production and more profit because it helps you get all the milk. Another good example of Westfalia's High-Tech leadership.

Hershey Foods, General Mills, General Foods

Powerhouse firms show their faith in dairy products

BY JAMES H. EVERHART

LANCASTER — Although dairy purists may recoil in disgust, the dairy products of the 1980s are clearly the "nutritious snack foods" that are taking America by storm.

As more and more consumers demand convenience foods that have "natural, nutritious" labels, the giant food companies are rediscovering dairy products.

It's no coincidence that huge conglomerates like Hershey Foods, General Mills, General Foods and Pillsbury are making strong moves to add dairy-related snack foods to their lineups.

It all indicates a lot of high-level confidence in the dairy industry, though producers most likely won't reap the benefits for five years, at the earliest.

Part of the confidence is well founded. General Foods, for instance, is broadening and expanding its offerings of "Pudding Pops," the dairy-based "pudding on a stick" that has become one of that firm's most successful new products ever.

After some disappointing test marketing and initial consumer response, "Pudding Pops" went on to record \$100 million in sales their first year, an enormous success.

And though dieticians may turn up their noses, the performance of "Pudding Pops" has done a great deal to increase the viability of other milk-related products, and boost milk as an important element in the arena of "natural, nutritious" ingredients, dairy promotion experts say.

Perhaps the biggest success of late has been Hershey Foods' new Chocolate Milk, which has been in nationwide distribution for a little more than a year.

Originally test-marketed in the Lancaster area, Hershey's Chocolate Milk has exploded the myth that a milk product cannot be sold nationwide.

The product is manufactured according to strict Hershey standards in a network of 70 dairies around the country.

And though now being challenged by archrival Nestles, the Hershey brand has become the top-selling chocolate milk in the country, according to Dennis Eshleman, Category Development Manager for Hershey.

The product is positioned to seize

on several deficiencies that the public has perceived in chocolate milk over the past few years, Eshleman said.

First, chocolate milk products have become relatively inconsistent over the past few years, as manufacturers tried to implement economies that allowed them to compete successfully for school lunch programs, experts said.

More importantly, said Eshleman, consumers noted that much of today's chocolate milk is not as chocolaty as it once was.

In both instances, Hershey, with its quality image and reputation for chocolate manufacture, was the perfect company to counter the negative public perceptions of the product.

The firm combined the right product with superb packaging and marketing, which earned the company an "Effie" award, the American Marketing Association's version of the "Oscar."

And though the firm won't release sales figures, Eshleman said it will soon be promoting the product as a "very good alternative" to soda.

Hershey's aggressive campaign to promote the product "has dramatically expanded the category," or has resulted in significant increases in sales of both chocolate and regular milk.

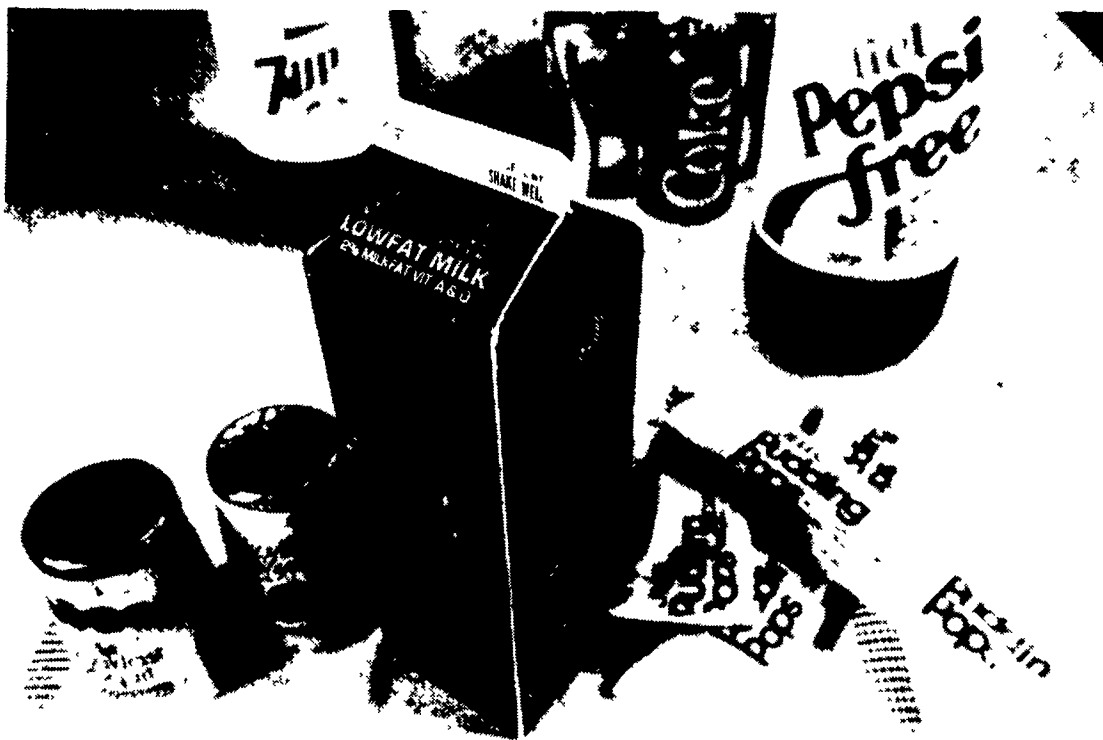

Hershey sees great potential in other milk products as well, says Eshleman, who notes that, in the past, "milk is something that has been undermarketed."

For instance, in some of the areas where the products were introduced, he said, the Hershey commercials were the first milk ads that many consumers had ever seen.

Even now, he said, several states prohibit the kind of promotional devices — especially couponing — that are common throughout the beverage industry.

Nevertheless, he said, he expects to see more "national consumer products companies" enter the field with milk or dairy-based products, as companies see the profits to be earned.

General Foods will certainly be one of the most important entrants in the sweepstakes, with several new Pudding Pop flavors and more intense marketing of its Dover Farms frozen whipped cream.

Others include General Mills, which will expand its production of Yoplait yogurt with a new plant in Hazleton, and Pillsbury, which hopes to expand and lock up the "super premium" ice cream market with Haagen-Dazs.

Meanwhile, both private companies and industry-funded researchers attempt to develop striking new dairy products that, it is hoped, will capture the public's imagination.

The newly established product development laboratory of Dairy Research Inc. (nicknamed DRINC), is working on a number of projects, including a high-calcium milk, an effervescent milk-based beverage and a low-calorie, low-cholesterol butter.

The DRINC research is directed mainly at the following a variety of leads, and turning over the developments, when they occur, to the major manufacturers, for a share of later profits.

The basic assumption, says DRINC President Anthony J. Lukas, is that concepts or products that were not technically feasible just a few years ago are now waiting to be developed.

Ice cream manufacturers have always been more aggressive than any other part of the dairy industry in developing new products.

Not surprisingly, they're getting in on the act too, with a \$12 million advertising campaign.

"People take ice cream for granted," said John Speer, of the International Association of Ice Cream Manufacturers. And his group wants "a whole array of products" for consumers to choose from.

That "whole array" includes everything from water ices and sherbets to premium, super premium and "designer" ice creams, he said. And the indications are that consumers will be very selective about their ice cream choices, a process which, he said, will only upgrade the entire market.

Overall, as the dairy industry struggles to find its way in the rough-and-tumble world of the Eighties, it must be conscious of the difficulties of introducing new products, says Phil Keeney, professor of food science at Penn State.

Companies that market new products nationwide have to go through extensive research, testing and marketing, just to get the product off the ground.

He cited years of research, including idea generation, focus groups, pilot projects, test marketing, and further development that goes into the process of readying a new product for the market.

After that, there's the process of creating, expanding or revising production lines and refining the manufacturing process to produce the product on a large scale.

It all takes millions and millions of dollars, requiring the capital, research and marketing skill of a major consumer products company.

That's why, he says, the best opportunities for immediate improvement lie with "improving the

attractiveness of existing products," or having dairy products added to new or existing brands not generally considered dairy products.

Most importantly, however, he said, the industry must be much more consumer-oriented in its promotional efforts.

"You don't develop new products to help the farmer," he said. "You develop them to meet a consumer need or desire."

Farm Calendar

Saturday, June 22

National Holstein Centennial Sale, Syracuse.

Lancaster Conservation District monthly board meeting at 7:30 p.m. at the Farm and Home Center

ABS exec earns NAMA award

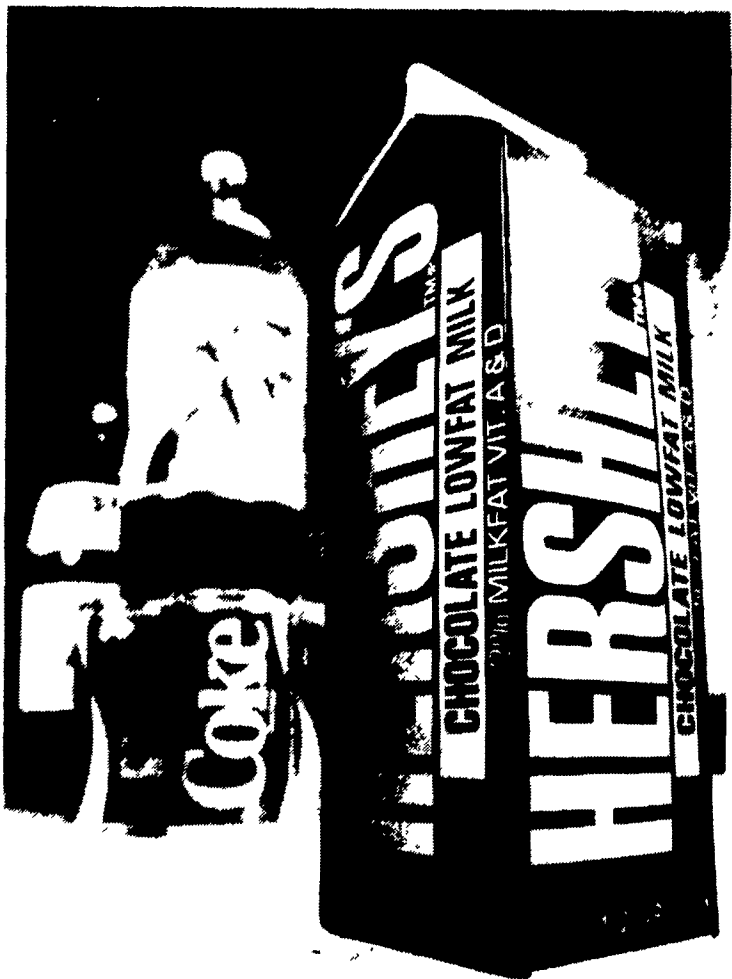

DEFOREST, WI. — Robert E. Walton, President and General Manager of American Breeders Service, has received the National Award for Agricultural Excellence.

The award program, administered by the National Agri-Marketing Association, was presented during NAMA's recent conference in Orlando, Florida.

Walton was honored for achievements in the agribusiness area. His contributions as a geneticist in the development of breeding programs designed to improve milk production in dairy cattle were specifically cited.

In addition, as head of ABS, he is credited with having guided the company through a period of impressive business growth both domestically and in foreign markets.

Walton earned B.S. and M.S. degrees from Oklahoma State University and a Ph.D. degree in Animal Breeding from Iowa State. He also holds a certificate from Harvard Business School for Management Development. He was named President of ABS in 1968 and has received numerous honors for his contributions to the livestock and dairy industries.

Bureau's dairy measures tie prices to market average

PARK RIDGE, IL. — Milk production is poised to skyrocket unless sensible farm programs encourage dairymen to make supplies meet demand, according to the nation's largest farm organization.

Hollis Hatfield, American Farm Bureau dairy director, said purchases are running above a year ago levels and "any government legislation offering financial incentive to produce without respect for market demand will open the floodgates."

The dairy specialist said there are more young cows ready to begin milking on farms now than

any time since 1965. The 290,000 drop in cow numbers on January 1, from a year earlier was largely offset by an increase of 225,000 in dairy replacements. "In addition to the high number of replacement heifers available, dairymen are ready to feed higher-quality rations to increase milk production if federal programs continue to offer to buy all the milk that the market does not absorb."

Farm Bureau's dairy program proposal, contained in S908 and HR1965, sets the support price at 90 percent of the average all milk price of the previous three years, with adjustments made semi-

annually based on the amount of net government purchases. The Secretary of Agriculture may reduce the support price by not more than 3 percent every six months if government purchases remain in excess of eight billion pounds annually.

"The legislation ties the support price to the level of government purchases, sending a clear signal to the dairy industry that prices will be adjusted if supply and demand are out of balance. The degree of adjustment will be limited to avoid abrupt financial shifts for dairy producers," Hatfield said.

"Farm Bureau's proposal is directed at controlling supply imbalances" which have been fostered by previous farm programs," he said.

The Farm Bureau is opposing efforts to create new diversion programs and to establish assessments on producers to pay for a diversion program plus the cost of CCC purchases in excess of five billion pounds. Hatfield said previous diversion programs did not solve the dairy industry's problems. "We oppose any new diversion programs because they don't work and they create

regional milk price inequities. Dairymen do not want an assessment program because it shifts the cost of the program from the government to producers, hiding the true cost of the dairy support program from consumers and taxpayers."

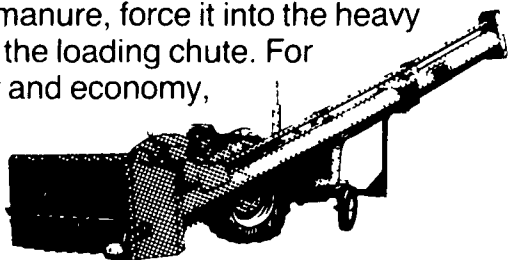

You can bet on the spread from Hedlund-Martin

Equipment to solve your manure handling problems.

Save your time and money by using machinery designed to bridge the gap between liquid and solid manure handling:

The Equalizer

Loads manure too thick to pump and too thin to bucket. Powerful blades in the scoop break up the most crusted manure, force it into the heavy auger, and up the loading chute. For loading power and economy, there's nothing like the Equalizer.

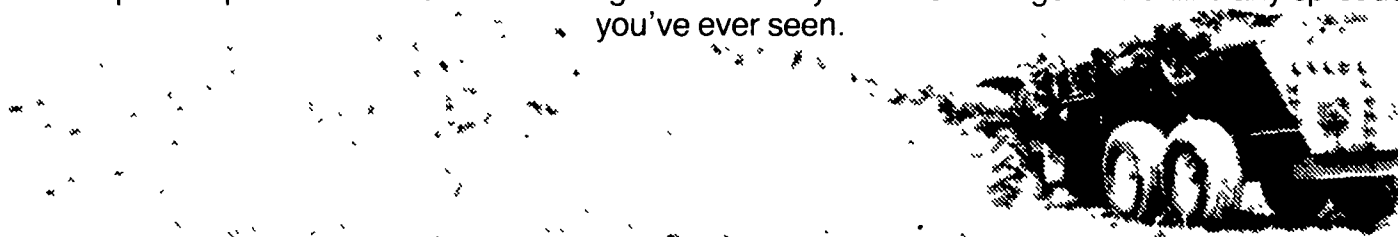

The Vanguard

Hauls liquid and semi-solid manure fast, up to 600 gallons per minute. Capacities range from 1575 to 3300 gallons. With the Vanguard you get a low cost-to-capacity ratio, low maintenance, and extra heavy construction for years of tough use

The Scavenger II

The ultimate machine to handle all your manure, year 'round. Handles liquids, semi-solids, pen or pack, even frozen manure. It unloads faster and uses less horsepower than a flail spreader. The Scavenger II is built with heavy duty chain drive and rugged construction throughout. You'll get an even spread up to 50 feet wide. Your first glance will tell you the Scavenger II is unlike any spreader you've ever seen.

For the solutions to your manure handling problems, talk to your Hedlund-Martin dealer today.

Blair and Bedford Counties join forces to promote milk

BY BETSY STITT
Staff Correspondent

ALTOONA — Blair and Bedford County dairy promotion committees joined forces with the Pennsylvania Dairy Promotion Board last week to promote dairy products at the Logan Valley Mall.

This week-long affair has been an annual event for over 10 years and has been a joint county effort for the past two years. The Dairy Promotion Board provided funds for the event.

Part of the festivities included a milk carton sculpture contest. First prize and \$75 went to the 4-H Equinaires for a horse they constructed from milk cartons. Second place and \$50 went to Noreen DeCriscio of Altoona who constructed "Milky the Marionette." The 5th and 6th graders from the Hicks United Methodist Church received \$25 and third prize for a large windmill they constructed.

On Friday Altoona Mayor Janetta and Rep. Ed Johnson were

present for a milk toast to proclaim June 15 Dairy Day. Blair County had placemats made to be used in many restaurants during Dairy Day.

Friday evening shoppers could stop by the dairy booth and enjoy square dancing. The audience was even invited to join in for a polka. All the children watching the dancing received a free balloon that proclaimed "I love milk."

Children could also enjoy a miniature golf course. The first hole was a block of cheese, the second, a milk carton and the third, a dairy bar. Blair County dairy princess Sheila Biddle and Bedford County dairy princess Joane Reed helped out with the miniature golf and other activities during the week.

Both dairy promotion committees gave away recipes and products made with milk such as cream cheese mints, cheese, cheesabutter, cheese fudgies and Texas sheet cake.

Winners of the milk carton sculpture contest pose in front of the windmill that earned the fifth and sixth graders at Hicks United Methodist church \$25 and third prize. From left are Blair County dairy princess Sheila Biddle; Noreen DeCriscio, second place winner; Kristen Metzker of Hicks U.M. Church; Kris Ward, vice-president of the 4-H Equinaires who won first prize; and Bedford County dairy princess Joane Reed.

Soybean leaders oppose South American bean trade

ST. LOUIS — The American Soybean Association (ASA) is extremely concerned by prospects of South American soybeans and soybean products being imported into the U.S.

"ASA has consistently supported policies of open trade. However, we deplore world economic disorders which encourage importers to take advantage of current international market conditions for their own short term profits at the expense of U.S. soybean farmers," said ASA President Roger Asendorf, a soybean farmer from St. James, Minn. "Current and former Brazilian and Argentine agricultural policies have also contributed to this unsavory situation."

Asendorf says ASA is aware of the pressure these nations are under from the International Monetary Fund to repay huge debts totaling over \$45 billion in Argentina and \$90 billion in Brazil.

"We fail to see the logic, however, in an export policy in which debtor nations sell soybeans and products at a substantial loss in order to undercut U.S. soybean prices," says Asendorf.

"This is particularly disturbing since the U.S. currently provides a major share of the IMF funds which are behind these policies. And, it is also disturbing to note the World Bank, of which the U.S. is the largest contributor, recently loaned Brazil \$200 million for railroad construction to improve commodity transportation from the interior regions," says the ASA president.

"The current soybean market situation is a reflection of the world economic malaise and particularly the need for Argentina and Brazil to export products at any price to satisfy the international banking community," says ASA Chief Executive Officer Ken Bader. He further explained U.S. soybean prices are being challenged by the high value of the dollar, a deflationary U.S. economy, increased soybean production in Brazil and Argentina and over-expansion of Brazil's processing industry.

"U.S. farmers have the productive capacity and management ability to compete in the world market. In fact, U.S. soybean product exports have been made to Brazil within the past four

years," says Asendorf.

"We ask only that rules of competition be applied equally to all who participate in the international market place," he says.

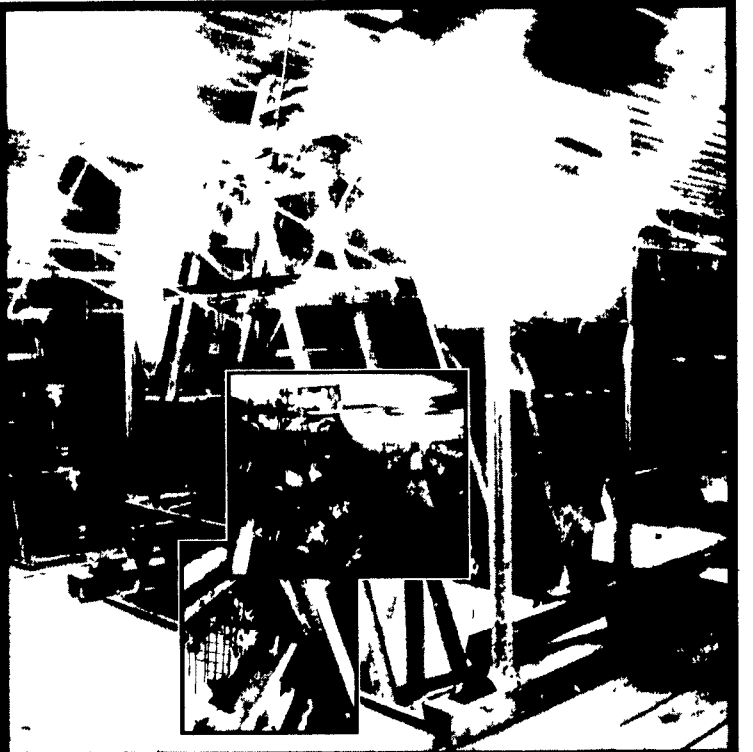

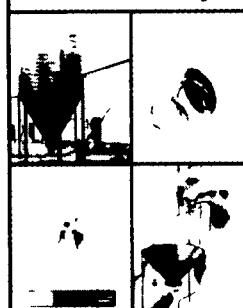

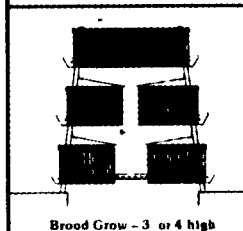

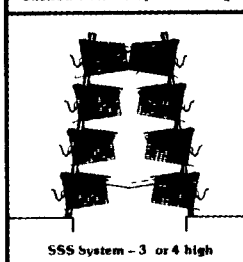

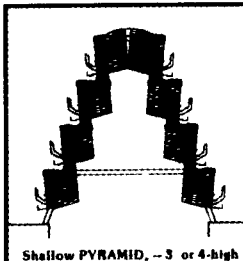

ASA believes the current situation is temporary and will be corrected as soon as the U.S. harvest begins rebuilding U.S.

soybean stocks, notes Bader. Further improvement will come as the dollar value declines to more realistic levels and world economics regain momentum.

Meanwhile, Asendorf says the American Soybean Association will insist U.S. customs officials uphold stated specifications

regarding refunds of any duties to U.S. oil importers. Furthermore, "ASA will work aggressively to ensure U.S. soybean farmers have an equal opportunity to compete for domestic and world markets and to provide opportunities for profit," says Asendorf.

Fast track to egg cost reduction

Chore Time's MEALMASTER FeedKar traveling feeder can help you get your egg costs on track. Here's how:

1. The typical chain feeder uses 1 1/2 hp to feed each cage tier — 6 hp for a 4 high. Our hopper system traveling on tracks is pulled by a cable using only 1/2 hp — a 95% energy reduction!
2. Cuts feeder maintenance and labor costs to virtually zero. You know what a chain feeder costs to maintain!
3. Evens out egg production from

one end of the row to the other — birds at the front can't "highgrade" the feed.

We'd like to talk to you about the other ways the nearly 200 feeders we've sold are helping owners. Our FeedKar is now standard on all Chore Time brood grow and layer cages, our famous shallow PYRAMID and new deep PYRAMID, our 3 and 4 high SSS.

Find out more about the FeedKar — plus our line of cage systems and the Chore Time total package of feed bins, auger, ventilation and waterers.

UCC meeting to discuss farm crisis

AMES, IA — Support for immediate measures "to address the imminent bankruptcy of farm families" and to offer them "a second chance at productive farming" will be discussed by the Fifteenth General Synod of the 1.7 million member United Church of Christ when it meets here June 27-July 2.

Another highlight of the biennial decision-making meeting will be a presentation on the farm crisis by the two Iowa Senators to be held during a tailgate picnic at 1 p.m. on Sunday, June 30.

Development by the U.S. Government of policies "designed to stabilize agricultural prices and farm income" so that those who farm the land get "a fair return" is urged in a proposed policy statement submitted by the United Church's Wisconsin Conference for consideration by the 700-plus delegates at the Synod.

The pronouncement calls on all parts of the church to encourage long-term farm programs instead of the recent "dangerous boom-bust sequence," to press for the removal from production of land that is threatened by erosion, to back creation of new family farms and to work for the elimination of policies that "make attractive the exploitation of human and natural resources" or "favor investments in farm land by high-income individuals and those who do not depend on farming for their living."

Purpose of the recommendations, the paper explains, "is to affirm the biblical vision of the just use and care of the land." To ensure such stewardship, its authors claim, a public response is needed that stresses:

- widespread ownership of farm land "to assure a democratic character to rural communities as well as vigorous use of agricultural resources;
- the ability of farmers "to earn a decent living" and the discouragement of farmland ownership "for speculative purposes," and
- the recognition that protection of natural resources is both "a legitimate public policy objective and a responsibility of land ownership" and that soil conservation should be practiced by farmers and supported by the public.

Penn State prof lectures, writes

UNIVERSITY PARK — Dr. Stephen B. Spencer, professor of dairy science extension at The Pennsylvania State University, spoke at the Large Herds Conference in New Plymouth, New Zealand, June 16. His talk, "Dairy Farming in the United States," focused on the use of computers in dairy farming including computer systems, which automatically identify specific dairy cattle and register their feeding and milking information.

He also presented two papers at the 80th annual meeting of the American Dairy Science Association at the University of Illinois, Champaign-Urbana in early June. "Slip Characteristics of Milk Machine Liners", co-authored by J. O'Shea and E. O'Callaghan, and "Measuring Milking Machine Liner Characteristics", co-authored by E. O'Callaghan, were based on Spencer's research while on sabbatical last year at the Agricultural Institute, Moorepark Research Centre, Fermoy in County Cork, Ireland. Co-authors are members of the Institute.

Current conditions reflect a "collapse" in the traditional covenant "between people and the land and between farm families and the rest of society," the pronouncement asserts. It blames "an exaggerated emphasis on production without concern for the social use of the product or the welfare of those who produce it" for "punishing the North American farmer."

The crisis came about partly because there was a brief period in the 1970's when it looked like there would be strong demand for U.S. export crops and especially grain, the paper reports. Farmers planned for this and instead were hit with declining prices, rising costs and heavy debts.

The results were frequent bankruptcy, the loss of many family farms and the collapse of many small businesses to which the failing farmers were indebted. Threats to the land itself by erosion and dangerous pesticides and chemicals have added to the problem, the paper charges.

In addition to voting on the farm crisis pronouncement, delegates will hear presentations at the Synod which take advantage of its placement in the heart of rural America.

Sponsored by the denomination's Iowa Conference, the discussion between Senators Tom Harkin (D) and Charles Grassley (R) will look at the current situation faced by family farmers, what short-term

help they can get and what long-range answers each would recommend. Farmers from across the state have been invited to attend the event, which will take place in the South parking Lot of Iowa State Center.

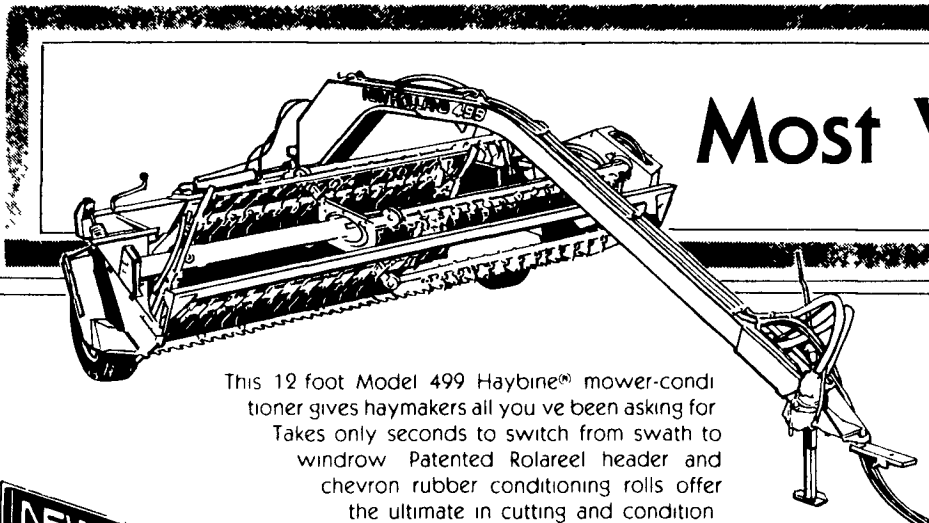

At 2 p.m. on Friday, June 28, the Rev. David L. Ostendorf, executive director of Prairiefire Rural Action, Des Moines, will speak on family farm and rural life issues and what they mean to the church. Mr. Ostendorf, a United Church of Christ minister, served as consultant to the movie "Country."

At 5 p.m. that same day, a forum will be sponsored by the United Church Board for Homeland Ministries, which has endorsed the

pronouncement and has been long active around farm questions and programs. Its presentation will feature talks by Warren J. Kreml, acting conference minister for the denomination's Nebraska Conference, on the church's response to the farm crisis; Mr. Ostendorf on organizing farmers; a farmer, and a person presenting a global perspective on food production and distribution. It will be repeated at 6 p.m.

On Monday, July 1, at 12:15 p.m., a panel on farm women will be offered by the denomination's Coordinating Center for Women in Church and Society, including farm crisis activists, a local home extension service advisor and a farm wife from Illinois.

USDA seeks wheat quota comments from public

WASHINGTON — The U.S. Department of Agriculture is seeking public comments on proposed provisions of the 1986 Wheat Marketing Quota Program. The program sets price supports, acreage and marketing quotas for wheat producers in years when an excess wheat crop is expected.

To become effective, marketing quotas must be approved in a referendum by two-thirds or more of the eligible wheat producers.

Everett Rank, administrator of USDA's Agricultural Stabilization and Conservation Service, said the public comments will be used to finalize program provisions for the wheat producers' referendum scheduled for July 19-26.

Producers voting in the

referendum, Rank said, will be choosing the type of program they want in effect for the 1986 wheat crop. If two-thirds or more of the voters favor marketing quotas, basic program provisions would include mandatory acreage controls and penalties for overplanting; a three-tier price support system ranging up to 90 percent of parity (the June 1985 parity price for wheat is \$7.09 per bushel); a domestic and export certificate program financed by processors and exporters; and a mandatory unpaid land diversion program.

If one-third or more of the referendum voters opposes marketing quotas, basic program provisions would include no acreage controls or penalties for

overplanting; a price support loan program set at 50 percent of parity for cooperators (price support may be extended to noncooperators); no domestic or certificate program; and no land diversion program.

Rank said that USDA wants comments on the following aspects of the program:

- eligibility requirements for voters in the producer referendum;
- method of balloting employed in the producer referendum;
- diverted acreage requirements and uses if the marketing quotas are approved by referendum;
- levels of price support for cooperating and noncooperating producers if marketing quotas are

approved by referendum;

- levels of price support for cooperating and noncooperating producers if marketing quotas are disapproved by referendum.

Comments must be received no later than July 5 by the Director, Commodity Analysis Division,

USDA-ASCS, Room 3741-S, P.O. Box 2415, Washington, D.C. 20250. A regulatory impact statement on the 1986 Wheat Marketing Quota Program that covers the options considered may be obtained by writing to the same address or calling (202) 447-3391.

WESTFALIA HIGH TECH DAIRYING[®] CODATRON

Individualized computer feeding system

To be successful in dairying today, you know how important it is to be in complete control of your feeding program and to have all the information possible on each and every cow. That's why Westfalia has developed the Codatron Individualized computer feeding system. With Codatron, milk production and profits can be maximized while minimizing health problems thanks to an early warning system. And unlike many other units, Codatron is an expandable system that won't become obsolete.

The feeding system is quality built and basically fool proof and automatic. You'll have dairy reports of herd conditions and performance. Ration adjustments can be made quickly and easily. You'll be alerted to problem cows fast.

The Codatron is available in two basic models. The F 26 with feeding capabilities to 999 cows up to 26 feeders, double ration capability with dairy consumption reports. The Model L offers feeding plus breeding management capabilities.

And that's not all. Westfalia's Codatron is designed for expansion into parlor data milk functions and home computer interfacing. Watch for new breakthroughs to be introduced soon!

Contact your Westfalia Sales Center today. Find out why Westfalia is truly the leader in high tech dairy equipment.

At Penn State's Crops Day, farmers see how to Get more mileage from manure

BY JACK HUBLEY

LANDISVILLE — The Chesapeake has a friend in Pennsylvania. His name is Dr. Les Lanyon, associate professor of soil fertility at Penn State. And Lanyon feels there's a better way to handle the state's bumper crop of manure.

As concern mounts over the excess nitrate load being dumped into much of the state's ground-

water supplies, and ultimately the Bay, researchers are taking a hard look at how to deal with the problem. The source of those excess nitrates is Pennsylvania's abundant supply of livestock that manufactures manure faster than croplands can assimilate it.

But Lanyon points out that the manure problem is related to distribution rather than over-

supply. "The movement of nitrates out of a unit area of soil is proportional to the amount applied," he says. So by distributing the supply evenly, rather than assaulting selected areas with back-breaking applications, more crops will have the opportunity to consume valuable nutrients. Result: less overflow available to leak into water supplies.

"What we're trying to come up with are crops other than corn to apply nitrogen to," says Lanyon. Accordingly, the agronomist's research is exploring the application of N to alfalfa/grass mixtures, perennial grasses and annual grass systems.

Traditionally, farmers have avoided applying manure to alfalfa fields for a number of reasons, Lanyon notes. Manure not only adds weed seeds to the stand, but also fertilizes the weeds, increasing competition within the stand. Spreading manure also results in a mechanical blocking, or smothering of alfalfa plants, says the agronomist.

"But we have to look at what makes the whole farm go around," says Lanyon, pointing out that farmers faced with the options of over-applying their manure to corn, or applying the correct amount to corn and some to their

Entomologist Dr. Art Hower discusses forage insects with farmers at Penn State's Crops Day held at the Southeastern Field Research Lab on Tuesday.

alfalfa fields may find this latter strategy to be the lesser of two evils.

In his plots combining grasses with alfalfa, Lanyon chose three grass varieties known to possess varying degrees of competitiveness. Orchardgrass was chosen as the most aggressive grass, with tall fescue coming in second, and ryegrass being the least competitive with alfalfa.

Nitrogen is applied on the test plots between cuttings. "We're hoping that by having the grass in

there, it will occupy the space where weeds would normally grow," says Lanyon. "The grass may not actually help boost the quality of the stand, but it may help the alfalfa dry after cutting, and help the farmer get it into the barn faster."

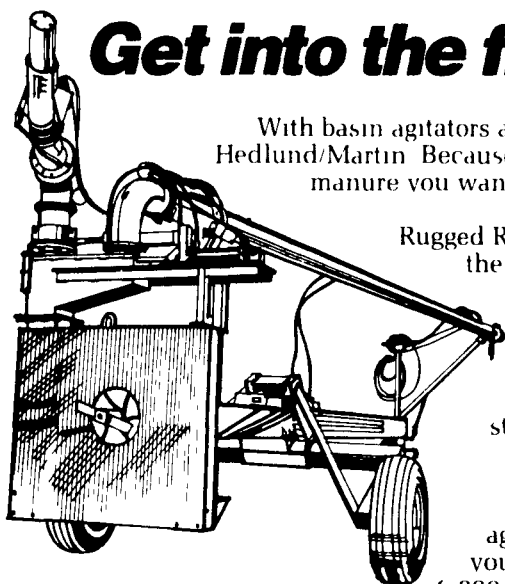

In experiments involving annual grasses, Lanyon is looking at three crop combinations including rye/oats/millet, rye/corn and rye/sorghum-sudangrass. In the rye/oats/millet trial, rye is sown in

(Turn to Page A37)

Dr. Les Lanyon examines a stand of alfalfa and orchardgrass seeded last August.

Get into the field faster!

With basin agitators and basin agitator pumps from Hedlund/Martin. Because when you're ready to spread manure you want to get the job done—without wasting time and money.

Rugged Roto-beater works fast to blend the most unmanageable pit into a smooth, pump-ready slurry.

Sturdy 4" square tube steel mainframe features 1/4" arch support rod for extra rigidity.

Screw-type adjustment and strong support stand keep prop firm and steady—aimed right where you want it.

Or back the Model 280 basin agitator pump into your pit and you're ready to mix or load up to 6,000 gallons a minute. Extra-heavy impeller blades generate forceful pumping or agitating action. And hydraulic controls give you complete fingertip control.

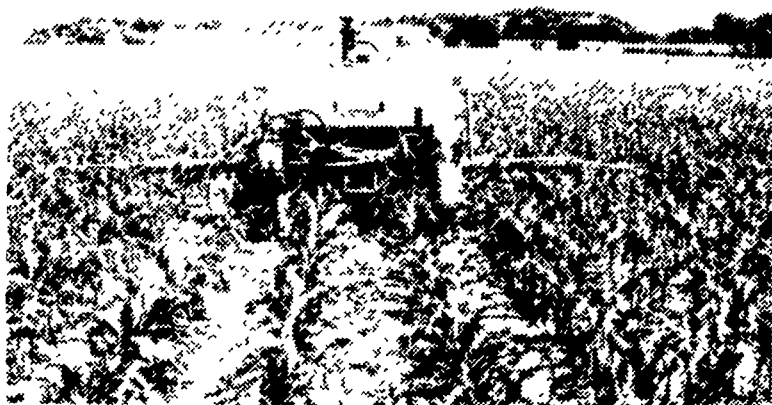

Contact your local Hedlund/Martin dealer for the manure handling equipment designed to help you spread manure when you want it.

AJCC National Heifer Sale benefits youth and research

BY ROBIN PHILLIPS
Staff Correspondent

QUARRYVILLE — She was only a February calf and one of the youngest in the sale. And her pedigree, featuring a young sire, was far from the best in the sale.

But W.F. Tycoon Alicia made the 28th Annual National Heifer Sale of The American Jersey Cattle Club go down in history as honoring retiring Jersey leader, J.F. "Jim" Cavanaugh.

Held on Tuesday, June 18, at the Solanco Fairgrounds, the National Heifer Sale displayed 50 of the top heifers from across the United States.

Although falling short by two places of topping the sale, W.F.

Tycoon Alicia was the "tool" for the donation of several thousand dollars to the A.J.C.C. Youth Program, for which the sale is held, and to the J.F. Cavanaugh Research Fund, recently started to honor the retiring leader of the A.J.C.C., Executive Secretary J.F. Cavanaugh.

W.F. Tycoon Alicia was originally purchased in the 6th Waverly Farm Invitational Sale, held in April. At that sale, Waverly Farm and the Robert Stiles family donated the proceeds to the Cavanaugh Research Fund. The calf was purchased by Cavanaugh's co-workers, who consigned her to this national sale

with 90 percent of the proceeds to go to the research fund and 10 percent to the A.J.C.C. Youth Program.

The heifer, a daughter of young sire Tansys Samson Tycoon and a two-year-old Black Magic daughter, delayed the start of the bidding on the other consignments.

In the ring for quite some time, W.F. Tycoon Alicia was sold for \$1050 to Dr. J.J. Malnati, Newberry, S.C., but before she could leave the ring, "resell" was heard as Malnati donated his purchase to the fund. Sold again for \$1025 to former A.J.C.C. president W. Charles McGinnis, of White Plains Ranch, S.C., the cry of "resell" was heard again.

The third selling price came to \$1000 as the Ed Crotty Syndicate, of New Jersey, continued the bidding. "Resell" was heard again and W.F. Tycoon Alicia went on to be purchased for \$600 by Neal Sanford, of Michigan, who also donated his purchase.

The final sale came on the \$500 bid of Bob Lord and Tussy Wright, Woodstock, Vt. Anxious to get on with sale, Lord shouted to the audience that bidding on this heifer could be continued at the Vermont Sale, to be held later this year.

The final bid brought the proceeds of the donation to \$4175.

Topping the sale on the bid of \$5000, was an April heifer consigned by Waverly Farm, Clearbrook, Va.

W.F. Brass Julia was by A-Nine Top Brass and Magic Julia of W.F., a Quicksilvers Magic of Ogston daughter. She was purchased by Jack Bishop, of Ogston Farm, Columbus, Ohio.

And for \$4200, a July heifer consigned by William Diley and

W.F. Brass Julia topped the Jersey heifer sale at \$5000. From left are: Ken Stiles, Ryan Stiles, Deborah Stiles-Callison, Tracy Stiles, and Brendon Stiles, all of Waverly Farm, the calf's consignor; Stephen Bishop and Robert Bishop, buyers; and at the halter is Jim Hardy.

Calvin Watson, left, purchased this July heifer for \$4200 from Mr. and Mrs. William Diley and their son, Bill.

Son, Canal Winchester, Ohio, became the second highest offering of the day.

Brass Pansy Saint Barb featured A-Nine Top Brass as her sire and the great Basil Lucy Minnie Pansy, all-time lifetime milk production champion of the Jersey breed, as her granddam. The heifer sold to Calvin and Judy Watson, of Troy.

The sale average was \$1740 on the 50 animals sold.

Other high sellers included:
•For \$3600, Margandale Brass

Amazing, a Top Brass by a Samson, consigned by Dale Kaufman, of Shreve, Ohio, and purchased by Mountain Shadow Dairies, of Arizona.

•For \$2800, Fascinator Rasia of Sunset Ridge, a Fascinator by an Empire State, consigned by Brian Harris, Milan, and sold to D and C Jerseys, of Nevada.

•For \$2750, Wilderness Soldier Boy Virtue-ET, a Soldier Boy by a Samson, consigned by Robert and Helene Dreisbach, of Hamburg, and sold to C.L. Collins Jr of Alabama.

Crops Day

(Continued from Page A34)

the fall and N is added. In late April the rye is harvested, oats are planted, and N is applied again. In mid-June, the oats are harvested for forage, millet is planted and once again N is applied. In mid-August, and again around the end of September, the millet is harvested, with nitrogen added after each harvest. Rye goes in following the September harvest.

This schedule gives the farmer five opportunities to apply nitrogen—in the form of manure—to his fields, Lanyon points out. Such a system could prove very attractive to the farmer with minimal storage capacity or not enough corn acreage to handle the manure output.

In trials involving pure stands of perennial grasses, Lanyon selected orchardgrass, reed canarygrass and a new variety of timothy with a low alkaloid content. Nitrogen is applied in the spring and following each cutting, providing at least three opportunities, and in some cases four, for N application.

Though Lanyon's grass systems don't produce enough protein for the lactating dairy cow, they do offer several advantages, he points out. In addition to creating new outlets for manure, the forages themselves provide good roughage for the non-lactating animals. And with their lower calcium levels, the forages reduce some of the potential for milk fever when cows freshen.

Farmers who feed poor quality alfalfa to their dry cows and heifers are making a mistake, says Lanyon. "It's like trying to raise your kids on junk food," he observes, adding that feeding good quality grass is the smarter way to go. "And if you give them good quality alfalfa, you're giving them

Holstein Convention

(Continued from Page A1)

Genetic Progress Sale at the Eastern States Fairgrounds at West Springfield, MA, promises a sale extravaganza offering some of the nation's best genetic bloodlines.

Leading the Pennsylvania delegation are national director John Cope, of Grantham, and state president Sam Minor, Washington.

more nutrients than they need," he says. "It's like eating steak and potatoes three times a day."

Dr. Lanyon's research was highlighted at Penn State's Crops Day at their Southeastern Field Research Lab in Landisville. In addition to Dr. Lanyon, 13 other Penn State plant and soil scientists were on hand to review their work with some 150 farmers in attendance.

Also featured was a computer program designed to fine-tune manure application to cropland. Demonstrated by agronomist Douglas Beegle and Extension manure management specialist Mitch Woodward, the program utilizes manure analyses, soil test information and crop requirement to pinpoint nutrient excesses and deficiencies.

The program is currently in use in about 25 county Extension offices.

The day's activities were well received by the farming community, according to host John Yocum, the laboratory's senior research associate, who reported a 50 percent increase over last year's attendance.

Among the Pennsylvania headliners at the convention is a junior delegation which includes two national distinguished junior member finalists and the state's Dairy Quiz Bowl team from Perry County.

Up for consideration in the national junior distinguished member finals are Kim Kriebel and Brian Kelly. Kim, 20, is the daughter of Richard and Gail Kriebel, Millerstown R1. She's a Penn State student in the Dairy Science department. Brian, 20, is the son of Tom and Peg Kelly, T3, one R1. A student at Virginia Polytechnic Institute, he plans a career as a veterinarian.

Pennsylvania's Dairy Quiz Bowl team is scheduled for preliminary competition at the Hartford Sheraton on Tuesday morning. Members of this winning team from Perry County are Danny Albright, and sisters Kim, Judith and Jennifer Kriebel, coached by Jane Benner.

Finals for the Quiz Bowl contest are scheduled for the Wednesday morning general session at the Hilton Hotel convention headquarters. Pennsylvania juniors will join other youth members from across the country for an awards luncheon following the Quiz Bowl finals.

Two by-laws amendments will come up for a vote by the delegates at the Wednesday business session. One would change the present junior membership, which requires the ownership of at least one animal, and allow any interested individual under the age of 21 to belong to the Junior Holstein Association.

A second amendment would alter current limited five-year memberships to yearly ones, with an annual fee of \$15.

Delegates will elect a new president to succeed David Smokler of Texas, and a new vice-president succeeding M. Duane green of Michigan. Four directorships on the national board are up for delegate consideration as

well.

The Holstein Association was organized in 1885, with 284 members, after a daring and forward-looking group of investors brought the then-exotic cattle to the U.S. from Holland. Today, there are an estimated ten million head of Holsteins in the United States, and over 54,000 members of the National Holstein Association.

NEDCO failure could cost \$10 million

(Continued from Page A1)

Dairyalea also offered to help NEDCO members apply for Production Credit loans up to the amount of the milk checks owed by the failed co-op. Eastern Milk Producers Cooperative also has reportedly made a similar offer to NEDCO members.

Snow said Dairyalea did not undertake the effort in order to obtain new markets or sign up new members. The organization simply wished to extend some help and offer NEDCO producers an outlet for their milk, without costing Dairyalea members any money.

The arrangement, he noted, is short-term, and should be used by producers only until they find another outlet for their product, either by signing up with Dairyalea or another source.

Many of the former NEDCO members already have found a new marketing organization, officials noted. Several large NEDCO affiliates had been shipping direct to New York handlers for some time, they said.

The Federal Order No. 2 office already has noted the negative impact of the NEDCO failure on milk producers throughout the area.

All Order 2 producers lost five cents a hundredweight in May, because of NEDCO's failure to pay

its \$520,276 share of the Producer Settlement Fund for April. As the payment is recovered, however, the money will be returned through increases in the uniform price over the next few months.

Dairymen who lose money in the NEDCO failure will not be eligible to collect from the New York and Pennsylvania milk producers security fund, since those organizations are designed to insure against failure of handlers, not co-op groups, officials said.

Although not willing to categorize NEDCO's status at this time, Ron Pierce of the New York State Department of Agriculture and Markets invited observers to draw their own conclusions, noting, "They're not marketing any milk at this time. And I guess that's why co-ops exist."

Pierce said the department has not completed its investigation into reports that fluid milk was being sold illegally at a price below cost.

Lancaster Farming reported several weeks ago that the department had subpoenaed the records of several dairy organizations, including NEDCO, as part of the investigation.

Editor's Note: Lackawanna County extension director Tom Jurchak discusses the Nedco situation in his column, "The Milk Check," which appears in today's edition on page C8.

Pa. FFA'ers elect state officers at annual convention

BY SALLY DUNMIRE

Staff Correspondent

UNIVERSITY PARK — Over 1,800 young men and women from high schools across the state met at the Pennsylvania State University's main campus June 18 to 20 for the 39th Annual Pennsylvania FFA Convention.

During the three-day event the FFA students elected new state officers to represent them in the coming year. Two Lancaster County teens are on that slate of officers, including president, Julie Hess of New Holland and vice-president, Eastern Region, Barry Harnish from Lampeter Strasburg High School.

Other state officers are vice president, Charles Kline, Elco; vice president, North Central Region, William Hoffman, State College; vice president, South Central Region, Bruce Lemmon Jr., Big Spring; vice president, Western Region, Marlene Burdick, Grove City; treasurer, Jonathan Merkle, State College; secretary, Ann Lansberry, Cedar Crest; reporter, Eric Shipley, Brothers Valley; and chaplain, Kevin Blöse, Lehigh County AVTS.

The convention also offered students the opportunity for education, participation in state association policy making and a chance to display their agricultural skills.

First on the agenda was a written exam for each agricultural competition to test the contestants' "book" expertise. These tests are developed by Penn State professors and FFA teacher advisors.

Next came the "hands on" part. For example, in the dairy showing competition, competitors are assigned a cow from Penn State's dairy barns and then have an opportunity to display their cattle showing ability. The luck of the draw prevails, but according to FFA student Jeff Stoltzfus, all the cows are "well seasoned and accustomed to the show ring."

Each of the award winners, listed below, will go on to the Northeastern Regional FFA Convention in September at Springfield, Mass. and/or the National FFA Convention in November. All state award winners win an all-expense paid trip to the national competition.

National FFA president Steve Meredith made a special trip from Blendale, Ky., to address the convention goers, and to teach a leadership seminar.

Educational highlights of the convention included a dairy farm tour to "Lonely Spot Farm" courtesy of farm owner and master farmer Joe Hartle.

For the sportsmen in the group, the convention offered trout fly fishing at Fisherman's Paradise on Spring Creek with fly fishing expert Joe Humphries, a tour of the Pleasant Gap fish hatchery, and a visit to the Penn State deer pens, forestry and fisheries labs and research facilities.

For students interested in technology, Glyn Boone conducted a session on the application of the microcomputer on the farm. Tapping into Ag Network for current prices or learning to put herd records on floppy discs were the order of the day.

The fine points of fitting and showing beef cattle were demonstrated for future showman bent on blue ribbons by Penn State Beef Research herdsman, Don Nichols.

Finally, the convention offered a campus walking tour, a leadership seminar, and a chance to talk with former FFA officers who have travelled overseas.

In addition to all the hard work the FFA'ers put in during their convention, they also enjoyed playing softball, bowling, swimming, practicing on the rifle range,

Pennfield breaks ground

Officials of Pennfield Corporation, headquartered in Rohrerstown, joined Mount Joy officials on Wednesday in a formal groundbreaking ceremony for their new \$8 million feed mill in Mount Joy Industrial Park.

Pictured are (left) Lester L. Murray, vice president of Sprout-Waldron, builders of the mill; Ernest O. Horn Jr., president of Pennfield; and Donald Zeller, Mount Joy Borough Council president.

The proposed 28,000-square-foot mill is described by its builders as "the most modern feed mill in the country." All processes in the plant are completely computerized, and equipment and control systems are engineered to readily accept all feed formulation improvements as soon as they become available.

The Mount Joy mill will boost Pennfield's feed manufacturing capacity to 800,000 tons a year.

Maryland grain producers to hold annual meeting

ANNAPOLIS, Md. — The Maryland Grain Producers Association will hold its eighth annual meeting on July 25th at the Queen Anne's County 4-H Park near Centreville.

According to MGPA president R. Allen Davis, a trio of timely speakers has been lined up to share their insights into major concerns of Maryland grain producers.

On hand to address the meeting will be Varel Bailey of Iowa who is president of the National Corn Growers Association; Judge Solomon Liss, Chairman of the Maryland Critical Areas Commission; and Dr. John Marten, staff economist of "Farm Journal" magazine.

Wayne A. Cawley, Jr., Maryland Secretary of Agriculture says, "this should be a must meeting for all grain producers. The crop of

speakers they have lined up this year is first-rate."

Dr. Marten returns by popular demand as his remarks to an earlier session of MGPA proved most enlightening according to program chairman Robert Hutchison.

Schedule for the day has registration, testing of grain moisture meters and exhibits from 10 A.M. to noon, ceremonies recognizing yield winners and opening remarks from 1 P.M. to 1:30.

Tickets are available at the gate at \$5 each the day of the meeting. Additional information may be obtained by calling: Donald Lippy (Western Shore 239-3950) or Ken Fry (Eastern Shore 778-5255).

The Queen Anne's County 4-H Park is located south of Centreville on Route 18.

GOATS 23: Large 28.00-43.00, Small to Medium 22.00-27.00.

St. Louis Feeder Cattle

Thursday, June 20

Report supplied by USDA

FEEDERS: (Including around 700 at the regular Thursday auction.) Feeder steers under 800 lbs. and feeder heifers under 700 lbs.

Tonya Johnson, center, was crowned 1985 Lebanon County dairy princess Saturday evening. With her are 1984 dairy princess Ellen Hanson, left, and alternate princess Beth Nolt.

Tonya Johnson crowned Lebanon dairy princess

LEBANON — Seventeen-year-old Tonya Johnson of Spruce Park was named 1985 Lebanon County dairy princess Saturday evening at the Annville Elementary School.

Tonya, the daughter of Mrs. Jane Showers, will be a senior at Cedar Crest High School. Tonya is Lebanon's first dairy princess not raised on a farm. Her interest in dairying has stemmed from her employment with county dairyman I. Hershey Bare.

The recipient of an FFA chain calf, Tonya owns two Holstein animals that are her 4-H and FFA projects. She plans to attend Cobleskill Agriculture College in New York after graduation.

Other contestants competing in the pageant were Janelle Martin, Myerstown; Beth Nolt, Lebanon; and Debra Shuey, Jonestown. Beth Nolt was named alternate princess.

Judging for the contest began Saturday afternoon at the Old Annville Inn, where each girl was interviewed by a panel of three judges. During the program, each contestant gave a short presentation promoting milk. Tonya chose to do a monologue with her pet cow Mabel.

Judges for the competition were Susan Howes, advertising consultant, Elizabethtown; Annabel Melits, retired home economics teacher, Myerstown; and Dr. George Merrill, veterinarian, Bernville.

Ellen Hanson, outgoing dairy princess, talked about her rewarding year representing the dairy industry. She received an engraved pewter pitcher from the Milk Promotion Committee.

The evening's activities concluded with a "make-your-own" sundae bar.

firm; Heavier cattle weak, all in a light test. Supplies light to moderate, mainly mixed 1-2 muscled lots, holstein steers, and feeder bulls.

FEEDER STEERS: Medium and large frame 1: Few lots 300-600 lbs. 68.00; two lots 600-800 lbs. 62.00-66.00 Two lots 800-900 lbs. 55.00-56.00.

Medium and large frame 1-2. 450-650 lbs. 60.00-62.50. Small frame 1-2; few 400-500 lbs. 55.00-64.00. Few fleshy 650-750 lbs 49.00-52.00.

Large frame No. 2 Holsteins.

700-800 lbs. 47.00-50.50; 900-1150 lbs. 43.00-45.00.

FEEDER BULLS: Medium and large frame 1-2: 300-600 lbs. 60.00-65.50; 600-800 lbs. 54.00-55.00.

FEEDER HEIFERS: Medium and large frame 1: Few 300-400 lbs. 60.00-62.00; 400-500 lbs. 56.00-61.50; few 500-600 lbs. 55.00-58.00, one lot 61.75; 650-750 lbs. 51.00-56.00.

Medium and large frame 1-2: 300-400 lbs. 59.00-61.00; 400-500 lbs. 56.00-59.00; 500-600 lbs. 50.00-55.00.

Small frame 1-2: Fleshy 650-800 lbs. 47.00-50.00.

LAYER CONTRACTS

I have urgent need for two cage layer houses, 15,000 to 20,000 size, open for birds July through September. Must have good building, equipment, and management.

BEST IN DESIGN, PRICE AND EXPERIENCE

Schaefferstown continues community celebrations with Cherry Fair

BY SALLY BAIR
Staff Correspondent

SCHAEFFERSTOWN — Today is a day when residents of the Lebanon County community of Schaefferstown will relive an earlier tradition - a community celebration.

In recognition of a by-gone era when community residents held get togethers just for the fun of it, Historic Schaefferstown sponsors a Cherry Fair annually. All activities take place near the square and there is no charge.

Carol Ulrich, first vice-president of Historic Schaefferstown and official ice cream maker for the Cherry Fair, says, "This is the only thing we have when the public doesn't have to pay admission. This is for the town and it's free to the public."

Everything at the festival has a cherry theme — from the craft-

smen who will be demonstrating and selling their wares to the food that will be sold.

Carol explained, "Cherry is popular in folk art. There will be about 15 craftspeople set up between the bank and the museum." The woodworkers will even be using cherry wood.

Perhaps the biggest drawing card for the Fair is the variety of cherry foods which will be offered for sale. There will be cherry sodas, cherry pies, cherry fritters and cherry dumplings. But the biggest treat of all may be the cherry ice cream, and it is the one food for which there is no charge. Carol says they always just have a box for donations for the ice cream.

She estimates that more than 100 pounds of cherries will be used in the foods being prepared. She uses 40 pounds just for the ice cream.

To ensure a good supply to meet the demand, those in charge usually pick the cherries in the weeks ahead of the fair and freeze them. Rather apologetically she says they are picked in Lancaster County because the cherries there usually come earlier than Lebanon County cherries.

Carol says she prepares all the cherries for the ice cream, pitting and freezing them, adding, "My fingers get all black."

She freezes the cherries whole, but puts them through a food grinder the day of the fair.

The recipe for this famous ice cream can be found on page B6.

Carol is planning to make about 100 gallons of the cherry ice cream, and it will all be prepared in hand-crank ice cream freezers. Carol says, "We usually crank all day, and we have four men who work with us." They use four-and six-quart freezers, gathering up as many freezers as they can.

They use hand-crank freezers, she explains, "Because ice cream tastes better in a hand-crank freezer. It wouldn't be authentic otherwise."

Carol says, "It gets really furious. I try to fill all my freezers by 10 a.m. Once they are all filled I can relax a little."

She says the ice cream is served directly from the freezers, and when a freezer is emptied, it is refilled and cranked again. It will be her job to make sure that the proper paddles get with the correct freezer. When the paddles are mixed, the ice cream cannot be frozen. The fair draws about 1,000 people, Carol said.

Being a part of the Cherry Fair is a tradition with Carol, who got involved with Historic Schaefferstown during the Bicentennial year. "Because I got involved, they said, 'Won't you help us with the ice cream?'" It has since become a labor of love.

She is now in charge of the house on the Alexander Schaeffer farm, and organizes both the tour guides and those who do the cooking on the hearth and in the bake oven. She explains that the original house was built in 1736 but the "modern" kitchen was installed in 1771. It was considered modern because the entire bake oven is inside.

The original kitchen was in the basement, but they wanted to use the basement to distill liquor; hence the "modern" kitchen improvements. "It is a beautiful kitchen," Carol says.

Cooking on the hearth requires some practice, and volunteers make such tasty items as beef pot pie from scratch, mush, apple

Colin Gillen, 6, takes a turn at cranking the ice cream freezer in preparation for the big day. Colin is Carol's nephew and he enjoys getting ready for the festivities.

fritters and sauerkraut with bacon.

The bake oven offers its own challenges, and when there is bread to be baked, Carol must get there early in the morning to start the fire. The fire burns until the oven is the proper temperature, then it is scraped out, and the bread is baked in the residual heat. Carol said they always bake whole wheat bread in the oven. She made it clear that it doesn't take any longer to actually bake the bread — the extra time comes in getting the oven hot. It takes four hours for it to reach the proper temperature. "I feed it for two hours to get the bricks hot enough."

An elementary school teacher at Schaefferstown Elementary, Carol enjoys living in the community in which she grew up. She resides on the family homestead just outside of Schaefferstown which is now operated as a farm market by her sister and her husband.

Ulrich notes that her grandmother was "one of the first people in town. My roots are pretty deep. Schaefferstown is unique with all its open spaces." The history of the town is not lost on her. In fact, she was a history and political science major in college, and also got education credits. When she got her first job in education she says, "I fell in love with it."

She admits to being "pretty much of a workaholic," adding, "When you're closed in a classroom you forget about the world outside."

On sabbatical leave last year, she continued her interest in history, and traveled to many local historical sites. She also added to

her knowledge of the local area by spending time with her brother who sold hay at Good's Auction and the New Holland Auction. "I thoroughly enjoyed it. There is so much going on."

She is especially happy to have been brought up on a farm, adding that she still feels it is the best way to raise children. "Farm families give so much to the family. I still encourage all families to do things with the earth. Seeing things grow and seeing them die is important. It helps children get a better feel for self, and it helps build their self-esteem and self respect."

Other advice she gives to parents includes, "Take time with children. Do things that are fun, and that aren't pressured. We did things as a family. We worked, but we also played."

In addition to her work at the Historical Museum, Carol is president of the Friends of the Whitmoyer Community Library at Meyerstown and is president of Delta Kappa Gamma, an organization of women educators.

The Cherry Fair will offer something of interest to everyone. A feature will be the chancing of several fine locally made hand-crafts. One is a counted cross stitch cherry pie, done by Carol; another is a basket woven by noted weaver Bill Leinbach. And a special prize will be a quilt done in a cherry design, with the work donated by members of the Lebanon Quilters Guild.

For members of the community, the fair will be a nostalgic return to simpler times; for others it is an opportunity to share those pleasures.

Carol Ulrich is in charge of making the cherry ice cream which will be offered to hungry visitors during the Cherry Fair. Forty pounds of cherries are used in the ice cream, which is all frozen in a hand-crank ice cream freezer.

Cherries, cherries and more cherries will be seen throughout the center of Schaefferstown during the Cherry Fair. This wonderful fresh fruit will be found in many different kinds of food.

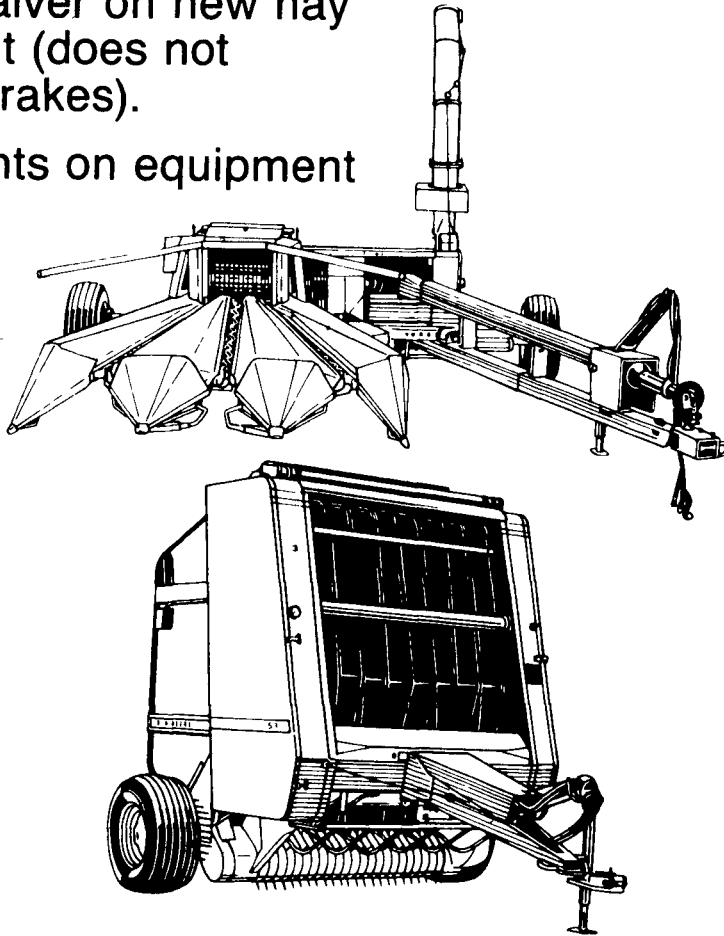

Homestead Notes

Interest-Free Until October 1

**Extended waiver lets you save even more
on John Deere Hay and Forage Tools**

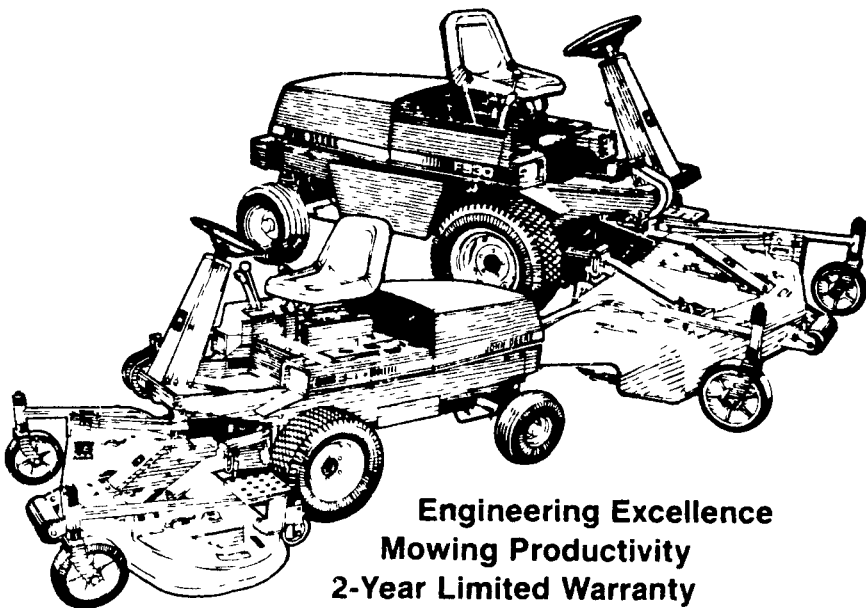

- Now's the time to save big on new and used hay and forage equipment.
- Interest-free financing* until October 1, 1985, on hay and forage equipment (new and used).
- Discount in lieu of waiver on new hay and forage equipment (does not include mowers and rakes).
- Big customer discounts on equipment shown below.

JOHN DEERE FRONT MOWERS

**Engineering Excellence
Mowing Productivity
2-Year Limited Warranty**

When mowing productivity really counts count on a John Deere Front Mower. The F910 and F930 Front Mowers were designed from the ground up to be productive, versatile and durable mowing machines. Both are powered by reliable twin cylinder air cooled Onan engines - 20 hp on the F910, 24 hp on the F930. The F910 can be equipped with a 50 or 60 inch mower, the F930 with a 60 or 72 inch mower. All three

mowers feature adjustable mowing height, PTO shaft drive and deep contour deck design. Both the F910 and F930 have hydrostatic drive and power steering for easy operation and close quarters maneuverability. And both are backed by a new 2 year limited warranty and our local parts and service support. See us soon for a test drive.

Food Alert

An old method of caramelizing sweetened condensed milk to make caramel pudding is experiencing a new surge of attention. This potentially dangerous method calls for heating an unopened 14-ounce can of sweetened condensed milk in the oven or in a kettle of boiling water. Borden, Inc., the leading manufacturer of the product, reports that this method of caramelization may cause injury and should not be used.

Because heat causes expansion, if any unopened can of food (no matter what the contents) is heated in boiling water, in an oven, in an electric cooker or over a flame, the can could explode. Serious injury to anyone nearby could result. Each can of Eagle Brand Sweetened Condensed Milk is labeled with a caution that says "Never heat unopened can."

To prepare the delicious and well-known caramel pudding easily and safely, simply follow these simple instructions. Oven Method: Preheat the oven to 425°F. Open one 14-ounce can of sweetened condensed milk and pour contents into a glass pie plate. Cover with aluminum foil; place in

a shallow pan of hot water and bake for one to one and one-half hours, or until thick and light caramel-colored. Remove the foil; cool, then chill before serving.

Stovetop Method: Open one 14-ounce can of sweetened condensed milk and pour contents into top of double boiler; cover. Place over boiling water; simmer water one to one and one-half hours or until thick and light colored. Beat until smooth. Cool. Chill thoroughly.

Be Safe Not Sorry

Summer weather means picnics and other outdoor meals. Don't spoil an enjoyable event by making people sick from food poisoning.

On a three-hour trip to a picnic site on a 90-degree day, food that starts out chilled can become dangerously warm. If you wait an hour or two to serve it, there is an even greater opportunity for harmful bacteria to grow — and a greater chance of food poisoning. Remember that bacteria grows best in warm, moist conditions.

For picnics and long distance trips, plan meals with less perishable foods or transport foods in insulated containers with plenty of ice.

When preparing food for picnics,

wash your hands after handling raw chicken to prevent the spread of bacteria to other foods. Clean your cutting board with soap and hot water after each use.

Carry perishable foods such as fried chicken, potato salad, tuna salad and hamburger in insulated bags or chests. Be sure to use plenty of ice, dry ice or reusable cold packs. An insulated container alone is not enough, especially on a hot summer day.

Cold foods such as cream pies, seafood and dishes made with eggs, meat and poultry must be kept COLD (below 40°F.). Do not allow these foods to stand at room temperature more than two hours.

Foods meant to be served hot, such as meats, seafood, and poultry must be kept hot (above 140°F.). Bacteria grow best in lukewarm foods. Never let these foods stand at room temperature for more than two hours.

Food poisoning can cause diarrhea, vomiting, stomach cramps and other unpleasant symptoms which can last for several hours or several days. In young children and elderly people, the symptoms can be more severe. Often people mistake food poisoning for a simple "bug" or virus. The real cause may be food that was not properly handled, prepared or served.

Picnics and outdoor meals are fun, but need careful planning. Decide how many people you can

Vegetables shouldn't be blanched in microwave

NEWARK, Del. — Should microwaves be used to blanch vegetables? No, says University of Delaware extension foods specialist Dr. Sue Snider.

Although microwave blanching may seem to save time, effort and energy, procedures currently available do not always result in a desirable quality after freezing. Because of uneven heating, Snider says, parts of some vegetables may be adequately blanched while others are underblanched. Rapid

heating may also produce an overcooked product.

All fresh vegetables except onions and green peppers must be blanched before freezing to preserve nutrients, flavor, texture and color. Traditionally, blanching is done in boiling water or steam for specified times. Although commercial literature promotes blanching vegetables in the microwave, Snider says three recent research studies show the results to be inferior to blanching by water or steam.

Asparagus, green beans, peas and sweet corn all retained more vitamin C and better color when blanched conventionally, the foods specialists says. Microwave blanching tests produced tough broccoli, carrots and cauliflower as well as limp zucchini. Green beans were not only tough, but had a grassy odor and off-flavor.

safely serve by preparing food quickly and keeping it cold (or hot) until serving time. Also consider where the food will be prepared, the size and number of your cooking utensils and your supply of insulated food containers. With careful planning and preparation, you can prevent food poisoning.

Ida's Notebook

Ida Risser

The question that I'm asked most often these days is "Aren't you glad that your youngest is through college?" "No, I'm not glad."

You see for the past twenty years we've had one of our six children in college. In fact at one time we had three going to the same college at the same time. We had become accustomed to the going and coming of the college crowd. In a way, it means changing gears and accepting that we are now older parents. Of course, we've known this for a long time but we could fool ourselves into thinking that as long as we had someone in school we couldn't be that old.

There were many experiences along the way. When a daughter became ill, we had to make a hurried trip to her college in New York state and bring her home. Another son had some questionable friends.

Little did we realize that when we took our third child to Penn State University in 1971 that it would become his home for the next 11 years. He stayed to garner all of the degrees that were offered. And in his second year there he became the national champion in soil judging.

Another child not only changed her field of specialization after two years but also changed colleges as the subjects she needed were not offered. One son went to the University of Wisconsin for his masters degree in agricultural engineering and several times brought two or three friends home for a couple days. That took some managing to lodge and feed all of them. And when a child moved into an apartment, then we had appliances to furnish and food too.

It's been a busy twenty years but not quite as busy as the first twenty years were to raise them here on our dairy farm.

Gardeners of the 80s plant for health, nutrition

NEWARK, Del. — Gardeners of the 80s grow their own vegetables for different reasons than gardeners of the 70s did. According to Dr. Sue Snider, University of Delaware extension foods specialist, interest in health, nutrition, and fitness is more likely to spur home gardening than last decade's worries about inflation and rising cost of living.

In a 1984 Gallup Poll, more people said they gardened for canning and freezing than for saving money. Forty percent of the 34 million households in this country kept vegetable gardens, with 21 percent in the mid-Atlantic region. People 50b and over made up 43 percent of all gardeners, and

36 percent were in the 30 to 49 age range.

There was no dramatic difference among income groups: 16 percent of the gardeners polled reported incomes over \$40,000; 22 percent from \$20,000 to \$29,999; and 15 percent under \$10,000. Most lived in rural areas (38 percent) or suburbs (33 percent), and only 11 percent lived in small towns.

The poll showed that eight out of 10 gardening households — about 33.6 million nationwide — planned to preserve food for year-round eating. Their favorite methods included freezing (74 percent), canning (57 percent), pickling (40 percent), drying (15 percent), root cellaring (10 percent).

Treat yourself to a dairy dessert

It seems that every cook has an extensive file of favorite dessert recipes, and that file is sure to include a number of recipes featuring ice cream.

Dairy Month offers an ideal opportunity to serve ice cream and other desserts made with fresh, creamy dairy products. Below are some of our readers' favorite dairy desserts. Try one for dinner tonight and don't stop cooking until you've tried them all.

Next Saturday marks the end of Lancaster Farming's annual search for dairy recipes, but you can still send your recipe this week and receive a gift of appreciation from us.

MELBA ICE CREAM

Raspberry Sauce, below
16 to 18 ladyfingers, split
3 pints vanilla ice cream
1 cup sliced, sweetened peaches
Prepare 1 recipe of Raspberry Sauce, cover and chill. Cut tips off 10 or 11 ladyfingers; stand ladyfingers upright around sides of a 9-inch springform pan. Line bottom of pan with remaining ladyfingers and pieces. Spread 1½ pints ice cream over ladyfinger base, working quickly with a broad, flat ice cream spade or heavy spoon. Dribble ¼ cup Raspberry Sauce over ice cream. Spoon on remaining ice cream; dribble with an additional ¼ cup sauce. Cover and freeze until firm, several hours or overnight. Top with peaches. Cut in wedges and serve with remaining sauce.

Raspberry Sauce

1 tablespoon cornstarch
1 10-ounce package frozen raspberries in juice, thawed
½ cup red currant jelly
Dissolve cornstarch in 2 tablespoons juice from raspberries. Combine raspberries, remaining juice and jelly in saucepan. Heat to boiling. Gradually stir in cornstarch and cook, stirring constantly, until thickened and clear. Cook 2 additional minutes. Cool.

OLD FASHIONED CUSTARD PIE

3 large eggs
½ cup sugar
½ teaspoon salt
½ teaspoon nutmeg
2⅓ cups milk
Unbaked pie shell
Beat eggs slightly, then add sugar, salt, nutmeg and milk. Beat well together and pour into unbaked pie shell. Bake 40 minutes in moderate oven. Sprinkle with fresh ground nutmeg.

Mrs. Sandra Tabor
North East, Md.

LIME SHERBET

1 3¼-ounce package lime gelatin
1 cup sugar
1 cup water
¼ cup lemon juice
2½ cups milk
Combine sugar and water and cook for 2 minutes. Pour hot syrup over gelatin and stir until dissolved. Add lemon juice and cool. Add milk and blend well, then pour into freezing trays and freeze until firm. Remove to bowl and break into chunks with wooden spoon. Beat with electric mixer or rotary beater until smooth. Return to trays and finish freezing.
Note: For variation, use a different flavor gelatin, keeping the other ingredients the same.

Rebecca Zook
Bethel

PEANUTTY POPS

1 envelope plain gelatin
½ cup sugar
1 cup boiling water
1 cup peanut butter
1 cup chocolate milk
1 cup miniature marshmallows
Mix gelatin and sugar. Stir until dissolved in the boiling water. Blend in peanut butter and milk. Add marshmallows. Pour into small cups and freeze. When partly frozen, insert a stick into each cup.

A. Shirk
Hamburg

FUDGE SUNDAE PIE

¼ cup corn syrup
2 tablespoons firmly packed brown sugar
3 tablespoons butter
2½ cups Rice Krispies cereal
1 quart ice cream
¼ cup peanut butter
¼ cup fudge sauce for ice cream
3 tablespoons corn syrup
Stir together the ¼ cup corn syrup, brown sugar and butter in medium-size saucepan. Cook over low heat, stirring occasionally, until mixture begins to boil. Remove from heat.
Add Rice Krispies cereal, stirring until well coated. Press evenly in a 9-inch pie plate to form crust. Chill.
Allow ice cream to soften slightly. Spoon into frozen pie crust, spreading evenly. Freeze until firm.
Stir together peanut butter, fudge sauce and the 3 tablespoons corn syrup. Set aside.
Let pie stand at room temperature about 10 minutes before cutting. Heat fudge sauce mixture. Drizzle over each piece before serving. Makes 8 servings.

Rebecca K. Glick
Quarryville

PUMPKIN ICE CREAM PIE

1 cup canned or fresh mashed cooked pumpkin
½ cup brown sugar
Little salt
½ teaspoon cinnamon
½ teaspoon ginger
½ teaspoon nutmeg
1 quart vanilla ice cream
1 graham cracker crust
Combine pumpkin, brown sugar, salt and spices. Stir ice cream to soften, then fold it into pumpkin mixture. Spoon into graham cracker crust. Freeze until firm. Garnish with sliced pecans.

Betty Biehl
Mertztown

SMOOTH AND CREAMY ICE CREAM

1 quart milk
4 eggs, beaten
2½ cups sugar
2 tablespoons cornstarch or clearjel
½ cup milk
1 tablespoon plain gelatin
3 cups heavy cream
¼ cup cold water
3 cups milk
2 tablespoons pure vanilla
Scald one quart milk. Mix together eggs, sugar, cornstarch or clearjel, and milk and add to scalded milk. Cook several minutes. Remove from heat and add one tablespoon plain gelatin, softened in ¼ cup cold water. Chill. Beat well. Add heavy cream, milk and pure vanilla. If preferred, omit last two ingredients, and add one quart fresh fruit. Makes 6 quarts. Freeze in hand-cranked ice cream freezer.

Mark Newswanger
New Holland

FROZEN BERRY DESSERT

1 pack graham crackers rolled fine
3 tablespoons melted butter
2 egg whites
1 tablespoon vanilla
1 cup sugar
2 cups strawberries or blueberries, fresh or frozen
1 cup heavy cream, whipped
Mix graham crackers and butter. Press in 2 medium sized dishes. Put egg whites, vanilla, sugar and berries in blender. Blend well. Pour in large mixer bowl and beat on high speed for 10 minutes. Fold in whipped cream. Put in dishes and freeze until firm. Set out a few minutes before serving.

Elaine R. Wenger
Lititz

Please your summer guests with Melba Ice Cream Cake, made with creamy, rich ice cream.

CHOCOLATE CRUNCH ICE CREAM PIE

¼ cup chocolate chips
2 tablespoons butter
⅓ cup coconut
⅓ cup oatmeal
Melt chocolate and butter. Combine with other ingredients. Press into greased 9-inch plate. Freeze 30 minutes. Soften 1 quart ice cream and spoon into shell. Freeze until firm, 2 or 3 hours.
For easy cutting, dip plate in hot water for a few seconds.

Mrs. N. Horst
Elkton, Md.

CHOCOLATE ICE CREAM BARS

1 package chocolate pudding
3 cups milk
1 cup cream
⅓ cup sugar
Combine pudding and sugar in saucepan. Add milk gradually. Bring to a boil and cook for 1 minute. Remove from heat. Cool. Stir in cream. Pour into molds.
Rosene F. Zimmerman
East Earl

LEMON ICE CREAM PIE

3 eggs
½ cup sugar
¼ teaspoon salt
¼ cup lemon juice
½ pint heavy cream
1 vanilla frozen ice cream shell
Beat 1 whole egg and 2 yolks. Add sugar, salt and lemon juice. Cook over low heat, stirring constantly until thick. Cool. Beat egg whites until stiff. Then whip cream. Watch for curdling. Fold cream into lemon mixture. Fold in whites. Pour into ice cream shell. Freeze.

Ice Cream Shell

Use 1½ pints vanilla ice cream. Cut ice cream into slices, arrange in bottom and sides of pie pan. Fill spots with ice cream where needed. Smooth with the top of spoon. Freeze until firm before filling.

Correction

In last week's Home on the Range a recipe for Butterscotch Steamer appeared incorrectly. The correct version of the recipe, which calls for 2 quarts, not 2 cups, of hot milk, appears below.

Butterscotch Steamer

¼ cup butter
½ cup brown sugar
2 quarts hot milk
Add butter and brown sugar to hot milk. Serve hot sprinkled with cinnamon or nutmeg.

Featured Recipe

This week's featured recipe comes from Carol Ulrich, first vice-president of Historic Schaefferstown and official ice cream maker for the town's annual Cherry Fair.

Everything at the festival, including the ice cream, has a cherry theme. And the best part is that there is no charge for the creamy treat. However, a box is open for donations, Carol added.

Carol uses a lot—40 pounds—of the big, sweet cherries to make her ice cream extra tasty. Below, she shares her recipe for a four-quart freezer.

Cherry Fair Ice Cream

2 cans evaporated milk
4 eggs
¼ teaspoon salt
1½ cups sugar
½ quart whole milk
3 teaspoons vanilla
¼ cup cherries

Mix all ingredients together in a bowl; add the cherries last. A small amount of cherry flavoring can also be added.

Dairy desserts

(Continued from Page B6)

GLORIFIED RICE

1 pint whipping cream, whipped
1 cup powdered sugar
1 cup pineapple
 $\frac{1}{4}$ cup maraschino cherries, quartered
1 cup boiled rice
2 envelopes gelatin
 $\frac{1}{2}$ cup pineapple juice, heated
1 tablespoon vanilla

Cook rice until very soft, cool. Soak gelatin in 2 tablespoons cold water. Add pineapple juice. Cool until it begins to thicken. Add rice, pineapple, and cherries; mix well. Fold whipped cream in with the sugar added to it. Put in a loaf pan and chill. Cut in squares to serve.

Alma Martin
Ephrata

RUSSIAN CAKE

2 cups sugar
2 eggs
1 teaspoon vanilla
1 #2 can crushed pineapple
2 teaspoons soda
2 cups flour
 $\frac{1}{4}$ teaspoon salt
 $\frac{1}{2}$ cup nuts
Icing for warm cake:
1 3-ounce package cream cheese
 $\frac{1}{2}$ stick butter
1 cup confectioner's sugar
1 teaspoon vanilla

Cream sugar, eggs and vanilla together. Add entire can pineapple and soda. Blend well. Add flour, salt and nuts; blend well. Pour mixture into ungreased flat cake pan and bake for 30 minutes in 350°F. oven. Icing: Mix ingredients together and spread on cake.

Susan B. Marsh
Moatsville, W. Va.

STRAWBERRY GLAZED CHEESECAKE

$1\frac{3}{4}$ cups graham cracker crumbs (20 crackers)
 $\frac{1}{4}$ cup finely chopped walnuts
 $\frac{1}{2}$ teaspoon ground cinnamon
 $\frac{1}{2}$ cup butter, melted
3 eggs
2 8-ounce packages cream cheese, softened
1 cup sugar
2 teaspoons vanilla
Dash of salt
3 cups dairy sour cream
2 cups fresh strawberries
 $\frac{1}{2}$ cup water
4 teaspoons cornstarch
 $\frac{1}{3}$ cup sugar
Red food coloring

To make crust: In a bowl combine crumbs, walnuts and cinnamon. Add melted butter and mix thoroughly. Press on bottom and $1\frac{1}{2}$ to 2 inches up sides of a 9-inch springform pan.

To make filling: Combine eggs, cream cheese, 1 cup sugar, vanilla and salt; beat until smooth. Blend in sour cream. Pour into crust. Bake 375°F. oven for 35 minutes or until set. (Filling will be soft). Cool; chill thoroughly for 4 to 5 hours.

To make glaze: Crush 1 cup of strawberries. Add water and cook 2 minutes; sieve. Mix cornstarch and the remaining sugar; slowly stir in hot berry mixture. Bring to boiling stirring constantly. Cook and stir until thickened and bubbly. Add food coloring, if desired. Cool to room temperature. Halve remaining berries. Arrange on top cheesecake in a design; pour on glaze. Chill 2 hours. Makes 10 servings.

Mrs. Harvey Zimmerman
Leonardtown, Md.

BUTTERSCOTCH DROP COOKIES

$3\frac{1}{2}$ cups sifted flour
1 teaspoon soda
1 teaspoon salt
1 cup soft butter
2 cups brown sugar
2 eggs
2 teaspoons vanilla
 $\frac{1}{2}$ cup sour milk or buttermilk

Cook's Question Corner

QUESTION - Betty Biehl, Mertztown, would like a recipe for dry sunflower seed and for molasses sugar cookies that stay soft

QUESTION - Doris Grube, New Providence, would like a recipe for pita bread filling

QUESTION - Audrey Nemeth, Mt Vernon, Maine, would like a recipe for pumpkin bagels

ANSWER - Audrey Nemeth, Mt Vernon, Maine, requested a recipe for rhubarb bread Thanks go to Hertha Wehr, Mifflinburg, for sharing her rhubarb bread recipe.

Rhubarb Bread

$1\frac{1}{2}$ cups brown sugar
 $\frac{2}{3}$ cup salad oil
1 cup buttermilk
1 egg
 $2\frac{1}{2}$ cups flour
1 teaspoon soda
1 teaspoon vanilla
 $\frac{1}{2}$ teaspoon salt

Mix ingredients well. Stir in $1\frac{1}{2}$ cups rhubarb and $\frac{1}{2}$ cup chopped nuts. Mix well. Pour into 2 loaf pans

Topping:

$\frac{1}{4}$ cup white sugar
1 tablespoon melted butter

Mix and sprinkle over top before baking. Bake at 325°F for about 50 minutes

Dauphin Co. 4-H's to hold Annual Fair

HARRISBURG — Dauphin County 4-H's will hold their fifth annual 4-H Fair Aug. 1 to 3 at the State Farm Show Complex. The Fair will be combined with Roundup judging for all livestock,

general and family living 4-H clubs.

Friday evening will include a fashion show, auction school and cake sale. The auction school will be a training session for those not familiar with the auction process.

Auctioneer Harry Bachman will proceed with the sale of cakes, hogs, and market lambs at 6 p.m. The evening will end with horse and pony grooming and showmanship at 8 p.m.

Clover Award competition gets underway Saturday afternoon. 4-H's must display their skills in "showing" six species of livestock and/or their skills in several areas of the home economics or general projects. A recognition ceremony will conclude Friday and Saturday's activities.

**On being
a farm wife
- And other
hazards**

Joyce Bupp

A word of warning here today,
my friends.

Beware of greasy-fingered,
tousled-haired, grinning male
teenagers bearing invitations.

"Invitations like: 'Hey Mom,
wanna go for a motorcycle ride?'"

My own little cycle is in the shop
- in pieces - since they (you know
who) set out to repair it's arthritic-
ridden transmission. Three years
ago.

So I bite on this casual invitation
from my offspring. Why not?

"Sure, let's go."

Let me interject that a motor-
cycle ride of this caliber deals with
touring the edges of the hayfields
and a quick side trip around the
heifer pasture. None of this hill-
climbing or racing stuff.

I take my spot on the long seat of
the cycle and we slowly start
toward the field road. "Hey, wait,
I've got a problem," I holler.

He glances over his shoulder:
"What's your problem?"

"Well, I've got a draft," I
grumble, pointing to a gaping hole
in the knee of my old barn jeans.
All I get in sympathy is a sarcastic
chuckle, as we bounce through the
six-inch mud puddle and up the hill
over every jagged rock in the field
path.

We cruise out along the top fields
above the farm, where a damp
coolness is edging in behind the
setting sun. Rows of corn weave
around the contour strips and
second-cutting alfalfa is already
rapidly regreening. From high up
here we can see for many miles. I
catch my breath for the beauty of it
all.

But not for long. For he turns the
bike down the steep hill at the end
of the fields, dead ahead on a
course through tall damp grass,
the middle of narrow rows of corn
and straight for the briar patch.
"Watch out for the raspberries,"
comes a warning; I duck, just in
time.

A wooden ramp, built
specifically for getting the cycles
into the pasture to move groups of
heifers, becomes a barrier down on
the other side of the farm. Would I

remove myself from this mode of
transportation while he maneuvers
over the ramp? You bet I would.

But then, riders back in place, he
heads the bike straight down the
steep incline...which ends in the
creek at the bottom. "Let me off!"
I squeal, oozing off the side and
jumping the creek on foot, well
behind the splashing wheels.

Mounted on seat again, I cling to
the bike while he whisks up yet
another rock-strewn hill, back
down through a more shallow part
of the little brook and around the
deep part of the creek to check the
minnow population.

"Let's check the barley," he
decides. That means dismounting
again for still another creek
crossing, then bouncing up more
hills, and through the pasture
where colonies of thistles have not
yet succumbed to the ministrations
of herbicide.

Every thistle patch kisses my
naked knee through the gaping
hole. "Watch out!" I shriek.

The barley is beyond an electric
fence, under which I must wriggle,
then gather samples from "thin
places, thick places and a place
with weeds." We bite on the grains
and the resounding crunch tells us
it's time to rev up the old combine.

Better head back to tell Dad. So
we retrace the patch, whipping
through all the thistle patches
missed on the first trip.

"I'm afraid my bike might
'bottom out' going down this
jump," comes a concerned voice.
Jump? Bottom out? By now
another bottom is about worn out
and the only jump is mine - as I
leap off the bike before it again
meets the creek's baptism.

We make yet one quick side trip
before disembarking. He stops to
show me the spot where he finished
off (with one shot at least a hun-
dred yards) a groundhog riddling
the hayfield with holes. I have the
proof of shooting accuracy - it's
rotting in the backyard, guarded
by the dog.

I wonder. Do they give Purple
Hearts for thistle-bitten mothers
wounded in the line of duty?

Milk surplus down in '85

The government stored enough milk products in 1983 to equal 34 billion glasses of milk—that's about nine gallons for every man, woman and child in America.

Of course the surplus is not stored as fluid milk, but that figure translates into 70 percent of the nonfat dry milk, 32 percent of the butter and 28 percent of all American cheese produced that year.

Keeping the dairy surplus stockpiled in government warehouses costs a lot of money, but there's light at the end of the tunnel. By January 1985, that surplus had been cut in half. This was due to a combination of factors including: the milk diversion program; the first nationally coordinated dairy promotion; and an improving economy, commodity experts believe.

"This dramatic decrease in surplus means the government isn't buying and taxpayers are not paying for the storage of as much milk as in previous years," National Dairy Board chairman Ivan Strickler said.

And, the American public is not only saving money, but awareness of a healthy lifestyle is increased through National Dairy Board milk promotion programs, Strickler added.

The message of good health, exercise and a nutritious diet emphasized in national TV and

print ads, coupled with useful information on milk composition and nutrient content found in consumer-oriented educational programs, add to the public's overall knowledge, he said.

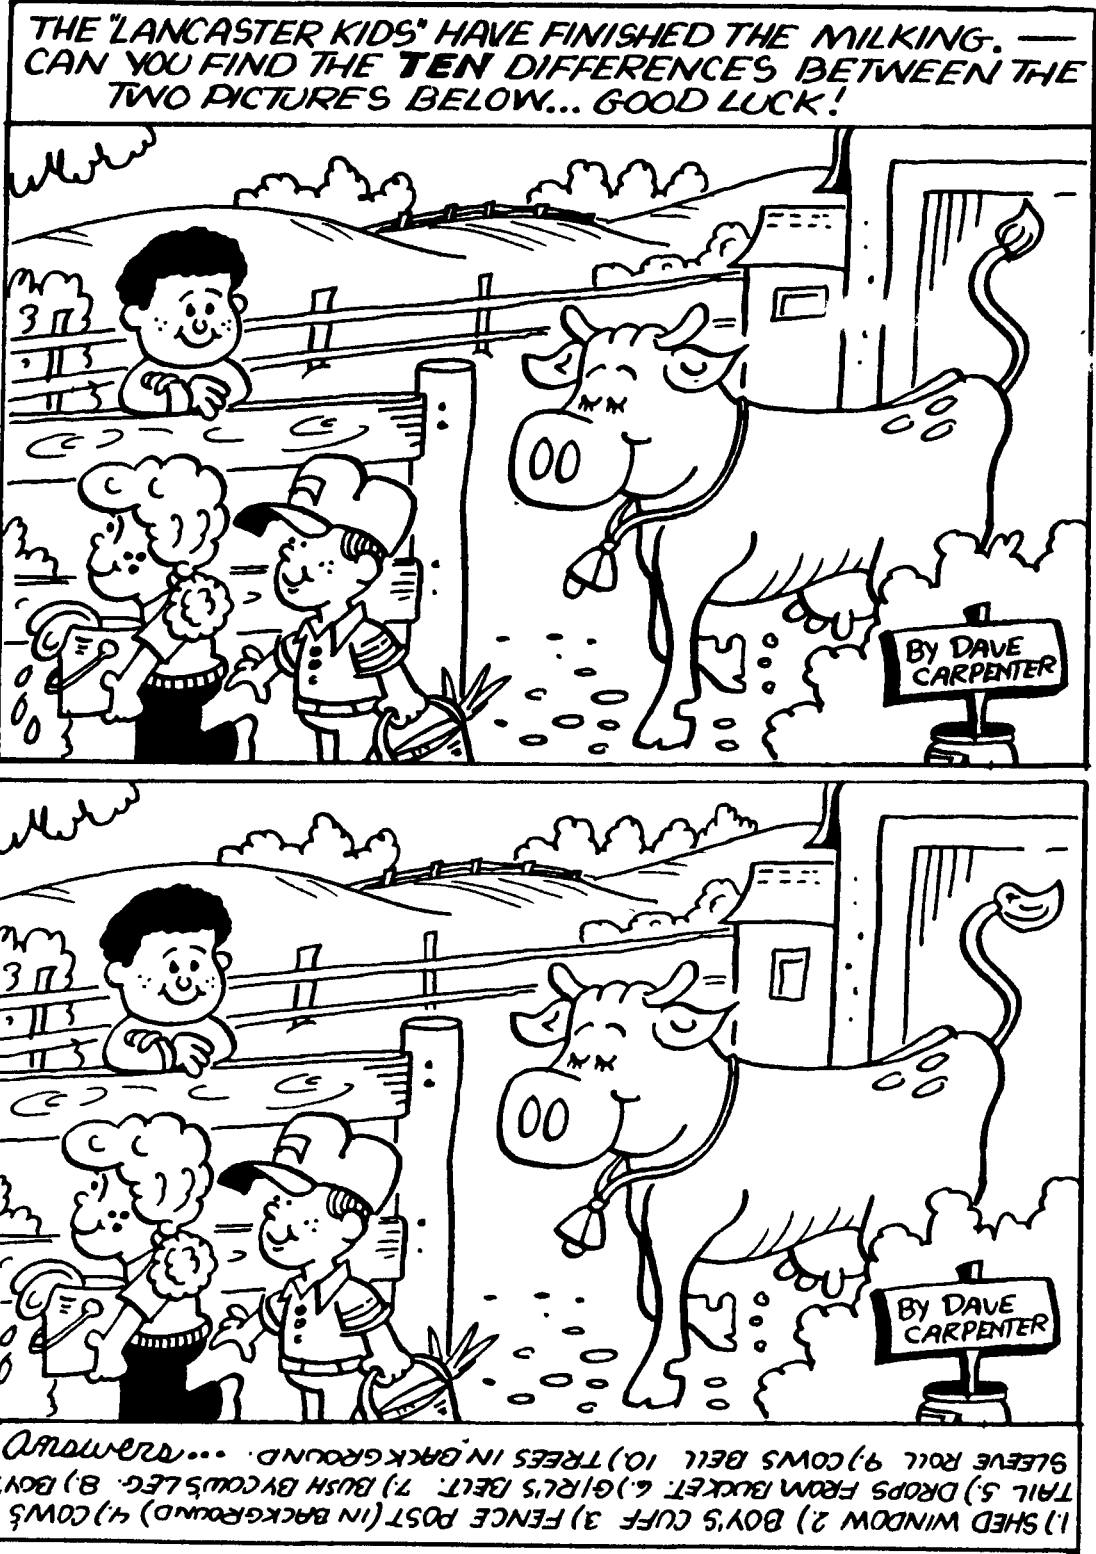

According to Strickler, dairy farmers have the most to lose if milk sales continue to decline, but they also have the most to gain from a national promotion program.

Increased consumption through heightened consumer awareness of milk and its benefits is a definite plus for dairy farmers, but Strickler added there's one more side to the story.

"We also benefit from the coordination between the national and regional promotion groups. Synchronizing advertising and educational campaigns like we've done gives an added bang to our checkoff buck," the Kansas dairy farmer noted.

"And the fact that we are working together and government dairy stocks are being reduced should have a positive affect on upcoming legislative debates on the 1985 Farm Bill. It shows dairy producers can work together for the good of the entire industry," Strickler said.

It's not often that everyone involved can come out a winner, but it's hard to find a loser when dairy farmers promote their own product.

AURORA BOREALIS. MANY CENTURIES AGO PEOPLE THOUGHT THAT THE NORTHERN LIGHTS CAME FROM A BATTLE THE GODS WERE FIGHTING. SCIENTISTS TELL US THAT THERE ARE GREAT STORMS ON THE SUN CALLED SUNSPOTS. FROM THESE SUNSPOTS STREAMS OF TINY ELECTRIC PARTICLES ARE SHOT OUT. WHEN THESE PARTICLES REACH THE UPPER AIR THEY CAUSE THE AURORA.

Did you ever think about using your microwave to make potato salad? It works very well! I like it because it's fast and doesn't heat up the kitchen with a pot of boiling water.

However, like many other things in the microwave, you can't make it exactly like you do on the range top. You have to cook the potatoes a little differently. If you tried boiling a big container of potatoes and water in your microwave, you'd wait hours for it to cook! A microwave just can't handle large quantities of liquids quickly.

The easiest way to cook the potatoes is to peel and cube or slice them before cooking. Put the pieces in a 2- or 3-quart casserole with $\frac{1}{4}$ - $\frac{1}{2}$ cup water (no more!). Cook them, covered, for 6-7 minutes per pound. Six to eight

medium, or four larger potatoes weigh about 2 pounds. Stir them twice during cooking and let them stand covered for 5 minutes before draining.

Using a cooking time of 5 minutes per pound gives you firm, but tender pieces, and 7 minutes gives you softer pieces of potato.

If you have small, evenly-sized round potatoes for salad, you can cook them whole and unpeeled. New red potatoes are pretty unpeeled and quartered in a salad. To steam a small quantity, wash, pierce, and put in a covered casserole with about $\frac{1}{2}$ cup water. Cook for 6-7 minutes a pound, turning the potatoes over halfway through.

If you have a larger quantity of small potatoes, cook them like you would baked potatoes. After

cooking, put them in a bowl of cold water to stand and cool.

Cooking whole potatoes works well only for small evenly-sized ones. If you have larger ones, or potatoes of unequal size to cook, you need to cube or slice them before cooking. If you don't, you will end up with soft and crunchy pieces in the salad, because the edges of big potatoes get soft before the centers are tender.

Add salt to the potatoes after they've been cooked. If root vegetables are salted before cooking the salt draws moisture from the vegetable during cooking; the result may be rubbery tough vegetables. If you add the salad dressing to the potatoes while they are warm, more of the dressing flavor penetrates the potato.

Serve hot German potato salad for a change this summer. In your microwave it is easier to make than on the stove. If you make this just before serving, plan to allow 15-20 minutes standing time after adding the dressing for the flavor to develop fully. This salad reheats well so you could make it ahead of time.

Hot German Potato Salad

2 pounds potatoes (6-8 medium), peeled and sliced
1 medium onion, chopped
3 tablespoons water
5 slices bacon

2 tablespoons flour
2 tablespoons sugar
1 teaspoon salt
 $\frac{1}{2}$ teaspoon celery seed
 $\frac{1}{4}$ teaspoon pepper
 $\frac{2}{3}$ cup water
 $\frac{1}{3}$ cup vinegar

1. Put potatoes, onion and water in a 2 quart casserole. Cover, and cook on high for 10 minutes, stirring once after 5 minutes. Set aside to stand while cooking bacon.

2. Put bacon in a glass pie plate and cover loosely with a paper towel. Cook on high $4\frac{1}{2}$ to 5 minutes until crisp and brown. Remove bacon to a paper towel to drain.

3. Stir flour, sugar, salt, pepper and celery seed into the bacon drippings (pour the drippings into a 4 cup measure if you prefer). Cook on high for 2 minutes, stir after 1 minute.

4. Slowly add water, stirring well until smooth, then add the vinegar and stir. Cook on high for 3-4

minutes until mixture is thickened. Stir well twice to avoid lumps. Stir again after cooking.

5. Crumble bacon into small pieces and add to potatoes. Pour dressing over potatoes and mix gently. Cover and let stand 10 minutes before serving. The salad could be eaten right away, but the flavor is better if you allow 15-20 minutes before eating. Or, make it early in the day and reheat it.

Tip: To reheat: Use a covered casserole, and medium high (70-80), stir several times. If you use your probe to reheat, set it for 140-150° and remember to stir. Reheating is faster if you push the potatoes to the edges of the casserole so the center's almost empty (there's that donut shape again!).

Note: The times given above are for 600-700 Watt ovens. If your oven has 500-600 W, add 10 seconds to each minute; for 400-500 W add 20 seconds for each minute.

Baltimore Co. Farm Queen to be selected

COCKEYSVILLE — Julie Hoffman, Baltimore County Farm Queen, will crown her successor during festivities at the Baltimore County Farm Bureau Annual Picnic on Tuesday, July 9th at 6:30 p.m. at the Cow Palace at the Maryland State Fair Grounds in Timonium. The picnic and contest will be held in conjunction with the Baltimore County 4-H Fair.

Farm Bureau members can obtain tickets for the fried chicken picnic by sending in the coupon to be found in the current Farm Bureau News Letter along with their check or by calling the Baltimore County Farm Bureau offices at 666-1033 to make reservations.

Contestants for the 1985 Baltimore County Farm Queen Contest are: Nancy Ellen Armacost, daughter of Mr. and Mrs. Eddie Lee Armacost, Upperco;

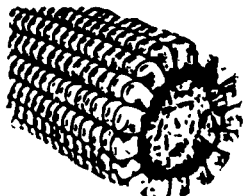

Jenny Otto, daughter of Mrs. Helen Kadler, Glen Arm; and Brenda Strohmer, daughter of Mr. and Mrs. George Strohmer, Woodstock.

Following the contest prize-winning cakes from the 4-H Fair will be auctioned to the highest bidder with Andy Cashman as the auctioneer.

Members of the Farm Bureau, friends and relatives of the contestants and all those interested in promoting Baltimore County Agriculture are urged to be present to support these ambassadors of the agricultural industry.

The winner will be competing for the title of Maryland Farm Queen on August 25th at the onset of the Maryland State Fair. All 23 of the county queens will be promoting agriculture in their respective counties during their 1985-86 reign.

Skillman Farm makes yogurt 'better than it has to be'

BY DONNA MCCONAUGHEY
Staff Correspondent

SKILLMAN, NJ — Yogurt—just another dairy product? Not in New Jersey. The New Jersey Correctional Institute is grossing \$60 per hundredweight of Jersey milk by producing yogurt.

In addition, this is an extremely high-quality yogurt with a unique taste and texture. And, it is being produced with only a \$5,000 equipment investment.

This sounds like a fairytale, unbelievable. But, it is true...right down to the fresh fruit in the yogurt, and it is beginning to catch on across the United States.

Ed Crotty, manager of the farm operations for the New Jersey Correctional Institute, is the mastermind behind this outstanding endeavor. He established Skillman Farm only two years ago as the home for a Jersey herd which he then assembled from across the United States.

Next, Ed set about building a yogurt plant on the farm. By utilizing existing facilities and adapting old equipment, the plant was set up with only a \$5,000 investment.

Equipment currently in the farm systems was utilized and additional used equipment was purchased. Much of the stainless steel had been left for junk at some of the facilities. A wing (actually two rooms and a walk-in cooler) of the existing buildings was adapted for yogurt production to complete the existing plant.

From this point, Ed began working with civilian staff and

inmates to perfect the process involved in yogurt making to achieve the high quality he was looking for.

"Personally, I felt that the quality of yogurt had decreased over the years. Many yogurts have stabilizers and use jam instead of fresh fruit," comments Crotty. This coupled with his desire "to do something unique" and the Human Services department's requests for yogurt led him to the decision to give it a try.

The end result is now a yogurt which has a distinct taste and texture all its own. It is not like anything available on the supermarket shelf. There is a richness and smoothness that is unique. Many people who "do not like yogurt" have tested Crotty's product and decided they do like yogurt.

The all-Jersey milk is heated to 185°F. Powders and sugars are added and mixed for 30 minutes. The temperature is decreased to 180°F. at which time the mixture is inoculated with culture. The pH of the mixture is maintained at 4.3. The yogurt is then pumped to a bulk tank where real fruit is added and mixed. It is then packaged in four-ounce cups and five- or 10-quart containers.

Skillman Farm Yogurt contains no stabilizers, no preservatives, and only real fruit, yet it still has a shelf life of over 30 days. This too make it unique from products available in the supermarket.

Besides the excellent taste, yogurt is a very nutritious food. Skillman Farm Yogurt contains 23

percent total solids with less than 2 percent fat content. One eight-ounce serving supplies 30 percent of the Recommended Daily Allowance for calcium, 25 percent for phosphorous and 20 percent for protein.

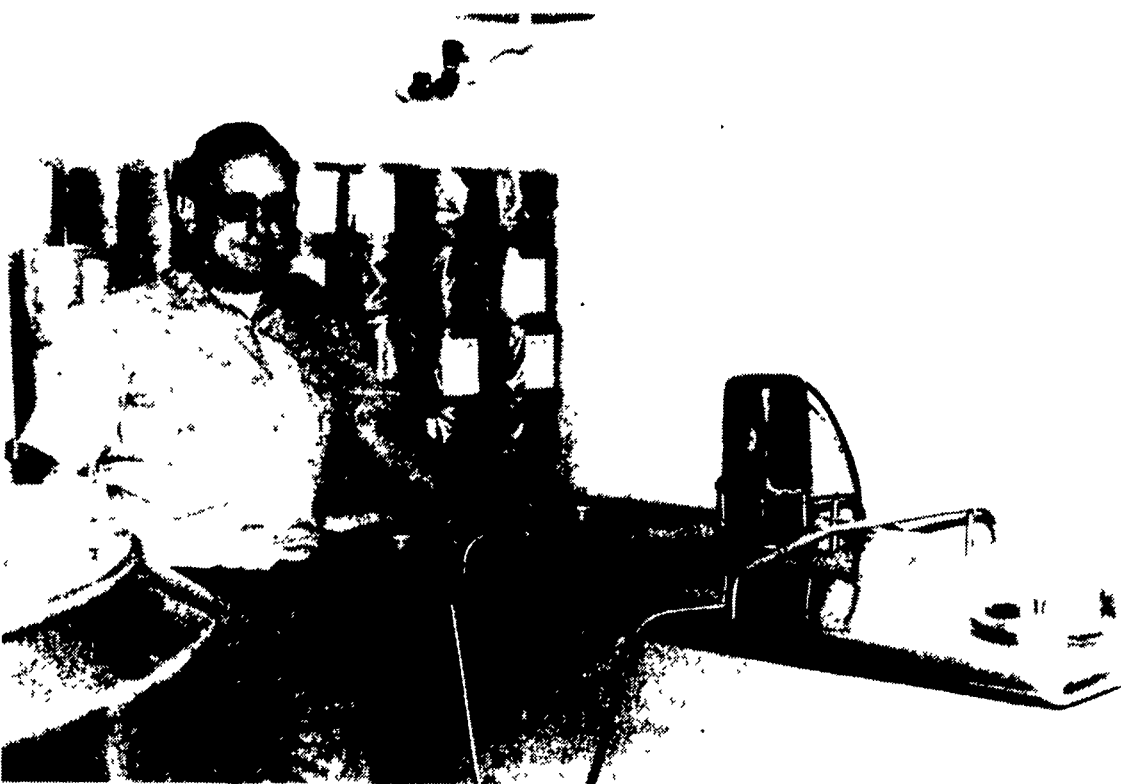

In addition, yogurt is something of a "miracle food." In yogurt the lactose is already partially digested. This allows many people who can not tolerate any other milk product to eat yogurt. Also, with the increased concern for high fiber diets, yogurt can meet these needs by increasing the fiber through the type of fruit added.

Dairy products continue to be a very important source of calcium. The highly publicized calcium tablets sold today as an alternate for dairy products are not easily digested. In actuality one might get more benefit from an equal amount of calcium in an easily digestible dairy product such as yogurt.

When compared with one cup of several dairy products, only the solid cheeses contain more calcium per cup than yogurt. Another strong point is its low cost. Skillman Farm is able to sell yogurt for 30 cents per eight-ounce container or about half what it would cost commercially.

As more research is done on the calcium needs of people, it is predicted that yogurt will become an increasingly important milk product. Ed Crotty believes that someday we may find that an older person did not "fall and break their hip but they broke their hip and fell."

All of these factors have made yogurt a very important part of the products produced by the farm system of the New Jersey

A bulk tank is used to mix the yogurt with the desired fruit before packaging. Here, Ed Crotty, the man behind the yogurt, shows how it works.

Bulk containers await future packaging of Skillman Farm yogurt.

Correctional Institute. Calcium needs are very important in the nutritional planning for residents of institutions. Yogurt is currently being offered on salad bars and as snacks.

Skillman markets the yogurt only within the Correctional Institute. In the future it may be utilized in state geriatric facilities and possibly expanded to Meals on Wheels programs.

Currently all of the milk the Jersey herd produces is going into yogurt with over 400 gallons marketed per week.

Ed Crotty believes that yogurt is a product for the future. "It is the most profitable thing they can do with milk today, given the right market," says Ed.

Ed notes that a farmer with 15 to 20 cows could gross \$150,000 to \$200,000 by producing yogurt. He estimates that a \$20,000 investment would be needed to set up a yogurt

plant if the farmer already had a suitable building.

He is presently involved in helping Jersey breeders in Virginia and Pennsylvania establish All-Jersey yogurt production. He notes that the operation in Virginia has contracts for as much yogurt as they can produce, even before the plant is in operation. "There is no waiting to establish a market as long as your quality is high," notes Ed.

Ed continuously notes the importance of high quality. The inmates who work in the actual production of the yogurt are very conscientious about sanitation and attention to detail in the production process.

They continually strive with Ed to produce a product that is "Better Than It Has To Be." This motto actually underestimates the unique richness and flavor they have achieved.

This farm sign which greets visitors to Skillman Farm was painted by one of the inmates at the correctional facility.

This is part of the Jersey herd established to produce Jersey milk for Skillman Farm yogurt.

New York dairy princesses gather for seminar

CORTLAND — From June 25-27, New York State's 40 County dairy princesses will assemble for their annual training seminar. This year, they will receive their instructions at the State University of New York at Cortland.

Professionals from the local agricultural industry and retail food industry have been called upon to share their talent with the princesses through seminar workshops. The girls will be trained in areas such as working with school children; taping radio announcements; writing news releases; making public appearances, and public speaking.

These are the types of skills needed in order to complete the responsibilities of a one year reign as dairy princess. In addition, the girls will be given an overview of the dairy industry and an explanation of their role in dairy promotion.

The New York State Dairy Princess program is now in its 23rd year. It was designed to get local county groups actively involved in the promotion of dairy products. It also provides princesses with training and experience in the dairy industry.

A pageant will be held Aug. 2 in Cortland to select the 1985-86 New York State Dairy Princess. The training seminar is one of the stepping stones involved in winning the title.

1985 Lancaster County dairy princess Janae Martin is all smiles following pageant festivities Saturday evening. With her are first alternate Julie Long, left, and second alternate Delinda Tindall, right.

Janae Martin crowned Lancaster dairy princess

BY SUZANNE KEENE

LANCASTER — Janae Martin became Lancaster County's 1985-86 dairy princess during ceremonies at the Farm and Home Center last weekend.

Delinda Tindall was named first alternate and Julie Long, second alternate. The eight girls competing in the pageant also selected Janae Miss Congeniality.

The new princess is the 19-year-old daughter of Mr. and Mrs. Robert Martin of New Holland. A graduate of Lancaster Mennonite High School, Janae was on the field hockey team and the basketball team and is active in her church youth group.

She was a member of the New Holland 4-H Baby Beef Club and helps her parents with milking the

family's 48 Holsteins. She also feeds the calves and does some field work.

Janae said she decided to compete for the crown because "I know how much the dairy farmers need spokespersons." Known for her outspokenness, Janae thought she could do the job and now will have the opportunity to use her public speaking skills to promote the dairy industry.

Each contestant gave a promotional presentation on stage and Janae dressed as a clown to tell the audience about the merits of milk. In the future, Janae plans to attend the Pennsylvania School of the Arts.

First alternate Delinda Tindall is the 16-year-old daughter of Mr. and Mrs. Charles Tindall, Peach

Bottom. She is a senior at Solanco High School, where she has participated in three school musicals and played piano for several concerts. She also plays piano for her church youth choir and has shown swine at the Solanco Fair. Her parents have 50 milking Holsteins.

Second alternate Julie Long is the 17-year-old daughter of Mr. and Mrs. James Long, Peach Bottom. Julie is a student at Solanco High School where she is in the Spanish club. She is also active in her church youth group. The Longs milk 100 Holsteins.

Special recognition went to Jeannie Ginder for her outstanding promotional presentation. Jeannie portrayed a school teacher who decided it was time to educate her

Pam Smith is Jefferson County's 1985 dairy princess.

Pam Smith is Jefferson Co. dairy princess

HORMTOWN — Pam Smith was recently crowned Jefferson County

students about milk.

Other contestants were Lucinda Trimble, Peach Bottom; Cynthia Gordon, Peach Bottom; Elizabeth Brinton, Peach Bottom; and Jodi Bixler, Marietta.

Also participating in the ceremonies was 1984 Lancaster dairy princess Judy Miller, who presented Janae with her crown.

Judges for the contest were Raymond Armacost, a Maryland dairy farmer; Charlene Ranck, chairman of the Chester County dairy promotion committee and 1981 state dairy princess; and Susan Reynolds of Delancy, NY, a dairy farmer who owns a motivational business.

dairy princess at the Hormtown Community Center.

The daughter of William and Helen Smith of Falls Creek, Pam is a 1985 graduate of Brockway Area High School.

During the ceremony, the county commissioners proclaimed June Dairy Month in Jefferson County. James Grant, chairman of the dairy promotion committee, proposed a toast to area dairymen.

1984 county dairy princess Carol Pifer summarized her year for the audience. Much of her effort focused on county school students.

Following the crowning, guests enjoyed cheese and crackers, milk punch and milk.

Dauphin Co. to select dairy princess

HARRISBURG — To cap off another June Dairy Month in the Capitol City, two Middletown girls will compete for the Dauphin County dairy princess crown and banner on Friday evening, June 28 at 8 p.m.

The pageant will be held in room 218 of the Lower Paxton Township Building and will be followed by an ice cream social.

Contestant Teresa Hepner, 18, is the daughter of Mr. and Mrs. Joseph Hepner of 125 Beechwood Drive, Middletown. Teresa is a 1985 graduate of Middletown High School with career interests in the dairy industry. She is the president of the Lower Dauphin 4-H Dairy Club and has two head of Jersey cattle as projects. She is employed as Bryncoed Jersey farm near Middletown. She also coaches a girl's softball team and is a member of Seven Sorrows Catholic Church.

Patti Lytle is the 17-year-old daughter of Mr. and Mrs. Paul Lytle, Jr. of 915 E. Harrisburg Pike, Middletown. She will be a senior at Lower Dauphin High School where she is active in the ski club and the longitudinal studies group. Patti also is a member of the Lower Dauphin Dairy Club with a Holstein calf as a project. The Lytles milk 100 head of Holstein cattle.

The public is invited to help the Dauphin County Dairy Princess April Lafferty welcome the new dairy princess. The winner and her alternate will represent the Dauphin County dairy industry in promoting the many delicious dairy products available to the consumer.

Huntingdon County crowns dairy princess

BY BETSY STITT
Staff Correspondent

HUNTINGDON — Tina Shultz of James Creek was recently crowned 1985 Huntingdon County dairy princess during the annual pageant at Shaver's Creek Fireman's Park.

Wanda Love, Shirleysburg, and Lisa McMahon, Petersburg, were named equal alternates.

Tina, the daughter of William and Ruby Shultz, received her crown from last year's princess Mary Ann Keith. Tina will be a senior this fall at Huntingdon Area High School. After graduation, she plans to attend college to major in agriculture.

Tina is president of the 4-H Dairy Club, secretary of the 4-H County Council, a member of the 4-H Lamb and Swine Clubs and of the United Church of Christ youth group and choir.

Alternate princess Wanda Love is the daughter of Garry and Darlene Love. She is a graduate of Mount Union Area High School and was a member of the band, county band and her church youth group.

Alternate princess Lisa McMahon is the daughter of Hilda McMahon. She is a graduate of Juniata Valley High School and plans to attend Williamsport Community College to major in communications.

Lisa's activities included track, cheerleading, yearbook, PFA youth representative, chorus, senior class secretary and the church worship team.

1984 dairy princess Mary Ann Keith spoke of her year's activities. In two weeks, Mary Ann will go to Thailand as an exchange student.

Emil Peters, a dairy farmer from Centre County served as master of ceremonies. Judges for the event were Clarence Cornman Jr., a classifier for the Holstein Association; Vivian Moon, coordinator of dietetic programs for Williamsport Community College; and Lori Snider, a member of the Bedford County Dairy Promotion Committee.

Huntingdon County dairy princess Tina Shultz poses with her alternates, Wanda Love and Lisa McMahon.

WORKAHOLICS.

Nothing works harder than a Kubota B-Series tractor. And there are seven different B-Series models, ranging from 12 to 19 horsepower.

With that much variety, you're sure to find one that meets your needs. Plowing, spraying, hauling, tilling, mowing and more. There's a Kubota just right for the job.

You can also choose features to make the work go easier. Like a hydrostatic transmission, 3-point hitch, 2-speed live mid or rear PTO or 4-wheel drive.

So if you're looking for a hard worker, look no further than a Kubota B-Series tractor.

Md. teen wins first in National Grange Sewing Contest

MIDDLETOWN, Md. — Michelle Coberly, a young seamstress from Middletown, Md., was recently named a first-place winner in the National Grange Sewing Contest.

Coberly, 17, won first place in the teen clothing category of the contest with a spring prom gown in white, cotton/polyester voile, trimmed with lace and narrow blue ribbon.

For her effort, Michelle will receive a trip to the National Grange Convention in Eugene, Ore. in November, where she will compete for the Grand National "Best of Show" title and a \$1,000 prize.

She also received a \$500 scholarship from the Simplicity Pattern Company and a Singer sewing machine.

Other first-place winners in the competition were:

- Jennifer Dickey, Papillion, Neb., who took first place in the clothing by adults category. Dickey, a sophomore at the University of Nebraska, won with a navy blue wool suit and ecru blouse

- Nancy Erickson, Beloit, Wis., who won first place in the children's clothing sewn by adults for children age 12 and under. Her winning entry was a jumper and coordinating blouse for her six-year-old daughter which includes a farm scene made from assorted ribbons, laces and fabric pieces.

- Kristy Rowan, Lander, Wyo., who took first place in the boys and girls clothing sewn by contestants age 12 and under for themselves. Kristy, 11, entered a three-piece red wool vest, culottes and a coordinating print blouse.

All first-place winners received Singer sewing machines and are eligible for cash and merchandise awards from the Dritz Corp., C.M. Offray and Son, Inc., B. Blumenthal and Co., and the Pellon Company, who are all sponsors of the contest.

Ribbon awards for the most creative or innovative use of Offray ribbon went to Stephanie Eddy, Bois, Ida, and Nancy Oliver, Puyallup, Wash. The National Button Award given by B. Blumenthal and Co. for the most suitable buttons for a fabric or the most creative and imaginative use of buttons went to Nancy Erickson Beloit, Wis.

Elm-Penryn 4-H Club

The Elm-Penryn 4-H Club met recently at the Penryn Fire Hall to discuss future events. Melanie Rohrer encouraged people to participate in the talent show on Aug. 1.

Lancaster County 4-H agent Zoann Parker gave the group a pep talk on coming events, which include Demonstration Day on July 2, Lancaster County 4-H Fair, Aug. 15 and Baby Blue Forms.

NJ FFA'ers honor outstanding members at State Convention

NEW BRUNSWICK, N.J. — As the 56th State FFA Convention closed at Cook College, Rutgers University, 300 members across New Jersey traveled home with new offices and awards.

The highlight of the convention was the election of the 1985-86 State Officers. These officers will serve a one year term visiting over 1,500 members in 41 New Jersey FFA Chapters. They will also travel to other states to meet with FFA members and officers, all with a common interest—agriculture and agribusiness.

The 1985-86 officer team is as follows: John Sebastiano, state president; Stockton; Kathy Smylie, state vice-president, Wrightstown; Andy Butler, vice-president - Central Region, Burlington; Wayne Beal, vice-president - Southern Region, Bridgeton; April DeGeorge, vice-president - Northwest Region, Newton; Patricia Rupell, state secretary, Washington; Kim Zar, state treasurer, Audubon; Beth Brenner, state reporter, Flemington, and Kim Nayda, state sentinel, Elmer.

Nearly 30 students received the Garden State Farmer Degree. This degree is the third of four degrees in the FFA. Louis Spann received the Star State Agribusinessman Award and Patty Rupell both of the Warren Hills Chapter, Washington, received the Star State Farmer Award for their outstanding accomplishments in vocational agriculture/FFA.

Four highly-motivated agriculturalists were selected as American Farmer Degree candidates. Laura Menard, North Hunterdon Chapter; Bob Byrne, Allentown Chapter; Doug Lore, Woodstown Chapter; and Tracy Hitchner, Cumberland Chapter, all have continued their agriculture involvement and will pursue their occupations in the field of agriculture.

In the area of Proficiency Awards, the following people received a certificate, a \$100 check, and a chance for their application to be reviewed at the regional and national levels of competition. They are Bill Hudson, floriculture, Camden Tech East Chapter; Patricia R. Rupell, fruits and/or vegetable production, Warren Hills Chapter; Tim S. Yurkovitch, placement in agriculture production, Warren Hills Chapter; Robert C. Hampton, Jr., agricultural mechanics, Cumberland Chapter; Thomas M. Hartung, dairy, Belvidere Chapter; Louis Spann, home and/or farmstead improvement, Warren Hills Chapter; Rich Reidmiller, Beef, Belvidere Chapter; Cathy Russell, horse, Northern Burlington Chapter; Wayne Beal, nursery operations, Cumberland Chapter; Carole Schonzin, agriculture sales/service, Belvidere Chapter; and Heather Hengst, specialty animal production, Warren Hills Chapter.

Many students competed in public speaking contests at the convention. First place students in the Extemporaneous and 6-8 Minute Contest will speak at the Tri-State Contest and then in the Regional Contest in Massachusetts.

In the Extemporaneous Public Speaking Contest, Kim Zar of the Camden Tech East Chapter, placed first; Rich Reidmiller Belvidere Chapter, placed second; and Yvette Fransisco, Newton Chapter, placed third.

In the Public Speaking 6-8 Minute Contest, April DeGeorge of the Newton Chapter, placed first; Ronald Vassallo, Woodstown Chapter, placed second; and Patty Rupell, Warren Hills Chapter, placed third.

In the Public Speaking 5-Minute Contest, Lisa Szelc of the Northern

Burlington Chapter, placed first; and Steve Madara, Oakcrest Chapter, placed second.

In the Public Speaking 3-Minute Contest, Audrey Copelton of the Newton Chapter, placed first and Tracy Sodtablers, Warren Hills Chapter, placed second.

In the FFA Creed Contest, Reni DeGeorge of the Newton Chapter, placed first; Penny Shontz, Northern Burlington Chapter, placed second; and Jeanne Mulford, Woodstown Chapter, placed third. Students must recite the five paragraphs of the creed in front of an audience.

In the Demonstration Contest, Karen Shontz from the Northern Burlington Chapter won second place.

Warren Hills Chapter placed first in the state Parliamentary Procedure Contest. The Allentown Chapter placed second. This contest tests the members' ability to conduct a business meeting using parliamentary procedures.

Superior chapter awards went to Cumberland, Woodstown, Warren Hills, Oakcrest, Belvidere, Allentown, North Hunterdon, Phillipsburg and Hunterdon Hills Chapters for conducting superior chapter programs at the local level.

Allentown and Warren Hills FFA Chapters will be considered for a national emblem in Kansas City, Mo., at the National FFA Convention. The Union County FFA Chapter received the award for Most Improved Chapter in New Jersey.

In the Chapter Safety Contest, Warren Hills received a gold emblem and Gloucester received a silver emblem. These two schools will compete nationally and will be recognized at the National FFA Convention.

The Warren Hills Chapter received first place recognition in the FFA Week Contest with North Warren and Allentown Chapters following. FFA Week occurs in February and is celebrated by nearly 500,000 nationwide.

The Allentown Chapter, Newton Chapter, Warren Hills Chapter, Belvidere Chapter and Hunterdon Central Chapter placed first through fifth in the Public Relations Contest.

The Allentown Chapter received the first place award in the Chapter Scrapbook Contest, and Michele Shea, Northern Burlington Chapter, placed first in the Chapter Secretary's Book and Contest.

The Building Our American Communities (BOAC) Award is sponsored by R.J. Reynolds, Inc. Newton was the first place chapter. Hunterdon Hills and Warren Hills Chapters placed second and third. Don Lewis and April DeGeorge, committee chairpersons of the Newton Chapter, received the Achievement in Volunteerism Award, which includes a trip to Washington, D.C., to attend a National BOAC Conference.

Patty Rupell of the Warren Hills Chapter and Karen Shontz, Northern Burlington Chapter, received a gold award in the Supervised Occupational Experience Record Keeping Contest. Rich Yurkovitch, Warren Hills received a silver award and Cathy Quaranta received a bronze award.

In the new Computers in Agriculture Award Contest, Rich Yurkovitch, Warren Hills Chapter, received a gold rating and will attend an expense-paid National Computer Conference in August.

Receiving scholarships sponsored as special projects to the New Jersey FFA Foundation, Inc., are several college-bound seniors.

The Atlantic Grange Scholarship was presented to April DeGeorge of the Newton Chapter. April will attend Delaware Valley College,

Doylestown, Pa., to study animal husbandry.

A second Atlantic Grange Scholarship went to Melissa Hajdu of the Phillipsburg Chapter. Melissa, who was a state officer this past year, will attend Cornell University and major in animal science.

The Harry Schnieber Scholarship was presented to Beth Brenner of the Hunterdon Central Chapter. Beth will major in animal husbandry at Delaware Valley College.

Yvette Fransisco, from the Newton Chapter, received the Calf Master Scholarship. She will study dairy production at Penn State University.

Patty Rupell of Warren Hills received the Plant Food and Chemical Company Scholarship. Patty plans on a major in ornamental horticulture at Delaware Valley College in September.

Deborah Pomroy, a junior at Delaware Valley College, received the Stephen Fong Memorial Scholarship for her outstanding work and dedication as a State FFA Officer. She served as 1983-84 state secretary and 1984-85 state vice-president.

Lynnette Brubaker, a junior at Cook College, Rutgers University, received the H.O. Sampson Collegiate FFA Scholarship. As collegiate chapter president and past Oakcrest Chapter member, Lynnette has supported and put forth great efforts for the FFA.

Outstanding FFA members were recognized in the Member-of-the-Month and Member of the Year Contest:

June 1984-Karen Thron-Camden Tech East Chapter; November 1984-Barbara Townsend-Camden Tech East Chapter; December 1984-Terril Cook-Middlesex Chapter; January 1985-Cathy Russell-No. Burlington Chapter; February 1985-Yvette Fransisco-Newton Chapter; March 1985-Dennis Coyle-Camden Tech East; April 1985-Linda Pool-Woodstown; May 1985-Robert Hampton-Cumberland.

The Member of the Year was selected on the basis of supervised occupational experience projects, FFA leadership and involvement. Linda Pool was selected for this award.

For the first time this year, an Ideal FFA Member Contest was held. Members were interviewed, judged on a written application, and answered questions on stage concerning FFA and agriculture. The three finalist were Karen Shontz of Northern Burlington in third place; Dale Smith of Allentown, second, and Patty Rupell of Warren Hills, receiving the honor of Ideal FFA Member. She received a plaque and a \$100 scholarship from North Jersey Farm Credit Service.

The Northern Burlington Chapter received the H.O. Sampson Trophy for accumulating the most points in all Interscholastic Judging Contests during 1984-85.

Jay Rupell, advisor at Warren Hills Regional High School for the past 18 years, received the honor of FFA Advisor of the Year at the convention.

To recognize outstanding individuals for supporting the FFA, four people were presented the Honorary State FFA degree: Mr. George Sanderson, W.J. Connell Company; Mr. Joseph Sottosanti, past FFA advisor and ag teacher; and Mr. Frank Yesalovich, FFA advisor at Essex County Vocational School.

Dr. Saul Cooperman, New Jersey Commissioner of Education and guest speaker at the convention, also received the honorary State FFA Degree.

Guidelines important to directing children's behavior

LAFAYETTE, Ind. — You may have heard someone say, "Children today don't do what their parents tell them!"

But what can parents do when children don't behave the way they want?

There are basically three types of responses parents use in dealing with their children, according to Growing Up, the newsletter for parents of school age children. These responses are "helpless," "hostile," and "effective."

The Helpless Parent

The helpless parent immediately admits defeat, even before the

child knows clearly what behavior is expected of him. The helpless parent frequently makes gigantic threats—which the child knows will never be carried out.

For example:

Helpless parent: "When will you ever get started on your homework?"

Child: "I just want to watch some TV."

Helpless parent: "I don't know what to do with you. You never listen to what I say. I swear you won't get any present from me for your birthday!"

The child is usually well aware

that the parent's threat can't or won't be carried out. When the parent admits defeat this way, the child gains control.

The Hostile Parent

The hostile parent also operates from a position of weakness. But the hostile parent tries to cover up feelings of inadequacy and insecurity by angry and sarcastic words which are sometimes accompanied by physical violence.

Hostile parent: "Get started on your homework or I'll box your ears!"

Child: "I just want to watch some TV."

Hostile parent: "You are the worst kid I have ever known. You are a real dummy. I'll bet you end up in jail someday!"

The hostile parent frequently overreacts to a particular situation—like using an elephant gun to scare a mouse! A milder, more reasonable approach is more likely to gain the child's respect and bring about cooperation.

The Effective Parent

The effective parent tells a child exactly what is expected and what the consequences will be if the child doesn't comply. Effective parents apply punishments immediately and consistently—no ifs, ands, or buts about it!

Effective parent: "It's time to do your homework."

Child: "I just want to watch

some TV."

Effective parent: "No, you may not, because we agreed last night that there would be no television tonight unless your room was tidied. If you get your cleaned by 6 p.m. tomorrow night—including putting all your shoes and socks away neatly—then you will be allowed to watch one hour of television tomorrow evening—after your homework is finished."

Knowing in advance what the rules are, knowing that the rules will be applied consistently, and knowing what the consequences will be for breaking the rules gives a child a feeling of security. The child knows what is expected, what behavior will be tolerated, and what will happen if these limits are ignored.

Children depend on parents for positive attitude

MEDIA — Now, not after school starts, is the best time to prepare your children for success advises Maryetta Dorricott, Delaware County Cooperative Extension home economist. Success is built on confidence and confidence is built slowly from small achievements and a positive self image.

Parents can play a huge role in preparing their children for a productive, positive school year. Children depend on parents to show them how a larger world will react to their abilities. They depend on parents to help them develop a positive image or attitude about themselves.

Here are a few suggestions you and all your family can use to help your children toward success:

- Children need answers. When

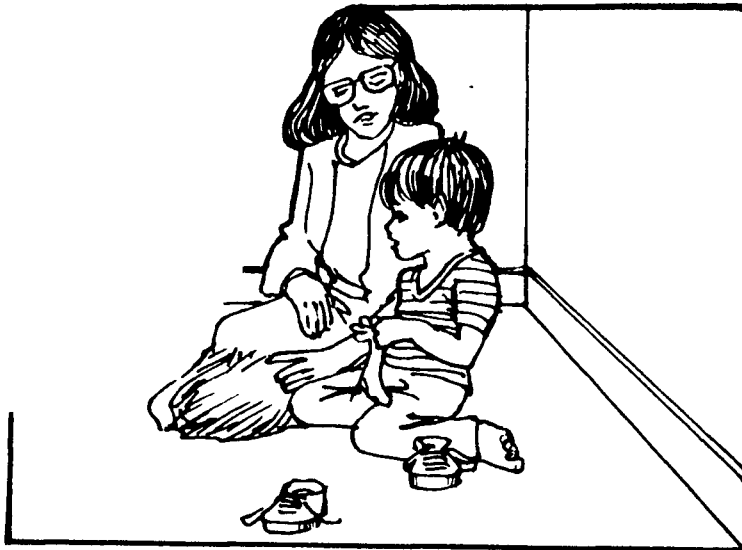

yours ask you questions, answer them directly and immediately. Not, "in a minute," or "ask later." Children deserve your attention, their questions deserve to be taken seriously. If you answer directly, you are telling your children that they matter to you and that you do take them seriously. That means you communicate.

- Children need opportunities for success. That means they need to be allowed to do some things for themselves even though you or their older brothers' or sisters could do the job better. Everyone needs to learn and learning is often a tricky business. On the other hand, if your child is trying something that will cause unnecessary frustration, a helping hand from you can mean the difference between disaster and

success. It means you do things together.

- Sometimes children have angry or unhappy feelings. We all do. But children have to know that parents understand and that it's okay to have these feelings, sometimes. Talking about anger and unhappiness helps put them in perspective, even for a child. Letting your child know you understand means you empathize.

- Ask your children why. You need to be able to understand your children's behavior in their terms before you can explain the behavior you expect. Children, like all of us, are much more agreeable about changing their behavior if they understand why. Asking why, means you care. Children depend on strong families to back their efforts, strong families care.

Help children cope with teasing

Parents often worry about how to help their children combat teasing from peers or older youngsters.

Children who engage in the cruel form of teasing (which does not differ substantially from the "friendly" kind) usually come from homes where sarcasm and hostility—in joke form—are abundant. Most parents are able to control their irritations and do not physically hurt children, yet some parents do not stop to consider that regular teasing, though indirect and imaginative, is a similar type of punishment.

Children do not have the thick skins—or the sophistication—to laugh at themselves or to have others laugh at them. Further, they do not have the vocabulary or the speech fluency to talk back. When a child is constantly mean, he probably has been regularly taking meanness from someone else in his family.

Here are some suggestions for discouraging teasing from bullies outside the home:

- Be present. With young children, a parent's presence helps keep older children in line. Then when trouble appears to be developing, the parent can redirect the play or introduce a new activity—in other words, provide a

distraction. When parents intervene too soon and rescue their children too often, however, they teach the children that their only defense is the parent's presence. This certainly does not help a child build self-confidence.

- Don't teach children it is wrong to fight. Parents of timid children often report that they cannot convince the child to fight back, even when the bully is smaller.

- Eliminate teasing from your own behavior.

- Keep cool and don't become agitated when you hear stories about how your child was tormented. Listen to the child's story, comfort him for a minute, then send him off to do something else.

- Avoid discussing the episode in the child's presence.

- Don't consider moving from the neighborhood. There's a bully on every block.

Babies learn to use things by experimenting

It took thousands of years for mankind to develop the skills and experience to make and use tools.

Almost every person repeats this basic process in early childhood by learning to "use" objects.

Growing Child, the monthly child development newsletter, points out that the first step in learning to "use" an object is to lift it, then bring it down on a flat surface like the floor or table top.

This requires the ability to reach for and grasp an object. It requires coordination of the hand and the eye and will eventually lead to development of other manipulative skills.

Movements learned when a baby is about six months old include

picking up and holding objects with the thumb and forefinger of one hand and turning the wrist back and forth to examine the bottom of something.

During this time of intense exploration, a baby needs plenty of things to explore. Household items like plastic cups, spoons, jar tops, and pot lids will delight her.

A baby learns to grasp and hold an object quite some time before she learns to let go of it on purpose. Her hold on the object just gradually relaxes until she drops it. She will reach and grasp equally well with either hand and will need a lot of practice before she develops a preferred hand.

June: Celebration Month

June is what I call a month of celebrations. In our dairying family we are not only celebrating "dairy month" but also graduation, ordination, a new baby, father's day, grandpa's birthday, anniversaries and to top it off, a wedding!

As you sit reading this column I'm probably making my way down the aisle for my "little" sisters wedding. (The last wedding in our family!) As our family grows bigger, there seems to be more and more to celebrate.

And celebrating family events is good news in strengthening our families. These celebrations are the kind of occasions when it is perhaps easiest to celebrate family bonds across the generations. Joys that are shared are the ones we remember.

Special occasions add zest to life, giving a lift when the everyday world may get to us a bit. Joyful times have a way of stirring up energy and determination to get together. These are times that help nourish the affections of all generations and create memories that can sustain us. Even when we are saddened by a death, we draw strength from remembering a celebration event that was shared with that person for so many years.

Family celebrations often mean

doing special things together. Giving of gifts may be one way we recognize celebrations, but actually it is our "presence" rather than our "presents" that symbolize the importance of the occasion.

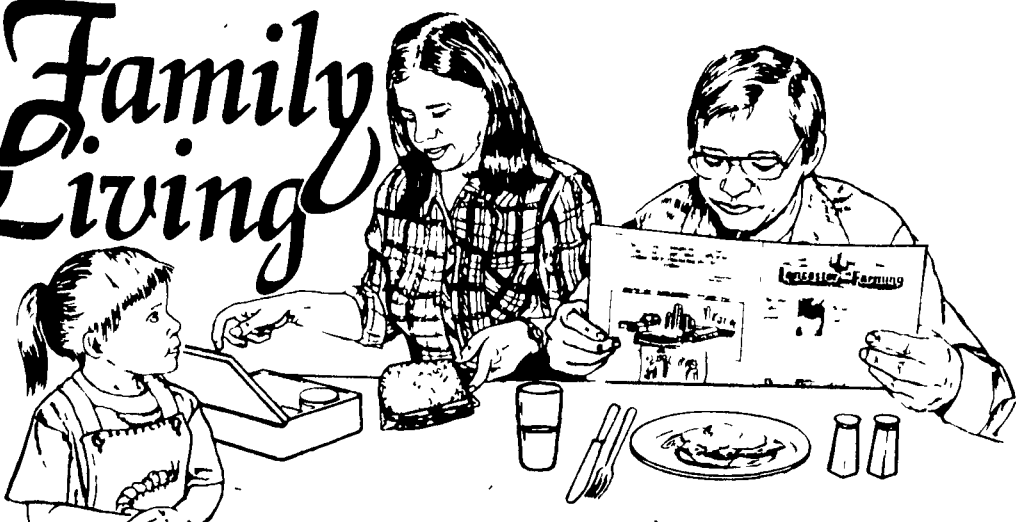

Humor is an important element in our family celebrations. The bright red, tropical print boxer shorts that arrived on Father's Day may never get worn, but will suitably mark this year's celebration. Humor is one element in the glue that holds families together.

Reminiscing is another favorite family activity that goes along with celebrations. At my sister's wedding, the reception will feature slides of the newlyweds through the years, from babyhood to present. Bringing out old pictures and sharing family stories are important aspects to celebrating the family.

Each family has its own way of celebrating special occasions. These differences are what make families unique and help give special identity to members of the family group. We need to recognize the rich rewards of enjoying each other's company across the generations. These are memories you can help to create for yourself and your children, so—get out there and plan your own family celebrations!

Penn State is an affirmative action equal opportunity employer.

Family Living

Lancaster Society 14

Lancaster Society 14 met recently at the Historic Strasburg Inn to celebrate the group's 50th anniversary.

Nora Herr, president, welcomed the county officers, former members and honorary members.

Bertha LeFevre, a charter member, and Jennie Himmelreich gave a humorous presentation of the organizing of Society 14 on June 6, 1935. A history of the 50 years was compiled by Elsie Metzler, first president; Martha Herr and Janet Leaman. Janet presented the history and had copies available for all members.

"Triple Trios," a group from the society provided music and Serena Groff played the piano. Lois Erb, former state president, spoke on "Relationships."

The next meeting will be a bus trip to Raystown Lake on July 22. The Aug. 7 meeting is planned for noon at the home of Esther Landis.

Lebanon Society 5

Lebanon Society 5 met recently in the home of Pearl Swinehart. The bus for the upcoming trip to New York is filled.

The group's June Dairy Month promotion project is well underway with Farmer's Wife Restaurant and Lebanon Valley Livestock Market Restaurant participating. The Lebanon County dairy princess will draw a total of 16 names in the contest.

Dr. Dale Brown talked to the group about cancer, stress and arthritis.

The next meeting will be the family picnic at the home of Blanche Wenger.

Lancaster Society 19

Lancaster Society 19 met recently at the home of Miriam Charles and enjoyed a program entitled "Color Me Happy," presented by color analyst

Carolynn Tonnenholty.

On July 13 the group is attending the Ocean Grove NJ Choir Festival. The next meeting will be Aug. 10 at the home of Arlene Hollinger.

Lancaster Society 25

Lancaster Society 25 met recently at the Water Street Rescue Mission for a tour. Some of the group's members volunteer their time there.

Following the tour, the group met at the home of Frances

Greenawalt, Conestoga. On July 15 Society 30 will entertain the group at the Farm and Home Center at 7:30 p.m.

The next meeting will be Aug. 10 at the home of Mrs. John Metz at 1:30 p.m. Metz will give a tour.

Lebanon Society 20

Lebanon Society 20 met recently in the home of June Zimmerman. Members brought their wedding pictures and told where they went on their honeymoons.

Marion Maulfair won a game in which everyone guessed how many years everyone else was married. Estella Shirk was presented with a gift for being married the longest.

Sarah Funck reported on the Spring Rally.

The State Project for 1985 is entitled "Pennsylvania Commodities" and will consist of

submitting recipes using at least one Pennsylvania grown product.

Beatrice Mull, Sarah Funck and Marion Maulfair will run the sno-cone and popcorn booth Friday afternoon at the 4-H Fair in August.

An itinerary was given for the bus trip to Peddlers Village in September. Members were encouraged to bring guests to fill the bus.

The family picnic will be held in July at the home of Kathy Bornberger.

Fulton Grange 66

Fulton Grange 66 of Lancaster County observed June Dairy Month by making 45 quarts of ice cream on June 10th. The ice cream was served with fresh strawberries following the meeting.

Robert B. McSparran, President of Inter-State Milk Producers Association, spoke on "The Dairy Industry From The Viewpoint Of The Producer And The Consumer" and answered questions from the Grangers. He spoke about dairy products and production and said we need promotion, research and advertising.

Dr. Henry conducted a dairy quiz "What's Your Cows' IQ."

Master J. Everett Kreider conducted the business and reported on the volleyball leagues which play on the Grange courts. Ione Miller announced the Oakryn Senior Citizens June 25-27 tour to Pittsburgh.

Talent Nights will be held at the next two meetings with Linda Martin chairman of the committee to present the June 24th program and Joyce Holloway for the July 8th program. This will be a program contest within the Grange membership.

Farm Women Societies

Lancaster Society 7

Lancaster Society 7 met on June 10 at the home of Mary Denlinger, Paradise.

The society decided to have a table at the Flea Market in Paradise Park in August.

Clair Witmer and two of his vocation students, Mike Hershey and

Mike Raum, showed slides and photos of the FFA Convention in Kansas City and told of the projects they do in school at Pequea Valley.

The next meeting will be a picnic at the home of Miriam Keneagy, Paradise.

Babies learn to use

(Continued from Page B18)

As the ability to reach for and grasp becomes better developed, the baby will learn more about the nature of the objects themselves. One thing she will explore is the sound an object makes as it strikes something else. In fact, after a baby is able to sit alone, she will do a lot of banging on things — against the floor, against the high chair tray, or on whatever surface happens to be near.

You can give her an introduction to different kinds of sounds by providing items in pairs for her to bang. Blocks make wooden sounds. Spoons make metallic sounds, which are different from the

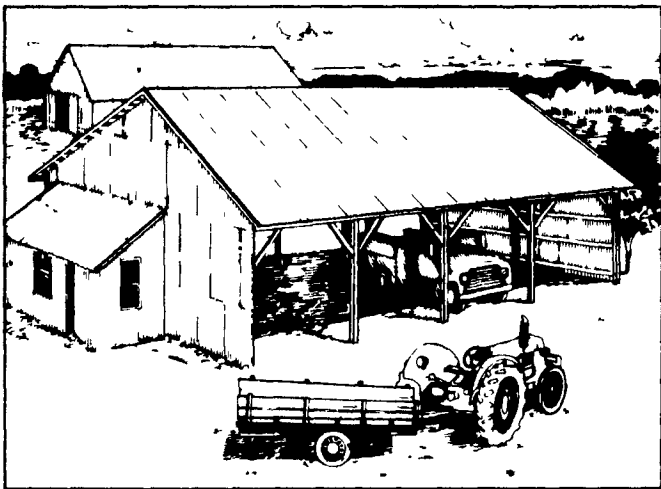

metallic sounds of jar lids. Hard and soft plastic objects make hard and soft sounds, while yarn balls make no sound at all.

And speaking of sounds, your baby isn't really trying to drive you crazy when she spends an hour banging a spoon against an aluminum pan.

She's just discovering that when she moves her arm to hit the pan with the spoon in her hand, it makes a certain noise.

And it has a certain feeling, too. She may spend hours repeating the same sound, the same movement. She's learning the relationship between sounds, sights, and feelings.

Laurie Duran is Washington/Greene County dairy princess

WASHINGTON — Laurie Duran was crowned 1985 Washington/Greene County dairy princess last Saturday at the Washington County Fairgrounds.

The 18-year-old daughter of Michael and Joann Duran of Bulger, Laurie plans to attend Penn State University in the fall to major in ag business management.

Laurie has been very active in FFA, serving as state president in 1984. Her family currently milks 17 Holsteins.

Seventeen-year-old April Jeffries was named alternate dairy princess. She is the daughter of Allen and Dorothy Jeffries, Amity. April is a senior at Trinity High School and is Washington County FFA president. Her family milks Holsteins on their 160-acre farm.

Others competing in the pageant were Theresa Ciaffoni, 17, the daughter of Pete and Jean Ciaffoni, Canonsburg; and Susan Carl, 21, the daughter of Riley and Madge Carl, Avella. Kim Raney served as master of ceremonies.

The award for the best skit went to April Jeffries and second place went to Laurie Duran.

Amy Lindley, 1984

Washington/Greene County dairy princess, presented Laurie with her crown. In her new position, Laurie will appear at super-

markets, fairs, parades, malls and dairy shows. She will also talk to many organizations, perform radio spots and give newspaper

interviews — all designed to promote milk and dairy products.

Judges for the contest were Dorothy Smith, Bob Badger and Lynn Mancerso.

Washington/Greene County dairy princess Laurie Duran, center, received her crown from 1984 dairy princess Amy Lindley. Also pictured are alternate princess April Jeffries, left, and contestants Theresa Ciaffoni and Susan Carl.

Saturday, June 22

Lancaster Society 4 meets at St. Paul's U.M. Church, Mountville.

Monday, June 24

Lancaster Society 1 meets at 6:30 p.m. at Zinn's Park for a family picnic.

Tuesday, June 25

Lancaster Society 24 meets at 7:30 p.m. for a program by the dairy princess.

Thursday, June 27

Lancaster Society 15 meets at noon for lunch.

Lancaster Society 11 meets at noon for a covered dish picnic at Huffnagle Park.

Lancaster Society 26 meets for a "Powder Puff Mechanics" program by Rick Martin.

Saturday, June 29

Lancaster Society 5 meets for a program about the Water Street Rescue Mission.

Jennie Hess selected Adams County dairy princess

BY SALLY BAIR
Staff Correspondent

BIGLERVILLE — Seventeen-year-old Jennie Hess was crowned the 1985 Adams County dairy princess Saturday night in Biglerville. The daughter of Mr. and Mrs. John Hess, 200 Tall Oaks Road, Gettysburg, Jennie is a 1985 graduate of New Oxford High School.

Named as co-alternates for the coming year were seventeen-year-

old Pauline Mehring, a 1985 graduate of Gettysburg High School, and seventeen-year-old Laurie Meyers, a senior at Gettysburg High School. Pauline is the daughter of Mr. and Mrs. Oscar Mehring, Gettysburg, and Laurie is the daughter of Mr. and Mrs. Alan Meyers, Gettysburg.

The new dairy princess was crowned by Carol Clowney, retiring dairy princess, who gave a special thank you to Adams County

dairy farmers for their support throughout her reign.

Each of the contestants presented a radio spot, and emphasized the importance of including dairy products in the diet for their nutrient value, and for their part in keeping healthy.

Jennie has been active in high school sports, participating in track and cross country as well as the varsity club. She also was part of a school play.

In 4-H, the 1985 dairy princess has been a member of the Adams County Dairy Club, the dairy judging team and the 4-H State. In addition to working on her father's dairy farm, she works for veterinarian Donald Yorlets, and anticipates studying biology or agribusiness in the future.

Judges for the contest were Gretchen Naugle, Carlisle; Thomas Engle, Stewartstown; and Phillip Laughman, Thomasville. N. Alan Bair, Atlantic Breeders Cooperative, served as master of ceremonies. General chairman for the pageant was Barbara Kehr.

Seventeen-year-old Jennie Hess, center, was crowned Adams County dairy princess. Named alternate princesses were Pauline Mehring and Laurie Meyers.

1985 Mercer County dairy princess Kris Canon receives her crown from 1984 dairy princess Elaine Hill. Alternate princess Cathy Slater looks on.

Mercer County dairy princess is Kris Canon

BY BARBARA RADER
Staff Correspondent

MERCER — Kris Canon was recently crowned Mercer County dairy princess during festivities at the Mercer Cooperative Extension Center. Kris is the daughter of Mr. and Mrs. LeRoy Canon, West Middlesex.

Kris is a student at West Middlesex High School where she was class treasurer, and a member of National Honor Society, marching and concert bands.

She owns 10 registered Holsteins on her parent's 200-acre dairy farm where they milk 65 Holsteins. She has been active in 4-H for seven years and currently serves as treasurer of the Hay Burners 4-H Dairy Club. She is also a Junior Holstein Association member.

During her promotional presentation to the judges, Kris portrayed "The night before the pageant," detailing her emotions as she tried to get some sleep.

Cathy Slater, the daughter of Mr. and Mrs. Edward Slater, Clarks Mills, was selected alternate princess. Cathy will be a senior at Lakeview High School, where she participates in the chorus, color guard and FHA.

She raises Holstein veal calves and one white-faced beef calf on her family's 390-acre farm with 60 Holsteins milking.

Cathy is also active in her church's youth fellowship and traveled to Haiti through the United Methodist's Church vacation bible school.

Judges for the contest were Sam

Minor, Washington; Roger Pertl, Butler; and Deborah Stunkard, New Castle.

Entertainment for the evening was provided by former county dairy princesses who presented a farm fashion show.

Elaine Hill, 1984 Mercer County dairy princess, spoke on her year as dairy princess before relinquishing her crown.

Master of ceremonies during the ceremony was David Dowler, associate Extension agent in Mercer County.

Debby Hawbaker is Franklin County's dairy princess

KAUFFMAN STATION — Debby Hawbaker, the 17-year-old daughter of Dwight and Shurley Hawbaker, Greencastle, was crowned 1985 Franklin County dairy princess Saturday evening at Kauffman's Community Center.

Debby is a 1985 graduate of James Buchanan High School and plans to attend Hagerstown Business College to learn to be a legal secretary. She is a six-year member of the 4-H Western dairy

club.

Carlia Crider, the daughter of Mr. and Mrs. Harold Crider, Chambersburg, was named first alternate. Laurie Middour, the daughter of Mr. and Mrs. Joseph Middour, was named second alternate.

Debby will serve Franklin County dairy farmers throughout her reign, representing the county's \$82 million dairy industry.

Woodland Weavers and Spinners

The Woodland Weavers and Spinners Guild hosted several guests at their Saturday, June 8th meeting at the Cochection Fire Hall. The soft and furry guests were a part of the program that Jackie Cook and Marilyn Bourke hosted: "The Care, Feeding, and Grooming of Angora Rabbits." The fine hair plucked and combed from Angoras can be spun into lovely, soft yarns and blends well with other fibers like wool, mohair, or silk.

The Guild will be participating in spinning and weaving demonstrations this summer at Fort Delaware on July 12 and August 16 and at the Sheep Day of the Wayne County Fair on Aug. 9

Mordants for dyeing will soon be available through guild member Phyllis Barth. Anyone interested in ordering mordants can contact Phyllis at Phylcraft House; Bucks Cove Road; White Mills, Pennsylvania 18743.

Lace Making is the subject of the Woodland Weavers and Spinners Guild meeting for July. Sandy Shearer will introduce a group from New Jersey who will demonstrate this fine handcraft. Guild meetings are always open to anyone interested in learning more about working in the fiber arts. Next month's meeting will be held at the Fire Hall in Cochection on July 20 from 10 a.m. to 3 p.m.

Jr. Holstein members practice fitting, showing

BY JOYCE BUPP
Staff Correspondent

NEW PARK — Junior Holstein members of York County held their annual fitting and showmanship workshop on June 14 at the Hopewell Center farm of the Jim Warner family.

After a morning of clipping, washing and halter breaking heifers inexperienced in show techniques, members paraded before judge Don Dyer of East Berlin for evaluation of their

performances.

Lesley King, Delta, was named the champion showman of the day, while reserve showman honors went to Jenelle Boyer, Spring Grove.

In the fitting competition, the team of Downa Doll, Shannon Doll and Danny Cole topped all other contenders.

A list of winners follows.

Fitting: 1. Downa Doll, Shannon Doll, Danny Cole; 2. Bridgette Boyer, Tim Warner, Matt

Reheard; 3. C.E. Hubbard III, Jenelle Boyer, Kelly Morris; 4. Lesley King, Randy Gross; 5. Rich Bupp, Kim McCleary, Brad Walker.

Showmanship: Senior division—1. Lesley King; 2. Bridgette Boyer; 3. Downa Doll; 4. C. E. Hubbard III. Intermediate division—1. Jenelle Boyer; 2. Tim Warner; 3. Rich Bupp; 4. Randy Gross; 5. Shannon Doll. Junior division—1. Matt Reheard; 2. Kim McCleary; 3. Kelly Morris; 4. Danny Cole; 5. Brad Walker.

Lesley King, second from right, won the York Junior Holstein workshop's showman championship. Jenelle Boyer was selected the reserve champion showman. With the winners are judge Don Dyer and York County dairy princess Joyce Ruppert

1985 Cumberland County dairy princess Lori Jamison was the center of attention at Friday night's festivities. With Lori are 1984 dairy princess Vonda Wickard, left, and junior dairy representative Michelle Cornman.

Lori Jameson crowned Cumberland County dairy princess

CARLISLE — Lorie Denise Jameson was recently crowned Cumberland County dairy princess at the Embers Convention Center in Carlisle.

The daughter of Mr. and Mrs. Robert Jameson of Carlisle, Lorie received her crown from 1984 Cumberland County dairy princess Vonda Wickard.

Lorie is a 1985 graduate of Big Spring High School and plans to attend Lock Haven University in the fall to major in mathematics. During her high school career, she was a member of the track team and the cross-country team, and was a member of the Big Spring Athletic Association.

She was also a member of the National Honor Society and played

in the Big Spring High School band. Her other activities include 4-H and youth fellowship and choir at Allison United Methodist Church.

Lorie will represent Cumberland County at the state dairy princess pageant in September.

Michelle Cornman, Carla Snoke and Natalie Gutshall were selected junior dairy representatives. Michelle is the daughter of Mrs. Frances Cornman, Newville; Carla is the daughter of Mr. and Mrs. Roy Snoke, Shippensburg; and Natalie is the daughter of Mr. and Mrs. Elwood Gutshall Jr., Newville.

Junior dairy representatives will give out ribbons, awards and educational and promotional materials at malls, supermarkets, fairs and annual meetings.

Westmoreland Co. 4-H Travel Club

The Westmoreland County 4-H Travel Club met recently at the Extension office.

All trip reports, pictures, medical forms and birth certificates are due now. Laura Lord and Ann Wisneski will decide on a gift for the host family in Canada.

The group viewed a video titled

"The Statute of Liberty," and heard tips on packing from Mrs. Harr and Mrs. Shaw.

The next meeting will be June 26 at 7:30 p.m. at the Extension office. Members traveling thorough New York and Canada will be packing information packages and host family gifts.

Coal Gun Can Heat Your Commercial Building for 50% LESS Than Oil, Gas, or Electric!

ESHLAND

...And furnish your Hot Water as well.

The Economics are simple. In most applications, the Eshland Coal Gun will pay for itself within 12-18 months. The technology is here. Coal Gun Auto-Stoker Boilers use clean burning Anthracite Coal and operate well within Clean Air standards. These fully automatic units are self-loading and need only occasional tending to remove expended ash. Sizes range from 130,000 BTU/hr. to 1,500,000 BTU/hr. and can be used in tandem for larger applications. Available in Steam or Hydronic.

Model	BTU/hr	Area Capability
S 130	130,000	4,000 Sq. Ft.
S 260	260,000	8,000 Sq. Ft.
S 500	500,000	15,000 Sq. Ft.
S 1000	1,000,000	30,000 Sq. Ft.
S 1500	1,500,000	45,000 Sq. Ft.

* Depending on building construction, use, and insulation.

Coal Gun users include Greenhouses, Warehouses, Apartment Buildings, Retail Stores, Garages, etc.

ESHLAND ENTERPRISES INC. holds an ASME Certificate of Authorization for Code Construction of Heating Boilers.

See your ESHLAND dealer today.

Eliminate Fencing Problems

WITH

ARC
SOLAR FENCING

"The Arc 12 Solar system allows us to safely run our stallions next to the mares eliminating time and labor on try backs."

Harold S. Winder, Quality Quarter Horses, Oakbrook, Iowa

- Eliminates fence sagging
- No staples or wire clips
- Adjustable enclosed spring assembly for each wire
- Optional site rails™
- Optional Arc 110 Volt multi wire unit
- Installed by trained dealers
- Fully guaranteed by warranty

The ARC 12 Fence is a new concept in livestock fencing. Using free energy from the sun, the solar powered solid state unit keeps a powerful 12 volt battery charged for effective shocking. Special non-conductive white plastic posts are attractive and extremely durable (capable of being bent 45° and returning to their original position). Using smooth 12 1/2 gauge high tensile wire eliminates injuries from barbed wire.

Gwen Alcorn, Armstrong County dairy princess, seated, is flanked by her alternate, Jerri Bowser. Jerri was also selected Miss Congeniality by the other contestants.

Armstrong County dairy princess

BY BARBARA RADER
FORD CITY — Gwen Alcorn, the 17-year-old daughter of Gary and Carol Alcorn, recently became the Armstrong County dairy princess during coronation ceremonies at Lenape Vocational-Technical School. Jerri Bowser was selected alternate dairy princess.
 Gwen owns 15 registered Holsteins on her parent's 525-acre dairy farm where they currently milk 122 head. An eight-year veteran of the Dayton Dairy 4-H club, she enjoys showing her 4-H animals at Dayton Fair. Last year she participated in the Pennsylvania Junior Dairy Show in Harrisburg for the first time.
 Gwen is a recent graduate of Dayton High School and Lenape Vo-Tech, where she was a member of her VICA Club for two years. She plans to live at home at least through her reign as dairy princess. Later, she plans to travel to Maryland for a career in computer programming.

Alternate princess Jerri Bowser was named Miss Congeniality during the pageant. She is a recent graduate of Red Bank Valley High School and Clarion County Vo-Tech. Jerri, 18, is the daughter of James and Margie Bowser, New Bethlehem, and will help manage a beauty salon in addition to her dairy promotion activities.

A former 4-H'er, she lives on a 148-acre farm where her family milks 40 head of Holsteins. She is an active Girl Scout and was on the school's honor roll and director's list at Vo-Tech.

Two other contestants, Tammy

Hiner, daughter of Eugene and Twila Hiner, East Brady; and Joleen Rearick, daughter of Murray and Dorothy Rearick, also competed for the dairy princess crown.

Laretta Graham, Worthington, was mistress of ceremonies. She is past president and an active member of Armstrong County's Historical Society.

Serving as judges for the event were Linda Schaeffer, Ford City, an executive secretary of Pa. Home Economics Association and part-time home economics instructor at Indiana University of Pennsylvania; and Rev. Rosalyn Kummer and her husband, Lee, Evans City, Holstein dairy farmers.

Md. raspberry crop is two week's early

ANNALOPIS, Md. — The Maryland raspberry crop is early and is now at full and peak supply, so don't wait to get your share of the juicy berries.

The hot, dry weather in Maryland earlier this year pushed many crops ahead in development and raspberries are no exception.

An increasing number of pick-your-own growers have added raspberries in recent years due to customer demand. Buyers have been using them for freezing and making preserves.

Sheep dairy expert addresses Cheese Society

BY SUZANNE KEENE
BIRD-IN-HAND — In Lancaster County the term "dairy farm" evokes thoughts of black and white cows grazing in green pastures. But Olivia Mills, a dairy farmer from England, brought another form of dairying to the attention of American Cheese Society members attending their Third Annual Meeting in Bird-In-Hand this week.

Mills is proprietress of Wieldwood Sheep Farm and Dairy in England, where she milks a flock of over 200 dairy ewes. Most of the ewes in her flock are Frieslands, but many crosses and other breeds are being tested.

Friesland ewes are good milkers and produce about three litres of milk a day, Mills explained. In each seven-month lactation a ewe will produce about 300 to 500 litres, she continued. They are also long-lived, having five to six sets of lambs in a lifetime.

The sheep are milked in a raised parlor similar to the parlors in cow dairies, and a specially designed milking machine is used on the much smaller-uddered sheep.

Mills runs two separate flocks of sheep on her farm to ensure a continuous flow of milk throughout the year. One flock lambs in March and the other in October. Wieldwood Sheep Dairy is the first in the world to milk sheep on a commercial basis continuously throughout the year.

Wieldwood was also the first to sell whole sheep's milk by the pint to customers and shops in the South of England, Mills noted.

In addition to the milk sold on the farm, Mills produces cheese and yogurt from the sheep's milk, which she sells from the farm and in the marketplace.

"Sheep cheese is, in fact, in

great demand," she told Cheese Society members Monday. "People are looking for new flavors," and cheese made from sheep's milk offers them a new product.

While sheep's cheese may intrigue the consumer, sheep's milk is also unique. "Sheep's milk is quite unusual," Mills said. And while much research has been done on cows' milk and the nutrients it offers humans, "Very little has been done on sheep's milk from the point of view of the human," she continued.

However, it is known, Mills said, that sheep's milk has a high, non-casein, protein level that makes it ideal for use in making ricotta cheese. Sheep's milk has an average fat content of 6.5 percent, but that figure does increase toward the end of lactation, she explained.

The amount of certain vitamins and minerals in sheep's milk "is really quite staggering," Mills notes. Sheep's milk has about twice the amount of vitamins A and E as cows' milk and has a much higher calcium content.

Mills is a staunch believer in the benefits of sheep's milk for health. "Even if you only milk a few in your backyard, you'll be considerably healthier," she said.

High nutrition isn't the only thing sheep's milk has going for it. According to Mills it also has great taste and is creamier than most cows' milk.

However, sheep's milk does

bring a high price on the market, costing as much as four times more than cows' milk. One reason for the high price, Mills explained, is that sheep's milk has high total solids, and therefore produces more cheese per liter or quart than cows' milk.

Mills makes her own cheese, a semi-hard cheese called "Walda," right on the farm. She says she makes about 200 litres at a time and uses pre-lined molds. She doesn't use presses, but relies on the weight of one cheese on top of the other. It takes about three to six months for the cheese to mature and sometimes, she noted, green peppercorns or caraway seeds are added for variety.

Mills has studied sheep dairying around the world. She shared her intimate knowledge of this unique industry and slides of her world travels with the Cheese Society. She has also authored a book titled "Practical Sheep Dairying."

Mills says she sees sheep dairying as a viable alternative in the United States, especially for financially-strapped dairy farmers who have sons wanting to remain on the farm. It offers a totally new enterprise that the son can operate apart from the cow dairy without contributing to the serious oversupply of milk that plagues the dairy industry here. "I think there's a tremendous potential here," she notes.

Avon-East Lebanon 4-H Club

The Avon-East Lebanon 4-H Club met recently at the Avon United Methodist Church.

Michelle Houser gave a presentation on crocheting. The crocheting meeting was led by 4-H

leader Karen Wagner.

News reporter Jill Hoffer gave a presentation on writing articles.

Mrs. Ruth Rittle discussed a money making project of selling tupperware.

Lancaster Seeing Eye Club

Lancaster Seeing Eye Club made plans to tour Seeing Eye in Morristown, NJ on June 26 at their May meeting.

Ginny Trumbauer announced that her dog, Heide, returned to Seeing Eye on June 11 for further

training. The Kregger's dog, Libby, will also be returning during June.

The next meeting will be held Tuesday, June 25 from 7 to 8:30 p.m. at the Farm and Home Center.

Berks FFA Officers

The Berks County FFA officer team met recently at Oley Valley High School.

The officers made plans for the County Leadership Workshop scheduled for Aug. 1 to 2 at Robin Hill Campsite.

Plans for the county FFA milkshake sale at Kutztown Fair

were also discussed. The Hamburg Area Chapter will be in charge of the milkshake wagon at the District Dairy Show.

Important dates to remember include the FFA Swine Roundup on July 31 at Leesport Auction and the Kutztown Fair on Aug. 12 to 17.

YORKSHIRE-LANDRACE

"THE PIG OF TOMORROW is at OUR PLACE TODAY"

34 years of planned breeding program
34 years of leadership in the swine industry
34 years of winners - SHOW RING - CARCASS - TEST STATION

It is not what we say - It is what the record of proof says

THE PA SWINE TEST STATION
IS 16 YEARS OLD

OUR 16 years of TESTING at this station in competition with other breeders were good ones

OUR pigs hold the all-time record for Ham-Loin % for pen average.

OUR pigs hold the all-time record for Loin-Eye Area for pen average

OUR pigs hold the all-time record for Length of pig

OUR pigs hold the all-time record for Most Superior Sires Tested

OUR pigs hold the all-time record for the Most

★★★★★★★★FLASH★★★★★★★★

Our Yorkshire Boars Sired by King David won the 1984 Boar test at our test station Penn State University. Top indexing Boar (index of 154) sold for \$1550. to the NJ Correctional Industry. We had second top indexing pen of Boars at the NY test station w/the high selling boar over all breeds \$675. Selling to John Peters, Schuylersville, NY.

OUR records prove more pounds of gain from less feed per day.

THESE RECORDS ARE THE PROOF THAT WE PROFIT ON THE COST END AND ON THE SALES END (DOUBLE PROFIT)

THIS ALL SAYS:

THE PIG OF TOMORROW IS AT OUR PLACE TODAY

YORKSHIRES - LANDRACE - DUROCS

Visit our farms or come to one of our production sales - four each year - Jan, Apr., June and Oct.

THE GREAT COVER-UPS

Protect your round hay bales from sun, rain, snow or sleet with our all-weather shields.

Single Bale Size
5 X9' x 8mil-20 per box-\$85
includes
80 tie-downs

Multi-Bale Economy Size
(covers 20 bales at once)
10 X100 X10mil-1 per box-\$75
includes
36 tie-downs

Easy to use one-step tie downs

Now you can protect your round hay bales from sunlight, rain, snow or sleet. All-weather plastic shields prevent waste due to exposure and provide quality hay storage year-round.

Whether you use the single bale size or our 20 bale capacity economy size, proper care will result in reuse for up to 5 years.

Our easy to use one-step tie-down is an improved design that goes on fast and holds tight through the worst weather.

Pre-paid all points • Fast UPS service for small orders • Large orders shipped motor freight

For more information or to order, call us soon. Warehouse Pickup Price 10% Less.

"CLEAN FLOW"

Stakeless Bodies

by OMAHA STANDARD

Real
GRAIN
POWER!

- 52" or 60" heavy gauge sides give you more hauling capacity for grain, sugar beets and other commodities
- "Clean Flow" design of the extra deep 30° sidewall corrugations allows complete emptying with no sharp corners for grain to hang up
- Greater inside width and length make this an ideal body for hauling bagged or palletized products
- Standard three section full opening rear doors
- Complete your "Grain Power" package with an Omaha Standard work-proven hoist. Choose from the most complete line of scissor or stabilized "Olympic" telescopic hoists
- Compare any of Omaha Standard's full line of steel, aluminum or wood grain bodies and rugged hoists - you'll know why Omaha Standard is the most respected name at work on the farm today.

ORTHO UNIPEL[®] 10-10-30

It's the uniform pelleted fertilizer
that means business.

We Recommend Unipel 10-10-30 For Top Dressing
Alfalfa After Cutting.
Can Also Be Used For Soybeans.

UNIPEL 10-10-30 fertilizer's unique pellet formulation gives your crop an excellent start, and keeps on delivering nutrients until harvest. Chemically combined nitrogen, phosphorus and potassium in UNIPEL 10-10-30 are specially balanced to meet the needs of your crop. Two kinds of nitrogen in UNIPEL 10-10-30 mean a fast start for early growth from nitrate nitrogen, then season-long feeding from ammoniac nitrogen. Water soluble phosphorus helps your crop continue to grow.

Drop by and talk to us about the way UNIPEL 10-10-30 can get your crop off and growing.

UNIPEL yields results

WE DARE LANDSCAPERS

To Test Drive Our
342 Mustang
Skid Steer Loader

With its variety of attachments — pallet forks, grapple, earth augers, trenchers and buckets — you can landscape lots, transplant trees, handle pallets of material and even dump into large tandem-axle trucks with the 342's lift height!

Complete with hydrostatic drive, it is available with either a Ford gas or Kubota diesel engine.

TAKE THE CHALLENGE AND PUT A
MUSTANG 342 TO WORK FOR YOU TODAY

Ask us for a demonstration and let us prove it:

SINCE 1865

Owatonna Manufacturing Company, Inc. — Owatonna, MN 55060

DuPont develops safer way to manufacture Lannate

LA PORTE, TX. — The Du Pont Company plant here has started up a new chemical process which produces "Lannate" insecticide and eliminates the interstate transportation and storage of methyl isocyanate (MIC), a key intermediate.

"We have made what was already a safe process even safer," said R.D. Stewart, plant

manager. "We have saved more than 100 jobs for La Porte and have assured farmers of an adequate supply of 'Lannate'."

Stewart said it took four and one-half months to build the plant and begin start-up, following construction approval by the Texas Air Control Board. The unit replaces a process step that required the addition of MIC from

storage at the plant.

The process, developed by Du Pont scientists and engineers, involves a continuous, "close-coupled" system that produces methyl isocyanate as a chemical intermediate that is immediately consumed. Thus, the MIC is not isolated as a separate raw material, but is converted into "Lannate" insecticide as it is

produced. The finished product does not contain MIC.

Farmers worldwide depend on "Lannate" to protect 70 crops including vegetables, field and fruit crops, and ornamentals, against as many as 125 insect species. "Lannate" disappears from the environment within about 48 hours of application.

Mr. Stewart said Du Pont scientists and engineers had worked on the new process for several years in an effort to find improved production efficiency. Just before the December 1984

accident in Bhopal, India, involving MIC, Du Pont perfected the new process.

"We have handled methyl isocyanate for 15 years without injury to any employee, or exposure of the environment or surrounding communities," Mr. Stewart said. "Although we have been judged presently to have a very safe process by any standard, we are always looking for ways to provide an additional margin of safety."

Du Pont's La Porte plant is the only facility in the United States that produces "Lannate".

ALUMINUM GRAIN BODIES & ALUMINUM REPAIRS

These ultra-light bodies are designed for strength through engineering, not strength with bulk. For example a 16' grain body with tailgate and 48" sides weighs only 1490 lbs. complete. We'll build you any length or any side height up to 60'.

Also available

- ★ Double swinging hay hauling tailgate
- ★ Barn door type tailgate
- ★ Slide out cattle chutes
- ★ Diamond Flooring
- ★ Pull out panel tailgates
- ★ Any size grain chute

NIPPLE NOZZLES

STINGY. GIVES YOU MORE!

and equipment requires good management. This is the focus of the totally revised MWPS (Midwest Plan Service) Dairy Housing and Equipment Handbook, which University of Delaware extension agricultural engineer Dr. Jim Scarborough strongly recommends to dairy farmers.

The handbook discusses dairy facility and equipment design based on management of milking herds by production groups. Replacement animal housing and management are treated by age groups. The publication was written by extension agricultural engineers to help dairy producers plan new facilities or remodel existing buildings.

A new chapter in the revised edition concentrates on the total dairy facility, giving producers an overview of the dairy operation, including cropland needs and housing requirements. Basic farmstead planning principles are also discussed.

Other new chapters cover replacement animal housing, special handling and treatment (including a floor plan for a veterinary handling facility), feeding facilities and utilities.

A chapter on milking centers discusses milking parlor types, layouts, and cow throughput planning data, as well as construction and environment. New management recommendations for milking herd facilities, a comprehensive manure management section, and information on insulation, natural and mechanical ventilating systems, silo capacities, feed data, and concrete are also included.

In addition, the handbook contains 27 pages of equipment plans giving construction details for bunks, feeding equipment, fences and handling equipment.

The 110-page Dairy Housing and Equipment Handbook (MWPS-7) is available for \$6 by writing: Extension Agricultural Engineer - Plan Service, Room 061, Townsend Hall, University of Delaware, Newark, DE 19717-1303. Make checks payable to the University of Delaware, and specify MWPS-7 when ordering.

MEDICATE YOUR FARM
ANIMALS ACCURATELY

■ Simple valve adjustment permits wide range of proportional settings...

- ✓ **MANIFOLD METERING:** You can tell at a glance if proportioner is operating properly. NO MORE guessing or hoping. VISUAL read out scale lets you monitor treatment instantly.
- ✓ **NO WATER SHUT OFF:** The Medi-cator will not stop the flow of water regardless of how little the flow.
- ✓ **TROUBLE FREE:** The most trouble free Medi-cator available. No troublesome moving parts to maintain. A simple clean water bath after using is all that is needed.
- ✓ **WARRANTY:** A full one year limited warranty against defective workmanship comes with each Medi-cator.
- ✓ **NO ELECTRICITY NEEDED:** You may move your Medi-cator from location to location if you prefer. The Medi-cator operates solely from water pressure ranging from 3 lbs. to 60 lbs.
- ✓ **LOW WATER FLOW?** The Medi-cator will proportion medication with water flow as low as 1 pt. per minute or as high as 4 gallons per minute. Ideal medicator for any size operation. It is totally controlled by water flow. When the flow stops the medication stops.

When you look at the facts...

Agimaster

THE SILAGE INOCULANT THAT BEATS THE OTHERS COLD!

- Speeds fermentation.
-

Winter wheat crop

HARRISBURG — Pennsylvania's 1985 production of winter wheat is expected to be fractionally above the 1984 production of 8.36 million bushels based on June 1 conditions, according to the Pennsylvania Crop

and Livestock Reporting Service. Acreage to be harvested is forecast at 215,000 with a yield of 39 bushels per acre and total production of 8,385,000 bushels.

Total peach production for

Pennsylvania is forecast at 40 million pounds, less than half the 85 million pounds produced last year. This the smallest peach crop since 1967 and the second smallest since 1936.

U.S. winter wheat production is

forecast at 1.89 billion bushels, eight percent less than 1984's production of 2.06 billion bushels. Total 1985 peach production is forecast at 2.16 billion pounds, 18 percent less than last season, but 17 percent more than 1983.

Horse-care booklets

ITHACA, NY — Cornell Cooperative Extension has three booklets on horse care.

For horse owners seeking to construct new housing or upgrade an existing building, there is a wealth of helpful hints and how-to information in a 60-page booklet, "Horse Handbook: Housing and Equipment" (MWPS-15, \$5).

This publication stresses the importance of planning by covering barn styles and layout, construction materials, manure handling, fire safety, rodent control, and ventilation, among others. It also includes plans and suggestions for equipment such as corral fences, gates, jumps, doors, and loading chutes, along with basic housing requirements.

The authors note that planning aspects are nearly the same for housing one or two animals as for a larger number.

Pastures provide space for horses to exercise freely, and if there is enough area, good pasture can furnish palatable, high quality feed.

"Pasture Improvement and Management for Horses" (IB-171, \$1.25) can assist the horse owner in getting an increase in quality forage. The authors—Cornell agronomists Robert R. Seane and W. Shaw Reid—advise on selecting appropriate forage species, seeding mixtures, planting methods, fertilization, and grazing management.

For horse and livestock owners who need new or replacement fencing, high-tensile wire fencing is worth considering. High-tensile wire fencing costs less to build than conventional fencing and lasts longer. Other advantages include easier handling, safety for livestock, low maintenance, neater appearance, and better stock restraint and predator protection when the fence is electrified.

"High-Tensile Wire Fencing" (NRAES-11, \$2) gives materials specifications and construction details, and explains the method of fencing for electrification, which can keep out deer and other pesky animals.

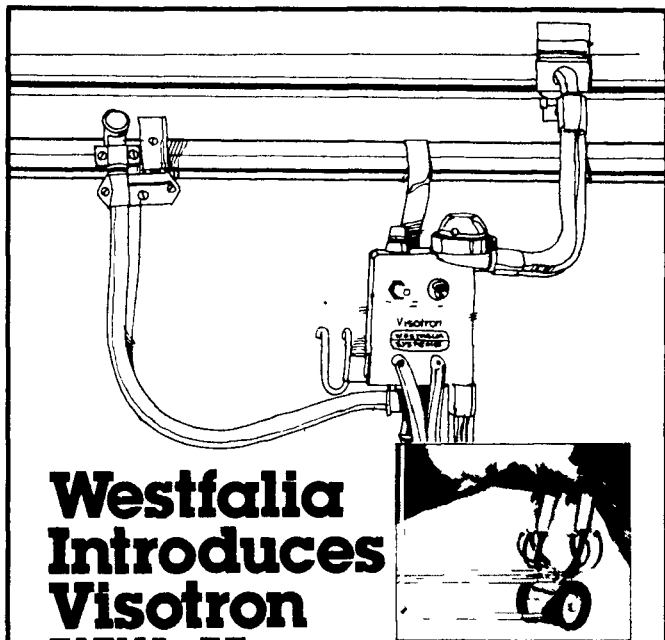

Copies of these publications may be ordered from the Cornell Distribution Center, 7 Research Park, Ithaca, NY 14850. Prices include postage and handling. Make checks or money orders payable to Cornell University in U.S. funds only.

Westfalia Introduces Visotron With Vacuum Arrestor (WESTFALIA systemat)

The new Visotron Automatic Milker Control is the foolproof modern method of doing an old fashioned job in stanchion barns. Gently tends to each cow's production needs without manual supervision. Vacustop Vacuum Arrestor controls levels between milking ratios—automatically! Foolproof convenient and totally portable—the Visotron saves you time and money. Contact your Westfalia Sales Center now and find out why the new Visotron Automatic Milker Control is today's method of handling yesterday's problem!

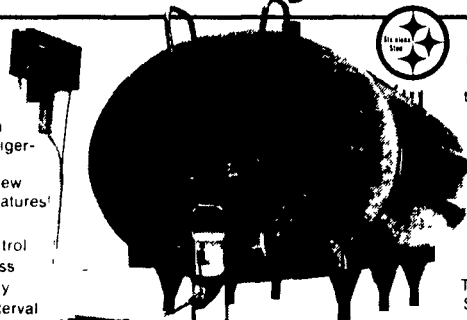

MUELLER HiPerForm

"The Ultimate Measure of a Cooler's Worth is its Performance!" ... and when you put your milk in a Mueller HiPerForm

...its like Money in the Bank!

The HiPerForm Electronic Refrigeration Washing System has a new look and new features!

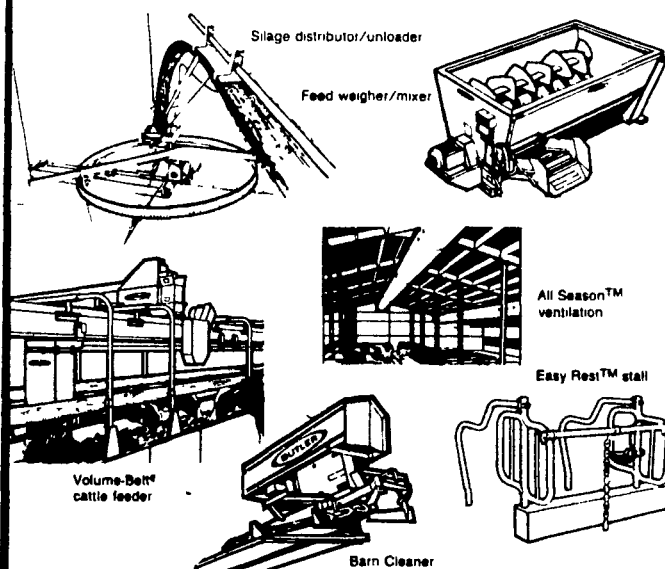

- Alarm Circuit
- Pre start Control
- Manual Bypass
- Digital Display
- Automatic Interval Agitator
- Agitate Time Switch
- Digital Temperature Readings

Mueller Model OH Milk Coolers not only look good they offer the ultimate in sanitary design and are 100% stainless steel!

FIELD SERVICE TRAINED DISTRIBUTORS offer INSTALLATION and 24 HOUR SERVICE to ensure the safekeeping of your milk!

NEDCO Releases Contracts

Six weeks behind in milk payments to members, including an advance payment on June 10 as well as a \$520,000 Producer Settlement Fund payment to Order 2 for April, the Northeast Dairy Cooperative Federation released its members' contracts to Dairylea last Thursday.

Dairylea has agreed to begin marketing NEDCO members' milk, making weekly payments to producers to provide some income as quickly as possible. In addition, Dairylea can arrange for Production Credit loans up to the value of the delinquent payments for producers who want them.

Dairylea recently purchased the fluid milk business that NEDCO was serving from its Fultonville, N.Y. plant, but has not agreed to buy any of the NEDCO plants. NEDCO members are not required to join Dairylea, but those who do will have the opportunity to participate in the advance payments and loan program. It is an effort by Dairylea to provide income quickly for the affected producers as well as get additional milk for its own marketing program.

Other cooperatives and

proprietary handlers will no doubt also be interested in getting some of the NEDCO members when their contracts end.

Because NEDCO was a federation of 61 cooperatives with 2,700 producers, it's difficult to generalize on how all the producers will fare. Many have left the federation during the past year because of the financial difficulties of the cooperative, but it is estimated that there are at least 1,200 who are still members.

Because of the federated organization it's uncertain if the security funds in New York or Pennsylvania can be used for partial payment. In addition, NEDCO is still a business entity owning processing plants in Middlebury Center and Frazer, as well as Fultonville. Most of the Pennsylvania members are centered in Potter, Tioga and Bradford counties, but by far the largest number are in New York.

Letters were mailed to all members from the NEDCO offices in Syracuse last Friday informing them of the action of the directors and the arrangements made with Dairylea to provide some immediate income. Dissolution of the cooperative sometime in the future

seems certain, but how much can be realized from the accounts receivable and the sale of the property after the debts are paid is not yet known.

Members need to be certain of their position in sharing whatever funds remain after the dissolution, before changing contracts. It's a new situation in many respects from the failure of a proprietary business, and members should be alert to information from authoritative sources before making decisions.

Costly Failure

All of the producers shipping to Order 2 handlers will be sharing in the financial difficulties of NEDCO at least temporarily. Because of the failure of NEDCO to pay \$520,276 as its share in the Producer Settlement Fund for April, the uniform price to all producers was reduced five cents in May to \$11.78. The Market Administrator is required to maintain an unreserved cash account in the pool of approximately. As the payment is recovered, the money will be returned to producers with increases in the uniform price in the next few months.

The \$11.34 for May milk in Order 2 is a drop of 41 cents from April and 48 cents from last May. Louisville Plan payments increased from 30 to 40 cents over last month. Class I utilization was off 2.3 percent from last month, but about the same as last year because shipments were down 40 million pounds, or nearly four percent.

The biggest drops, however, came from the Minnesota-Wisconsin Price Series that took 16 cents off of both the Class I and Class II prices in May. Even without the five cent cut because of NEDCO, the \$11.83 would have been the lowest price for May since 1979. With the M-W down to \$11.46

in May the price has dropped 49 cents following the 50-cent cut in the support price in April. However, the M-W is still 34 cents below the support price, so we can expect further cuts in class prices the next two months.

We may not see the normal seasonal price increases in late summer and early fall with another 50-cent support price cut due in July. Even lower feed prices and a good growing season may not be enough to make ends meet this year.

Market Area Expansion

The final decision on the expansion of the marketing areas of Order 2 and Order 4 is expected soon. The recommended decision was issued March 5 and the time for comments and briefs ended May 10. The next step is a final decision, followed within 30 days with a referendum of all affected producers in the new order. Those voting will be the producers shipping to Order 2 or Order 4 handlers in February 1985. It's possible that you could have two new Federal Orders by August, but

more likely by September, unless they are contested.

The new orders, call for an expansion of the Order 4 marketing area into five more Pennsylvania counties, including Berks, Carbon, Lehigh, Northampton and Schuylkill. The Order 2 marketing area would include 15 new Pennsylvania counties from Bradford, Lycoming, Union, Montour and Snyder in the west to Pike, Monroe and Wayne in the east.

In addition to producers who are now shipping to Order 2 and 4 handlers, those producers shipping to handlers in Pennsylvania who would be regulated by the new order will be included in the referendum. Block voting by cooperatives for their members is permitted. Other producers will receive individual ballots.

Because of the large number of potential new producers voting, the usual 30-day period for returning ballots may be extended. As in the past, the decision will be between the new marketing orders or no Federal Orders as they exist now in the present marketing areas.

"Make it Milk" day slated for June 30 in Pittsburgh

PITTSBURGH — Thousands of baseball fans and milk lovers will join forces to sing the praises of America's favorite game and beverage for the "Make It Milk Day" with the Pittsburgh Pirates, Sunday, June 30, at Three Rivers Stadium.

The day's festivities get underway at 1:15 p.m. with a pre-game Celebrity Cow Milking Contest on the field. Players from the Pirates and game rival Chicago Cubs will compete, along with several Pittsburgh area media personalities. The Pittsburgh Parrot will judge the contest assisted by Pennsylvania

Dairy Princess Lynette Loper.

June 30 is also "Jersey Day" at Three Rivers Stadium. The first 12,000 children, ages 14 and under, will receive a "Bill Mazeroski, Make It Milk" souvenir jersey.

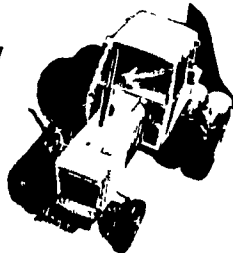

The day is sponsored by the Pennsylvania Dairy Promotion Program, in cooperation with the dairy industry of western Pennsylvania. Discount coupons for "Make It Milk Day" may be found on milk carton side panels of participating dealers. Donald Duncan, chairman of the PDPP, will throw the game's opening pitch.

Brockett's Ag Advice

By John E. Brockett
Farm Management Agent
Lewistown Extension Office

Heifers raised on pasture

Pasture is an inexpensive way to raise heifers-MAYBE. It can be, but if dairymen don't follow some common sense or get into too much of a hurry, it also can be a very expensive way to get replacement animals.

The advantage of pasture is that the animals harvest their own feed. This saves harvest, storage, and handling costs. Theoretically they also take care of their own waste disposal, which of course saves labor. However all of these savings will go out the window if you "goof up".

Insect Control: To get the most value out of pasture, pestiferous insects will have to be at least partially controlled. Back rubs, systemic insecticides, cool shady places, natural ventilation, and regular pesticide applications are all ways to help those heifers fight the pests. See your county agent for the recommended pesticide for your area.

Water: When the weather is warm, other animals are just like you-they require more water than when it is cool. If that water is stagnant or bad-tasting, they will not drink as much as they really need. They also may pick up disease organisms. Either way they will not grow as well as they should.

Shade: Shade helps in more than

one way. First many of the insect pests that torment animals do not like shade so will be less obnoxious than they are in the light? Second how do you like staying out in the hot sun all the time? Your animals feel the same way. Some of you will say "I have to work out in the sun to gather feed for those critters so let them stay out under the same sun I have to work under". How often do you stop momentarily to relish the cool breeze you get under that favorite shade tree?

Supplemental Feed: Usually supplemental feed in the form of hay helps heifers make better use of pasture. As summer progresses, you may want to add some grain feed. Pasture that looks good to you may not have the nutrient value to it that you think-result would be low growth rates and possibly poor heat periods and low conception rates. Even if your pastures are real good, the heifers will probably eat and utilize to advantage the supplemental hay you feed them. Feeding hay and/or grain also forces someone to observe the animals on a regular basis.

Salt and Minerals: A salt and mineral box could provide your animals with two things. First would be supplemental minerals that they usually will not get from the pasture. Second, this would be

one way of treating them on a regular basis for pest control. You can build your own box or buy a good commercial box. Of if you allow them to come into a Free Stall barn or other type of housing you could put the minerals inside. At any rate they should be protected from weather (rain).

Observation: Many times farmers put heifers out to pasture then forget about them until it is time to bring them back in for the winter. That is foolish. Would you think that your banker was doing a good job of caring for your money if he put it out on the street, then hoped it did not walk away? Think of those animals as money not as a necessary evil. Take care of them as you would cash. Observe them, make them grow, be prudent, and respect them for the assets they are.

One time I can remember a farmer leaving heifers out from May until October without ever visiting them once. They were like wild animals. Several of them broke out when he went to put them in for the winter. Three of them got up into the mountains. They were up there all deer season, then through the holidays. He thought they would come down when it snowed, but the animals had become acclimated to wild living and did not need him or his feed. He finally fed them tranquilizers to capture them. Result-they died from overdose. As the result of lack of observation, the farmer lost assets just as surely as if he had taken \$100 bills out and burned them up.

Another time a farmer called me to ask what caused his heifers to

die. I went to look at them and found that they had been dead for quite some time-they stunk. That made it more difficult to pinpoint the problem. It was probably wilted wild cherry leaves because there were wild cherry trees in the pasture, but after a month or so who really would know without autopsying them.

Observe to see if

- they are coming into heat
- any of them are sick,
- any of them are hurt or have pink eye or need new ear tags, you are getting satisfactory pest control, they are all there.

Observation also gets them used to being with humans so they won't revert to the wild. Remember, you have from \$400 to \$1200 invested into each one of those little critters.

New test detects nitrate

CHERRY HILL, NJ — Crops, soil and water can now be tested for the presence of nitrate fertilizer in two minutes or less with the EM Quant Nitrate Test Strip.

Neither chemicals nor knowledge of chemistry are required to perform the two simple steps of the test: dip and compare color change, with furnished color scale. Benefits of the test are crop yield maximization, crop quality enhancement and reductions in fertilizer cost and run-off.

EM Quant Test Strips are 3 x 1/4 inch flexible plastic strips to which 1/4-inch square reaction pads are affixed. The reaction pads are sensitized with all the reagents and buffers necessary for analysis.

A color comparison scale, with graduations of 0 - 10 - 30 - 60 - 100 - 250 - 500 mg/L (ppm), is part of the label. The unit of measure also corresponds to mg/kg of nitrate in crops and kg/ha nitrate fertilizer

in soil samples. These convenient relationships permit immediate decisions on top dressing requirements in the field without the need for time-consuming, costly laboratory analysis.

EM Quant Test Strips are used routinely on several continents and have recently attracted the attention of soil scientists in the U.S. Comparative evaluation of results obtained with the test strips and colorimetric laboratory method showed close agreement, between the two methods and among different operators.

The test strips are safe to use and handle especially when compared with the traditional field test that uses Gries Reagent, composed of strong sulfuric acid and carcinogenic alpha-phenylamine.

To determine the nitrate content in crops, a fraction of a drop of sap is squeezed from the petiole or

other appropriate part of the plant with the aid of a kitchen garlic press or a pair of pliers and transferred to the reaction pad on the test strip and the color intensity measured after two minutes.

Soil samples are tested in a similar manner after samples have been taken from appropriate locations and depths, diluted with water and stirred thoroughly. Diluted soil samples may be filtered or tested after the soil has settled. Tests can be performed on turbid samples.

To test water in wells, irrigation ditches, lakes and streams merely dip, remove and compare color with comparison scale after two minutes.

Samples with nitrate concentrations in excess of the color comparison scale require dilution or a calibration curve.

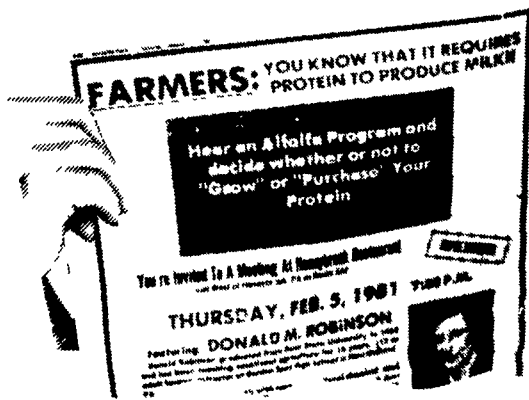

Other EM Quant Test Strips for the estimation of ammonium, ascorbic acid, calcium, calcium/magnesium, potassium, sulfates and zinc among others are available.

A brochure that describes all EM Quant Test Strips is available from EM SCIENCE, 111 Woodcrest Road, Cherry Hill, NJ 08034-0395 and most national and regional Chemical Reagent Distributors. These firms also supply the Quant Nitrate Strip, Item #10020-1, 50 test strips per package, price \$12.90.

Farm Talk

by
Jerry Webb

Dust off the windmill!

No machine was more respected around my boyhood farm home than the windmill. It was treated with respect, cared for regularly, and praised for the useful work it did.

When the wind blew, it pumped water. Water that was needed for the livestock and drinking water for the house. And when the wind didn't blow that meant another job for the boys to perform. Hours of hard pumping on a deep well just to keep the stock tank full.

There were those lazy summer days when not a breath of air stirred and the windmill just stood there. A silent reminder of the work that must be done.

The windmill sort of lost its place of importance in American agriculture about the time electricity came to most farms. A small electric motor would pump water and do so many other things and it didn't really cost that much. And so the windmill was left to rust and rot and fall down as so many of

them have.

Now most windmills are regarded as antiques and are looked upon as some sort of rural status symbol by those farm families who have been on the land long enough to have owned one.

That may be changing. Researchers in the U.S. Department of Agriculture and other federal agencies have been reinventing the windmill. A bunch of manufacturers in several countries are commercially producing windmills capable of making electricity, pumping water, and doing other useful work. And a Federal Energy Administration report indicates that windmill sales have been booming over the last decade.

Several U.S. manufacturers are trying out prototype systems in the two-to-15 kilowatts range. Out west, Department of Agriculture scientists are finding that windmills can replace electric motors for a large share of the irrigation

water pumping that's so needed in the Great Plains area.

In one Texas test the average wind speed is 7.1 meters per second year-round, providing an ideal climate for a windmill that will pump water to irrigate dry land agriculture.

History credits a chap named Paulo with introducing windmills into Rome before the time of Augustus. They were used for grinding grain.

At about 150 B.C. windmills helped provide music by powering the pistons of air pumps used in organs. History dutifully records the development of the windmill from a very simple, crude machine to a much more sophisticated model used in the U.S. in the late 1800's for threshing grain and doing other work.

That particular model was built right into a large barn and was attached to drive a pulley that powered a variety of machines. But then small gasoline engines came along and the windmill was relegated to a less important position, primarily pumping water.

Not much more was done to tap this vast source of energy until a few years ago when people started worrying about an energy crisis. Now money is being spent to turn wind energy into useful power.

The feeling of wind researchers is that wind power may offer an economical alternative energy resource to farmers, if the cost of wind systems can be reduced.

There's always that problem of having a job to do and no wind available and there's the additional problem of the tremendous demands of agriculture at peak times.

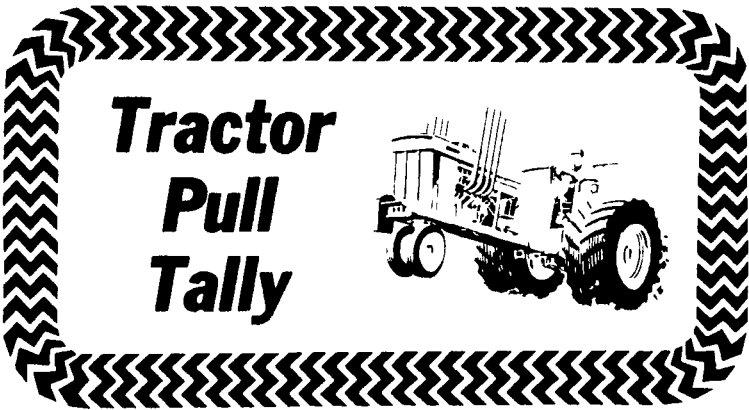

So maybe windmills will never replace other forms of energy completely, but the researchers believe they will provide an alternative and a very valuable

supplement. One hitch in the windmill business is the storage of electrical energy. As one industry spokesman points out, batteries haven't been improved much since the 1920's. A breakthrough in storage technology would go a long way toward making wind-generated electricity a reality on American farms.

The neatest windmill irrigation system I've heard of was operated several years ago in Texas. In that installation, a windmill pumped water from a well into an overhead tank. The tank was tied to an underground trickle irrigation system. Pressure was provided by the height of the storage tank

So all the system needed to work was some wind. When the wind blew the tank filled and the trickle irrigation system kept an otherwise barren piece of ground producing lush pasture for Texas beef cattle. It operated 24 hours a day and required virtually no supervision or maintenance.

Wind power, like steam power was passed over in favor of other choices many years ago. Fossil fuel was plentiful and both wind and steam seemed less useful. But in the future that may not be the case. Its fortunate that some wind research is underway - updating 2000 year old technology for the next century.

Grape field day

SPARKS, MD -- The Maryland Grape Growers Association will sponsor a series of discussions on viticultural practices at its annual field day Saturday, June 29 in Hartford County.

Experts from the Agricultural Extension Service will be on hand to discuss various aspects of grape growing, and experienced growers

will comment on grape varieties which do well in Maryland.

The sessions will run from 9 a.m. to 4 p.m., and are open to the public. For further information and locations, contact Everett Ingles, 14300 Old Frederick Road, Sykesville, Md. 21784, telephone (301) 854-6386.

MILK... A SUPERNATURAL RESOURCE

Cheddar Cheese Log

1 package (3 oz.) cream cheese, softened
2 cups (8 oz.) shredded Cheddar cheese
1/4 cup pitted chopped ripe olives
2 tablespoons chopped pimiento, drained

Yield: 1
2 tablespoons chopped green pepper
1 teaspoon Worcestershire sauce
Chopped slivered almonds
Sliced apples

Beat cream cheese until fluffy Beat in Cheddar cheese Stir in olives, pimiento, green pepper and Worcestershire; blend well Shape into roll on waxed paper Coat well with almonds Cover and chill several hours to allow flavors to blend Allow to stand at room temperature about 30 minutes before serving with assorted crackers Decorate apple fans.

Look for the REAL Seal Your assurance of a REAL dairy food

Classic Butter Cookies

Yield: 7 to 8 dozen

1 cup (2 sticks) butter
1/2 cup sugar
1 egg
1/2 teaspoon almond extract
2-1/2 cups all-purpose flour

Cream butter in large mixing bowl Gradually beat in sugar until light and fluffy Beat in egg and almond extract Gradually blend in flour Chill dough for ease in handling. Preheat oven to 350°F Roll dough out on lightly floured surface to 1/8-inch thickness Cut into desired shapes using floured cookie cutters Place on unbuttered cookie sheets Bake 8 to 12 minutes, or until golden Remove to wire racks to cool completely Decorate as desired

VARIATIONS:

Spritz: Make dough as directed Do not chill Fill cookie press. Use star attachment and form dough into circles or "S's" on unbuttered cookie sheets Bake as directed

Gumdrop Cookies: Make dough as directed Stir in 1 cup cut-up gumdrops (omit licorice) and 1 cup flaked coconut Do not chill dough Drop by rounded teaspoonfuls onto unbuttered cookie sheets Bake as directed

Look for the REAL Seal Your assurance of a REAL dairy food

"5100 Special"

Outstanding accuracy begins with IH feed cups that deliver seed uniformly. Dual rib press wheels then compact the soil around the seed and gently "pat" the top to prevent air holes. Result uniform germination and emergence a start toward higher yields.

TRUCKLOAD SALE ON LOADERS

Will Fit All Model Case Tractors & Other Brands

Great loaders for great loader tractors.

Prices You Can Afford

The 56L Quick-Tech loader (below right) for Case 1194, 1294 and 1394 tractors is easy to put on and take off. Smooth handling. It's available with many practical attachments to make it excellent for dairy/beef operations.

74L Quick-Tech loader (below left) will speed you through feeding and cleaning chores. Quick and easy to put on or take off. Big capacity. Fits Case 1494 and 1594 General purpose tractors including models with mechanical front drive and the model 1394 with MFD. A variety of attachments match the 74L to field and barnyard material handling.

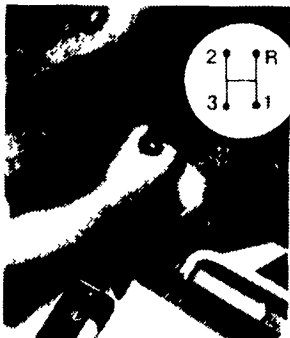

Tractor features like low effort steering, grille-top front lights, standard differential lock, hand and foot throttles, 12 speed power shift or 12 speed synchromesh transmission make the new Case General Purpose models ideal for dairy and beef operations or for general loader use. Add optional MFD (Mechanical Front Wheel Drive) with front wheel limited slip differential and differential lock on rear wheels and you're close to the ultimate in loader units.

Both hand and foot throttles are standard. Foot throttle for headland, travel and loader work. The hand throttle for day long field operations.

Differential lock (standard) lets you direct power equally to both wheels when one wheel starts to slip to keep moving through slippery or difficult conditions.

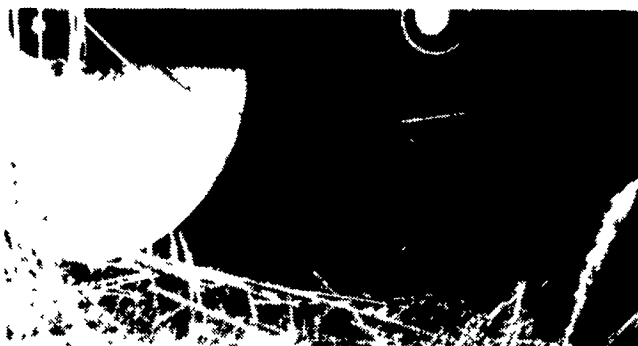

Case 12-speed synchromesh transmission is standard on 1194, 1294, 1394, 1494 and 1594 tractors. You can shift on-the-go in 2nd and 3rd gears in each range. First and reverse in straight line are especially handy for loader work. Case 12 speed power shift available on 1394, 1494 and 1594 models (optional).

MODELS IN STOCK: 54L, 56L, 74L

**FAST-CURE
HAYMAKER!****Case International
1190 Mower Conditioner**

You'll preserve more nutrition when you cut fast, crush and
crimp hay the 1190 way. Crop feeds straight in, even on rough
ground, since rolls are mounted on the header, not on the
frame.

- 7 and 9 ft. sizes
- Over the top frame design for unrestricted hay flow
- Long wearing full length conditioning rolls
- Clear slugs from your tractor seat

CASE INTERNATIONAL® 84 SERIES

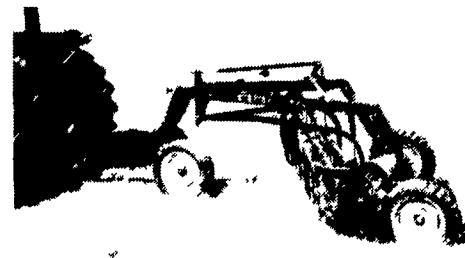

THEY DO BEST WHAT YOU DO MOST

• CUT • RAKE • BALE

Tractors: 42.4 to 72.9 PTO HP

445 - offers top performance in hard-to-bale crops such as cane, millet, sudax. With 65-in. 6-bar pickup with 120 teeth, gauge wheel. Heavy-duty 3-knuckle PTO.

Full width swaths. The 1190 makes exceptionally uniform, full width swaths to promote faster drying in heavy or stemmy crop conditions. Or you can easily make "in-between" swath/windrow adjustments.

Clean raking results. The 96 and 97 rakes have cushioned baskets and three wheels for the ultimate in clean raking performance. The staggered wheel design places tires close to the basket to act like gauge wheels so teeth hug the ground. This also helps extend tooth life.

TRACTORS, MOWER CONDITIONERS, RAKES & BALERS

NO. 1 DAIRYING DIESEL

AT
1968
PRICES

Since 1968
F2L-912 diesels
have earned the
reputation as the
most reliable
diesel.
Don't settle
for less.

2 Cyl. F2L-912

EASIER STARTING: Heavy flywheel provides easy starting. No electric heater plugs.

QUIETER: Runs quieter than most water cooled diesels. Very quiet exhaust.

F2L-912 SPECS: 20 Hp @ 1500 RPM
25 Hp @ 1800 RPM
32 Hp @ 2300 RPM

It has direct injection, lube oil cooling, and oil cooled pistons. This engine has proven to survive the extreme heat of a heavy load in a small engine house better than any other engine.

The secrets to Case International Axial-Flow Combine success in the East...

FEWER MOVING PARTS... HIGHER QUALITY GRAIN... HOOBER COMBINE SERVICE...

BUY YOUR NEXT COMBINE FROM C.B. HOOBER & SON, INC. THE AXIAL-FLOW SPECIALISTS

The one moving part in Axial-Flow's entire threshing/separating process is the single large-diameter rotor. Nothing more. No cylinder, beaters or straw walkers. There's far less that can break or need maintenance. That's Axial-Flow combine simplicity.

Axial-Flow helps bring top price at the elevator. It handles grain more gently. Less crackage and dockage. You'll combine higher moisture grain at faster ground speeds for a quicker harvest. That's Axial-Flow performance.

Axial-Flow Combines for every crop. Designed to harvest over 100 different crops including corn, soybeans, wheat, sorghum and others. All popular grain header sizes plus 4 to 8-row corn heads.

HOOBER COMBINE SERVICE SPECIALISTS KNOW COMBINES. For nine years Hooper's 3 combine mechanics have been working with Axial-Flow technologies. **A COMBINE BOUGHT FROM HOOBER IS BACKED BY PEOPLE WHO KNOW AND CARE.**

NEW FORAGE-MAKING EFFICIENCY

**Double up two 9-foot swaths with a
John Deere Double Windrow
Attachment**

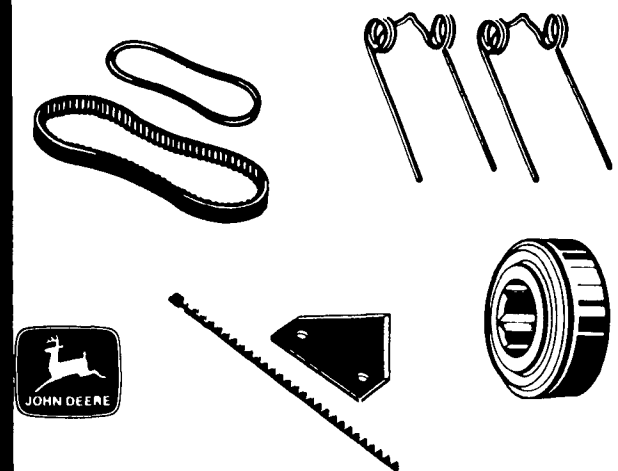

This hydraulic conveyor fits easily onto your 9-foot John Deere 1219 Mower/Conditioner. Lays 18 feet of conditioned hay into a big double windrow up to five feet wide

The Double Windrow Attachment is perfect for the forage operator who wants to fully use his forage harvester's capacity. The huge hay volume lets you operate at slower ground speeds and with improved efficiency. Cuts the number of trips through the field to save time and harvesting costs and reduce soil compaction. Find out more about this innovation that's sure to improve your forage harvesting efficiency. Stop by today.

**Good Fit. Great Cutting
Action. Right Price.**

JOHN DEERE HAY TOOL PARTS

During hay season, you can't afford to lose time replacing worn parts. Check your machines now. Then see your Parts Pro for replacement parts. You'll like our new low prices. Stock up on bearings, belts, pickup teeth, knives and sections — razor sharp and evenly ground. We have all the parts you may need. Stop in soon. For precise fit and like-new cutting action at a good price, count on John Deere hay tool parts.

SALES & SERVICE for AC, KUBOTA, HESSTON, BRILLION, STARLINE, NEW IDEA

THE PERFECT TEDDER FOR YOUR HAY.

Speed and efficiency and a full range of working widths make these Vicon tedders the perfect match for your mower. A Vicon tedder can cut at least a day off the drying time of your crop. Plus, these units fold easily for transport. See your Vicon dealer for more information.

Harvest Time SPECIAL VALUES ON THESE HARVESTING MACHINES

LEVEL YOUR SLOPES

SideHill 6620 Titan II features reversible feeder house to save more grain on slopes

Harvest even more of the crop from your slopes with a SideHill 6620 Titan II Combine. It levels automatically, keeping crop spread out over the entire width of the walkers and cleaning shoe, to give you more aggressive cleaning action.

There's more shoe capacity too. The shoe is 11% larger and shakes 20% faster providing a larger cleaning area plus faster crop movement.

Standard equipment includes an engine-powered reverser. Controlled from the Sound-Gard® styled cab, it uses engine power to reverse the feeder house and platform, so you can quickly back out troublesome plugs.

See us. Ask about the SideHill 6620 Titan II that automatically levels on slopes up to 18 percent. It represents John Deere's highest level of combine refinements.

NOW

2900 Gal Tank w/Easy Loader

(Patent Pending)

You can haul liquid Manure all day without
getting off the Tractor Seat using the
SLURRY BUGGY Easy Loader

- 1) Back up to pit or lagoon. Lower easy loader (boom) from tractor (by hydraulic)
- 2) Engage PTO Switch pump to vacuum
- 3) Float level indicator shows when tank is full
- 4) Stop PTO Raise boom and head for the field
- 5) In field Switch pump to pressure. Start PTO. Open Valve and unload

**A liquid manure spreader that loads and unloads
and has no chains, bearings, fans, augers, or
moving parts that touch manure.**
For more information call or write.

\$11,200

The Model 411 Discbine™ disc mower-conditioner keeps on going, even in your toughest crops. Six discs make a 10-foot wide cut. They'll mow through fire ant hills and gopher mounds; and slice under down, tangled crops. Seven-foot wide intermeshing rubber rolls condition your crop gently and thoroughly for faster drying. You can lay down a wide swath or switch to windrow in seconds without tools.

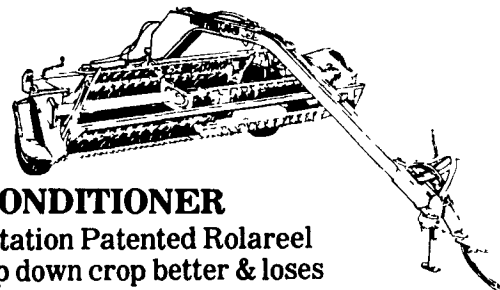

*We Won't Be Beat
On This One!*

MODEL 499 PIVOT TONGUE 12 FT. MOWER CONDITIONER

- Independent Flotation Patented Rolareel Header (picks up down crop better & loses less leaves than auger types)
- Hydraulic Guard Angle
- Dual Sickles - less vibration & wear
- Chevron Design Conditioning Rolls - incomparable conditioning

**TORQUE AMPLIFIERS, ETC.**

Serving Customers in 20 States Coast to Coast.

Complete TA assemblies for 706 1586 are priced at \$595 and come with a Dana Co Heavy Duty Sprag instead of the usual IH sprag. The Dana sprag is guaranteed for 2 years against failure. Sprag kits (includes sprag gear, Dana sprag, and piston carrier) and all items for rebuilding your own TA are available to qualified persons. Ramps and carriers for the older style TA's (as in SMTA 340, 560) are priced at \$150 each and carry a 90 day guarantee. We have all the parts needed to rebuild your TA in stock at prices that will save you money. We also have a shop available for complete TA installation. Or, you may split your own tractor and bring the center housing to us, which we can rebuild while you wait (approx. 4-6 hrs.). We also stock New and Rebuilt Water Pumps, Dynlife Clutches, Pressure Plates, and PTO Drive Gears, (Spline fit into pressure plates) for most IH tractors and combines.

— QUALITY USED PARTS —

We buy and sell used parts and parts tractors. We have a good selection of quality used parts at competitive prices. Please have part no. when calling, if possible.

ATTENTION FARMERS Strengthen And Reseal Your Silo With Shotcrete

*S & S Silo Service Has Experience
Over 160 Silos Have Been Relined With Shotcrete*

S&S Silo Service prepares the silo surface by using a 3,000 lb. pressure washer, thus making the silo moist, making a much better surface to bond

shotcrete. After shotcreting, S&S always takes away any roughness by applying a steel trowel finish.

The excellent bonding of shotcrete to the silo will keep out moisture and prevent mold from growing on the side of the silo.

The NEW Silo-Matic 9200 UNLOADER

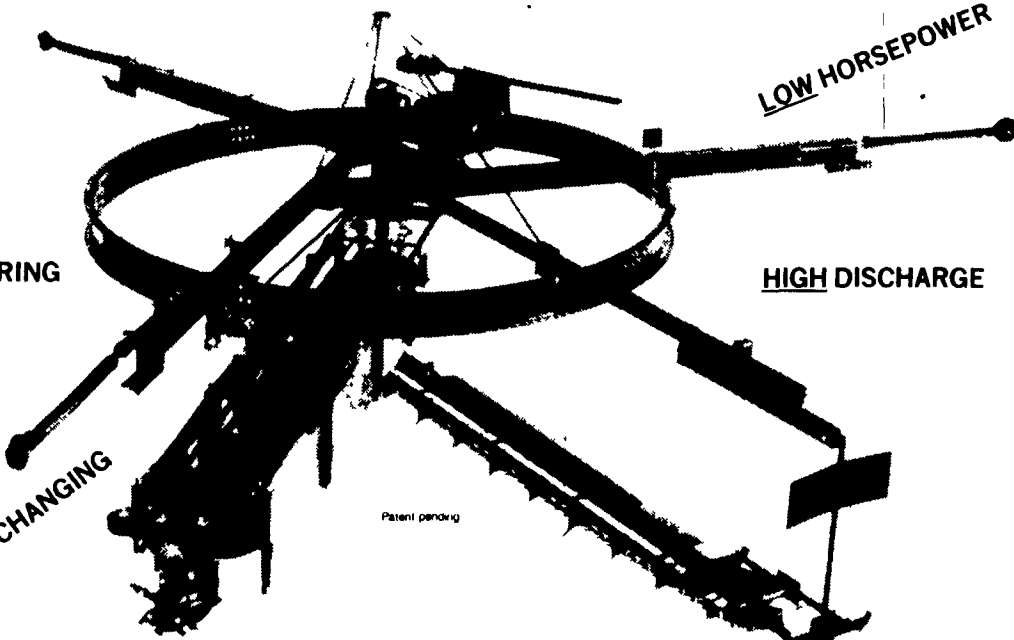

NO BLOWER

LOW HORSEPOWER

NO COLLECTOR RING

HIGH DISCHARGE

NO DOOR CHANGING

Patent pending

The main gathering auger is heavy duty 16" diameter, with 5/16" flighting mounted on a 4" tube. The auger has adjustable front and rear 14 gau. galvanized shields,

for maximum capacity. The auger is powered by a 60 lb. gearbox which brings forage to the center for the delivery chain.

To deliver the high volume of forage from the sweep auger to the inside chute, a heavy duty hook chain with hardened cutters is used to convey the forage. The stainless steel top shield is easily removed to adjust the chain if needed. The plate and V pipe keep the delivery chain positioned over the inside chute in the forage.

R.D. 2, Narvon, PA 17555

717-354-4374**May-Co
Silo Liners**

In fermenting crops, such as alfalfa, corn, sorghum and high moisture grains, certain bacteria change carbohydrates into organic acids, principally lactic and acetic acids. These acids are nature's own food preservatives and mold inhibitors. When enough of these milk acids are produced, the fermentation stops and the feed is preserved. However, the bacteria that make these organic acids do not grow in the presence of oxygen. The flow of oxygen can be eliminated by installing a MAY-CO SILO LINER inside your silo, which also eliminates juice run-off. In an oxygen free ferment, the silage will not freeze to the silo wall, will not shrink, will not mold or heat between feeding even in hot weather, and will produce more T.D.N. and Digestible Protein without an additive

**Main Features of a
Sollenberger
Bottom Unloading
Silo**

- 6" Solid Concrete Wall
- No Drying Expense
- Reduced Shrinkage and Spoilage
- Continuous Filling and Feeding
- Lower Field Losses
- Lower Feed Cost

Since the early 1900's, Sollenberger Silos has been designing and constructing monolithic concrete silos. Always concerned with quality construction, Sollenberger continuously strives to improve their products as engineers study and design new innovations for strength, utility, and efficiency.

With local dealer-representatives throughout the Mid-Atlantic area, we can continue to provide these quality silos to a large number of farmers.

Before you buy any concrete silo compare Sollenberger's quality construction and features. Every Sollenberger Silo has full 6" solid steel reinforced quality controlled concrete walls. Compare this with other concrete silos. Our thicker stronger walls help silage remain at a relatively constant temperature resisting freezing and heat damage resulting in less spoilage and better silage.

**Sollenberger Silos Corp.**

BERG

"Feed Express"

BELT FEEDER/CONVEYOR SYSTEM

- NEW, simple design cuts installation,
operation and maintenance costs!
- NEW versatility handles all feeding
and conveying needs, in barn and out!
- NEW, deep-trough capacity moves
lots of feed, fast with no separation!

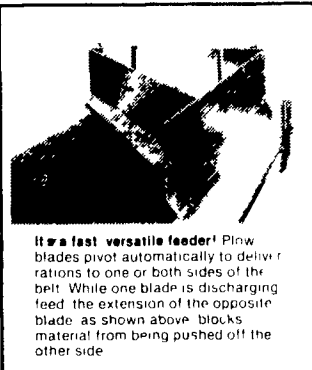

All belt feeders are not alike - and now Berg
proves it! Berg's new Feed Express Belt Feeder/
Conveyor System brings you many exclusive, cost
efficient advantages that give you more for your
money when you install it and save you time, work
and money when you use it.

Special discount on orders taken
month of June

Robert Gutshall

R.D. #1, Box 212, Womelsdorf, PA 19567

717-933-4616

It's a fast versatile feeder! Plow
blades pivot automatically to deliver
rations to one or both sides of the
belt. While one blade is discharging
feed the extension of the opposite
blade, as shown above, blocks
material from being pushed off the
other side.

*Bob Truckenmiller and David Ulmer
have some of the top herd averages in their
counties. They also have something else in com-
mon: a desire to maintain those averages, to get
better utilization of their grain, and to maintain or
improve profit levels. They chose to do this by
adding Long corruglass high moisture corn silos.
John Hefty Systems thanks David and Robert for
putting their confidence in us and in Long. Watch
for our Open House/Construction Bees so you can
see for yourself.*

MANURE HANDLING EQUIPMENT

Waiver of Finance on all Liquid Manure Equipment and Conventional Spreaders till October 1, 1985

SPREADERS

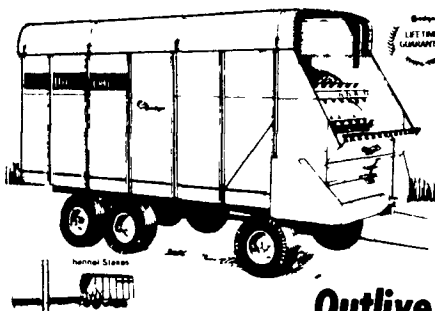

- Higher truck capacities
- 5-speed hydraulic apron drive
- "Superslick" decks
- Lifetime warranted decks and sides
- Aggressive, widespread beaters

Built stronger to last longer!

WAIVER of FINANCE on MOWER/CONDITIONERS and FORAGE BOXES till JANUARY 1, 1986 or CASH REBATES up to \$450.00

The Best Forage Box You Can

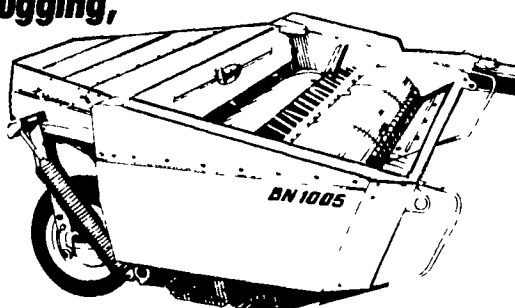

Buy Is Built By Badger Here's Why Badger Boxes Outlive Other Brands!

- Badger is one of only a few who build their own complete units — quality control is controlled
- Tough all steel structural frame
- Marine grade plywood sides and floors with original owner lifetime guarantee!
- Heavy-duty pintle chain main apron and cross-conveyor
- Simple chain drive for beaters and apron
- Easy maintenance
- Enameled roof with roof edge protector
- Options to suit you! High speed unloading kit/rear unload/cross-conveyor extension/hydraulic drive.

Badger's Mower/Conditioner...

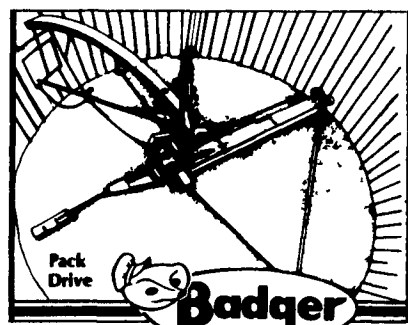

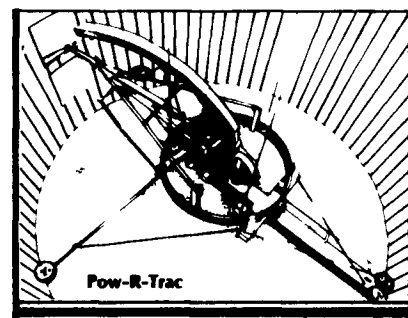

Ground Hugging, Clean Cutting Efficiency At It's Best!

Badger's Mower/Conditioners are quiet, solid running, heavy-duty units designed to get all of your valuable forage crop without overconditioning.

Built rugged for less maintenance, longer life. This unit features an adjustable dial hitch reel speed and tooth pitch. Wheel to cutter bar distance is only 38" to follow ground contours and get all the crop. Unitized header dampens high speed bounce.

Nicole High and her N.J. Preview Show grand champion steer.

Pa. entries dominate NJ Preview Show

HARMONY, N.J. — Pennsylvania exhibitors figured heavily in the winners circle at the second annual New Jersey Junior Preview Show held at the Warren County Fairgrounds on June 9.

The grand champion Angus heifer was shown by Emily Weaver of Ephrata. Campaigning a High Guy daughter from Rally Farms, Millbrook, N.Y., Miss Weaver also took reserve champion honors in the overall heifer show. The reserve champion Angus female was shown by Charles Stivers of Pittstown, N.J.

Topping the overall heifer show was Jackie Heflick of Bethel, Pa., who also took both champion and reserve honors in Hereford competition.

The Fisher brothers, Kirk and

Kent, of Oley, Pa., swept the Charolais show, taking grand and reserve honors, respectively.

In steer competition, Nicole High of Lititz, Pa., emerged victorious in the Angus show with her April purebred Angus calf named J.R. Miss High's entry then went on to be named grand champion overall. Showing the reserve champion Angus steer was Cory Eick of Newton, N.J.

A steer exhibited by Kirk Fisher took top honors in Charolais competition, and finished behind High's steer as the reserve grand champion overall. The reserve champion Charolais was shown by C.G. Higgins of Princeton, N.J.

In the crossbred steer show, Jodie Weaver of New Holland, Pa., exhibited the champion, with

Robert Hasselbrook of Flemington, N.J., taking reserve honors.

Placing the field of 56 entries was Rodney Gilbert of Delaware Valley College. The event was jointly sponsored by the New Jersey Junior Charolais, Angus and Hereford Associations.

Following are placings in showmanship competition:

Beginner division: 1.Scott Hill, Ringoes, N.J. 2.Charles Stivers, Pittstown, N.J. 3.Jim Scherer, Belle Mead, N.J.

Intermediate division: 1.John Harnett, Blairstown, N.J. 2.Jodie Weaver, New Holland, Pa. 3.Kristin Chupp, New Holland.

Senior division: 1.Kent Fisher, Oley, Pa. 2.Cory Eick, Newton, N.J. 3.Jacqueline Heflick, Bethel, Pa.

Aquaculturists inspect catfish in fish raceways at Pennsylvania Power and Light Company's Brunner Island power plant near York Haven.

A new market for leaker eggs?

UNIVERSITY PARK — Leaker eggs, once considered a worthless commodity in egg production, are now the subject of research as a food for commercially grown fish.

Leakers are those shell eggs that are cracked through to the internal liquid. In combination with other inedible eggs, they total three

percent of all eggs produced in Pennsylvania, one of the top four egg-producing states in the United States.

"They are a restricted egg," says Morris G. Mast, professor of food science at Penn State, referring to the government prohibition of the eggs as a human food.

"There has been limited financial return for these inedible eggs," he says of their worth to farmers. "Some farmers and egg packers had to pay to have them removed. Others may get as much as five cents a pound for them as pet food."

Using the leakers as fish food may be a more lucrative and efficient use of these eggs, which total more than five million pounds per year in Pennsylvania.

Mast presented the findings of his several years of study on restricted egg use at the annual meeting of the Institute of Food Technologists in Atlanta on June 11.

Market-age channel catfish fed diets containing dried whole inedible egg for four months prior to slaughter were longer and heavier than catfish fed diets without eggs, Mast says.

"There was no difference in composition, moisture, fat or protein of catfish-fed diets with and without dried eggs," he adds.

Those fed either 14 or 28 percent dried whole egg produced a

yellowish skin, Mast says, but most people would not notice, he says, since the internal meat remained the same color. Most people buy catfish already filleted. A sensory evaluation performed by a panel of food science graduate students showed that the egg diet did not influence the taste of the fish.

"The bottom line," Mast says, "is that you can feed eggs to catfish and achieve the same feed conversions as commercial non-egg food—for every 1.5 pounds of feed fed, 1 pound of weight is gained."

The experiment was conducted at an aquaculture research facility adjacent to Pennsylvania Power and Light Company's Brunner Island coal-fired power plant along the Susquehanna River. The facility maintains raceways where warm-water fish are raised, Mast says.

"The next phase will be to put into practice what we've learned about stabilizing these liquid inedible eggs," says Mast. To be able to practically turn these leakers into fish food, a stabilization process must be perfected, he says. The liquid eggs would have to be held at each farm or packing plant until enough were collected to make it feasible for a truck to collect them.

"Freezing is too expensive," he says. And few companies now process leakers by drying them,

Keister's holds 4th Agriculture Day

Keisters Middleburg Auction was once again a showcase for the state's agricultural commodities as owners Don and Walt Keister staged their fourth annual Pennsylvania Agriculture Day on June 11.

More than 20,000 people turned out to sample a wide variety of Pennsylvania products, and 40 buyers were on hand when the beef hit the auction block.

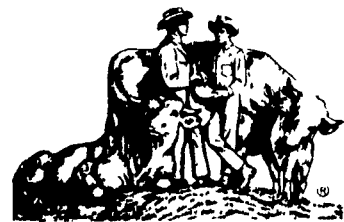

Pictured are (left) Pa. Dept. of Agriculture representative Marlin McClellan, Pa. Cattlemen's Queen Melanie Hemminger, buyer Greg Mellott of A.F. Moyer Packing and auction co-owner Don Keister. (Photo by John Stuck).

Lancaster to host Simmental Summer Conference

BOZEMAN, Mont. — For the first time, the American Simmental Association will conduct a meeting of national scope in the Northeastern sector of the country. The organization's 11th Annual Summer Conference will be held in Lancaster, Pennsylvania, July 18-20. The Americana Host Inn in Lancaster will serve as Conference headquarters.

"The American Simmental Association has a tradition of rotating the sites of our various meetings," said ASA Executive Vice President Earl B. Peterson. "Breeders who reside in Pennsylvania, New York and throughout the New England states plus other surrounding states, have an excellent opportunity to participate."

"During the Conference, ASA members will be able to meet with each of four standing committees to discuss issues," Peterson said. Standing committees that will meet during the Conference include: Growth and Development; Policies and Procedures; Ac-

tivities and Events; and Breed Improvement. Association decision-making begins with the input received by one or more of those committees, all of which are chaired by ASA Trustees.

"We are very pleased that ASA will be holding this event in our state," said Pennsylvania Simmental Association President Wayne Stough of Spring Grove. "We think the agricultural and cultural attractions of the area will be of great interest to our visitors from around the country."

Housing forms and pre-registration materials may be obtained by contacting the American Simmental Association, One Simmental Way, Bozeman, MT 59715. (406) 587-4531.

BUCKHANNON, W. Va. — West Virginia's farmers who produce commercial beef cattle will gain increased marketing power for their products July 1 when a new self-improvement program becomes effective in the state.

The state's beef producers, representing more than 15,000 farms, strongly approved the Beef Industry Self-Improvement Assessment Program in a referendum vote in April 1984. Under the program, producers will have \$1 deducted from the sale price of each head of cattle sold in the state, dairy cattle sold for beef

are included but those sold for milk purposes are exempted. Funds will be used in a variety of ways to promote beef and beef cattle, both nationally and here in West Virginia.

"The program is an important step forward for West Virginia cattlemen," according to beef cattle farmer Sam Tuckwiller of Lewisburg, chairman of the board which will help administer the plan. "It brings our producers abreast of those in 37 other states which have similar checkoff plans. Among those states are neighboring ones whose cattle are in

strong competition with ours for places in midwestern feedlots."

The program is under the direction of a nine-member board including representatives of producers and marketing groups.

While the \$1 fee is automatically deducted by the market or other cattle buyer, producers have the right to ask for a refund, if they desire.

Producers may get additional information by writing to the West Virginia Beef Industry Self-Improvement Program, P.O. Box 268, Buckhannon, WV 26201.

Leaker eggs

(Continued from Page D2)

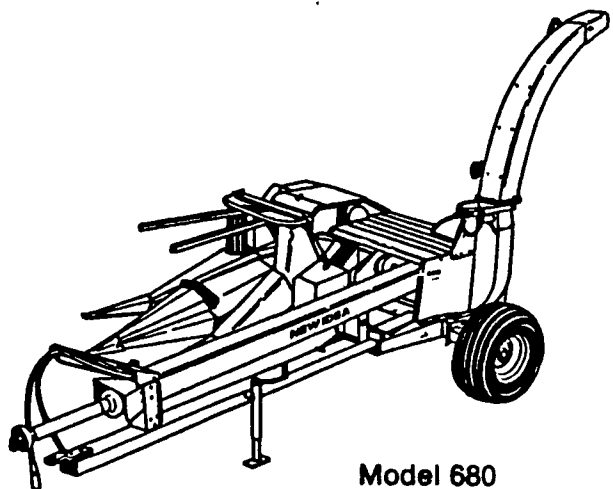

the predominant method, and still an expensive process.

By lowering the pH of the egg and adding sodium benzoate, a mold inhibitor, Mast and Songsup Yi, a food science graduate student, have demonstrated that inedible eggs can be held for as long as three weeks at room temperature. The eggs can then be strained to remove shells and mixed at low speed to obtain a homogeneous mixture.

Mast plans to stabilize, hard-cook, chop and pelletize the eggs with other ingredients to produce a food for tilapia, a tropical fish gaining commercial popularity in the U.S.

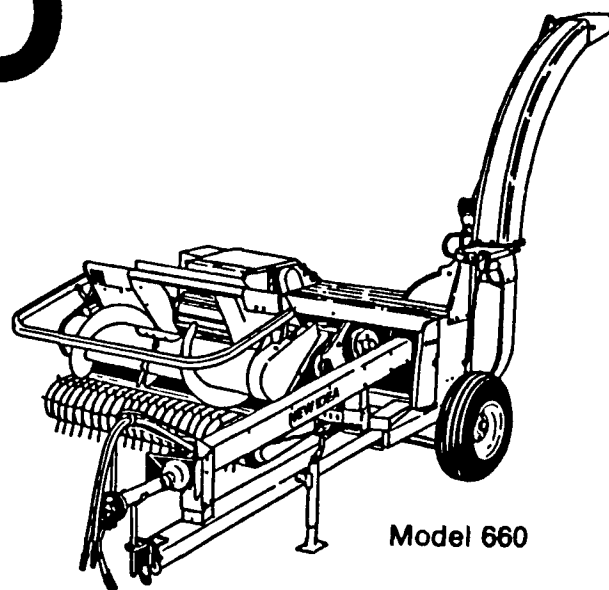

If he is successful, Mast believes the impact will be felt by egg producers, who can benefit from an added source of income. "I hate to see any food source wasted. A food with a high nutritive value is being under-utilized," he concludes.

The Serious Hog Producer

Take a hard look at the producer who's among the best in the country. And then ask yourself what sets him apart from the rest of the crowd. Has he just been lucky for the past several years? I doubt it. Does he have the best facilities? Not always. Well maybe he's in the middle of a lot of good markets. Not necessarily.

He's the best in the business for one reason—he takes it seriously.

Because he's serious, he has the right attitude. He knows the components of his operation are not just animals—they're part of a biological system. So he's genuinely concerned about their health and their comfort (a concept that the animal welfarists can't seem to grasp). He can see that pigs won't grow if they have to pile up to keep warm. And he

recognizes that air quality means the correct temperature *without* high humidity and dust and ammonia.

Because he's serious, he realizes you need a management system to survive. His might not be patterned after anything familiar. In some respects it might be a little

out of the ordinary. But even though his routine won't work for everybody, it works for him.

The producer knows he can't do everything. So he's not afraid to spend money on labor. And he puts his labor where it best fits in the operation. If he can't find a person to do the right job in the breeding barn or the farrowing house, he'll spend his own time there. It's better to hire someone else to spread manure and drive the truck.

He knows that saving an extra pig will, at today's market, net another 30 or 40 dollars per head. Remember, this "extra pig" can be raised in the facilities that already exist and with the labor that's already in place. So the "extra pig" goes to market for little more than the cost of feed.

Because he's serious, the top producer writes things down. Ask him about his conception rate or his total herd feed conversion or his average daily gain and he can tell you. Ask what's left on the bottom line. He may not tell you—but he knows.

Because he's serious he can see that spreading yourself too thin is

disastrous. His philosophy? Keep the operation at a size you can handle. Concentrate on what you've got. Instead of making it bigger, make it better.

He's picky on details. He moves enough females through the gilt pool to keep the farrowing house full—letting one crate go empty all year could cost \$2500 in a 100 sow operation. After the sows are bred, he's careful to watch for their return to heat since it costs 40 cents or more a day to keep a sow. If she comes into the farrowing house open, it's at least a \$50 loss. And the profit potential is gone.

He's a firm believer in aggressive marketing. He doesn't just fool with futures—he *uses* it. He doesn't lock himself into one market. And he sells his hogs at the weight which gives him the best return.

He reads. He listens. And he questions—not only the experts in the industry, but himself as well. In the end he learns. That's one more benefit to striving for perfection.

And there's another characteristic about the elite producer. It's not always a he.

PennAg names speaker

EPHRATA — M.B. Biskupski, Associate Professor and Chairman of the Department of History at St. John Fisher College, Rochester, New York, will be speaking on the topic of "EAST-WEST RELATIONS" at the PennAg Industries' 107th annual convention.

Biskupski has received his Ph.D. in History and his Masters of Philosophy in History, both from Yale University. He also has received both his M.A. and his B.A. in History from the University of California.

Mr. Biskupski is currently an Associate Professor of History and Director of the Institute for Polish Studies at the St. John Fisher College. Also adding to his teaching experience, Mr. Biskupski has been an Assistant Professor of History at Millersville University (1981-84) and a Lecturer in History at Yale University (1981).

Pizza lovers! It all starts here at Jefferson cheese

BY JOYCE BUPP
Staff Correspondent

HAGERSTOWN, Md. — From milk to mozzarella—in less than four hours. That sums up the operations at Jefferson Cheese Manufacturing, Inc.

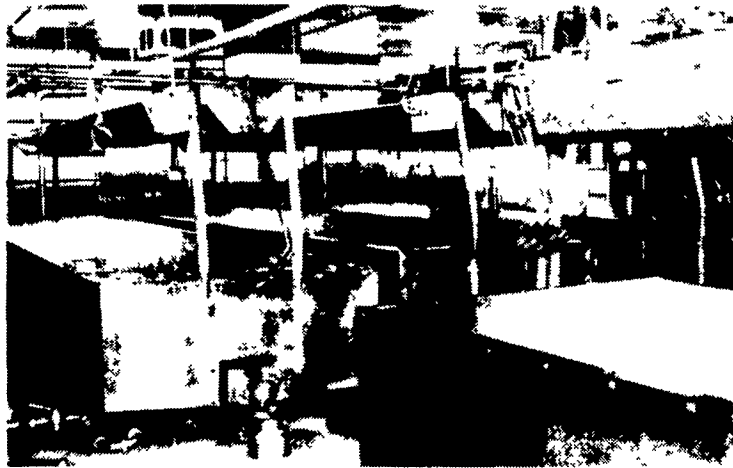

In business for ten years, this Hagerstown cheese production plant specializes in mozzarella and its cousin, provolone. Both skim milk cheeses continue in high popularity for the pizza and related-foods trade.

Ten pounds of milk, approximately, is needed to produce a pound of cheese. Jefferson's cheesemakers regularly turn out a daily production of 20,000 pounds of cheese, sometimes as high as 25,000 pounds during peak production periods.

The plant has seven silo storage tanks which have a holding capacity of 500,000 pounds. Yet it still receives from 800,000 to 1,000,000 pounds during a normal processing week. Raw milk supplies come from the plant's own one hundred shippers, located mostly in the area of Shippensburg, Pa., and from producer-members of Dairymen, Inc.'s Middle Atlantic Division.

While the plant receives milk seven days per week, the manufacturing facility operated on a five-day-week schedule. All shipments of milk coming in are segregated, and closely analyzed for temperature, acid, odor and antibiotics, before blending with others in storage silos.

As needed, milk flows from the storage holding area through a rapid-process pasteurizer. It's heated to 162 degrees in 16 seconds, and can be pasteurized at the rate of 28,000 pounds of milk per hour. Quickly cooling down, the milk exits the pasteurizer at a temperature of 90 degrees. Cheesemaking requires milk to be

At Jefferson Cheese in Hagerstown, milk becomes mozzarella in less than four hours, cultured and produced in these giant stainless vats for pizza lovers across the East Coast.

at a temperature of between 87 and 90 degrees, for culture products to function.

First, though, the milk takes a side trip through the separator, where 60 tons of pressure removes the cream. Butterfat levels for cheesemaking can vary, depending on the fat percentage wanted in the finished product. Excess cream not needed for cheese production is routed through a cooler, and resold to a butter manufacturer.

Now skimmed, the warm milk's next stop is in the heart of the cheesemaking plant, where it fills large, rectangular stainless steel vats for the actual cheese production. Rennets and culture are added to the warm milk, and in just 40 minutes time, the bacterial culturing action thickens the mix to a gelatin consistency.

Experienced cheesemakers acknowledge that cheesemaking is almost as much an art as a science. By experience, they learn to know when the cheese is "ready" by thickness and texture.

When the mix has thickened to just the right state of consistence, "like Jello," according to cheesemaker Don Powers, it's time to be cut into soft cubes of curd. For this procedure, cheesemakers draw through the curd cutters, or very thin wires, running parallel about an inch apart. These cut through the mix both horizontally and vertically.

Steam inside the vats cooks the soft chunks of curd, at about 110 degrees, to a firmer state. When

the cheesemakers determine the curds have reached the proper texture and consistency, they "ditch" the mix. This allows the whey, or clear liquid which separates from the solids in cheesemaking, to be drained from the curds.

Timing now is critical. The action of the culture must be stopped, and cheesemakers have a "grace" period of only about 15 minutes. If the culture is stopped too early, the cheese is "green," but overcooking causes a mix that is too "ripe."

From the vats, the drained curds are moved through a dicer machine, breaking them down to smaller pieces, and dropped into 155-degree water. The hot water stops the action of the culturing bacteria.

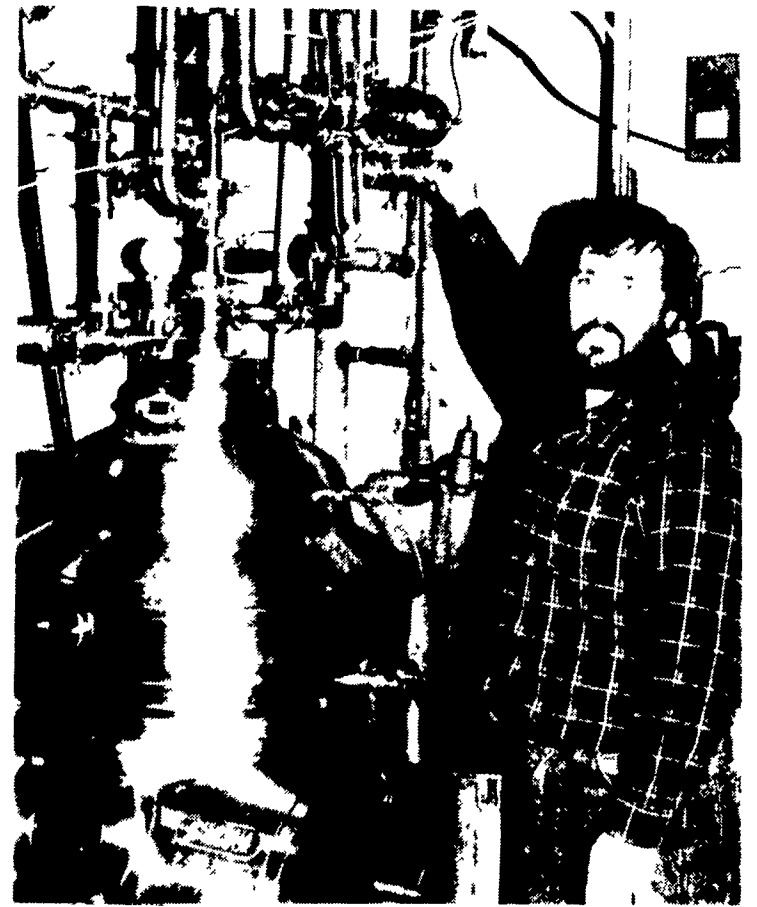

Now the curds are ready for forming. In the molding machine, finished cheese bits are shaped and pressed into five-pound rectangular blocks. Placed in a cold water bath for about an hour, the blocks further cool and become firm and easily handled. Blocks can be stored and aged for up to 60 days, depending on product demand.

Whey, the by-product of the process, is pumped from the vats and held in storage, and eventually returned to the environment by spreading on fields. It's a manufacturing cost to Jefferson Cheese, since whey storage and spreading expense runs upwards to \$50,000 annually.

Jefferson Manufacturing's

cheese is widely distributed along the East Coast, primarily through wholesaling. The firm is under contract to Kraft, Inc. Their own

retail outlet on Route 40, east of Hagerstown, offer a retail selection of approximately 40 different kinds of cheeses.

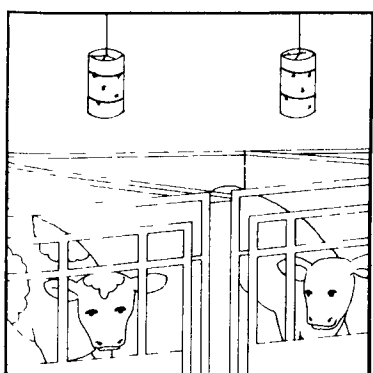

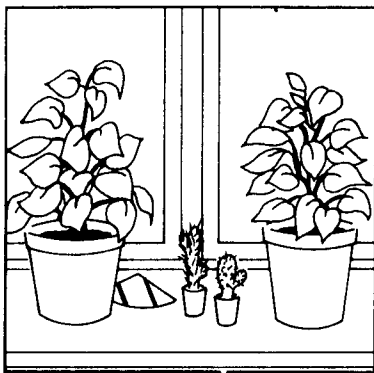

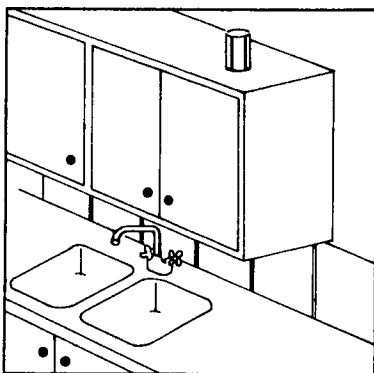

Don Powers, plant manager at the Jefferson Cheese plant, checks the separator which utilizes 60 tons of pressure to separate cream and skim milk.

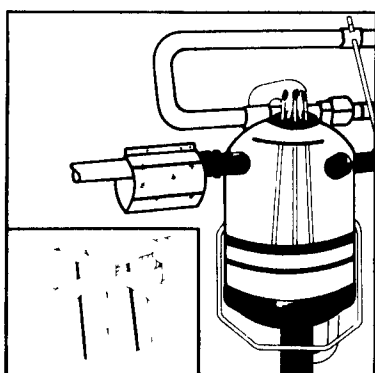

Mozzarella and provolone cheese goes into this molding machine, which forms the finished product into five-pound rectangular blocks.

Lancaster silo honored

Brian Weaver of Lancaster Silo Co. Inc. receives the Top Achievement Sales Award and the Sales Volume Award by Floyd (Bud) Buschbom, President of Van Dale, Inc. The presentation was made at the regional sales meeting at the Holiday Inn, Grantville, Pa.

The new forage bagger from Ag-Bag Corp.

Ag-Bag unveils new bagger

ASTORIA, OR — Ag-Bag Corporation has announced its latest addition to the forage Bagger line.

The new JR-700 model has improved design features that include an independent hydraulic system for feed-flow control and a safety shear pin for the PTO unit.

Main chain drive strength has been doubled with the addition of a dual chain system for the compacting rotor.

As with all Ag-Bag Bagger

models, a hydraulic braking system assures a positive compaction control for the operator.

Another feature is a retractable feed conveyor so that the machine can be easily moved to other bagging locations.

The JR-700 uses the 8ft. diameter Ag-Bag that is capable of storing 150 tons of forage.

The new machine comes with new flotation tires as standard equipment.

Beachley-Hardy unveils cash-crop wheat

CAMP HILL — Farmers in the Mid-Atlantic region have long planted wheat mainly for the straw they needed as livestock bedding and as a rotational crop.

But now, thanks to the development of high-yielding HYBEX hybrids by Rohm and Haas Seeds, wheat can be a valuable cash crop as well as a provider of those traditional qualities for which it has always been grown in states like Pennsylvania, Maryland, New Jersey and Delaware.

Three HYBEX hybrids, which offer potential for higher yields of up to 25 percent over leading varietal wheats and have yielded more than 100 bushels an acre in trials as the University of Maryland, are being distributed in the region by Beachley-Hardy Seed Company of Camp Hill.

To show farmers just how much these revolutionary new hybrids can add to their crop programs, Beachley-Hardy is holding wheat field days in the area and generating a lot of interest in a traditionally corn and alfalfa region.

"We're very pleased with what we've seen so far," said Ed Brake, who recently hosted a field day on his farm outside of Mercersburg in Franklin County, Pa. "The two HYBEX hybrids we planted last fall have given us an excellent stand of wheat."

To compare the performance of the HYBEX hybrids, Ed and his brother John, under the supervision of Beachley-Hardy field man Jim Haldeman, planted a competitive variety next to the HYBEX plots.

The difference was marked. The HYBEX stand of hybrids HW3007 and HW3021 had shown tremendous tillering vigor, thicker, sturdier straw and a taller, healthier plant. The hybrid wheat also proved to be more disease resistant and have larger, heavier grain heads.

The farmers realized they were looking at cash crop wheat, one that can actually compete with corn on farms in the area, according to Rohm and Haas regional manager Jim Knapp.

"You have the genetic potential

These two different angles on Hybex wheat demonstrate the size of the head as well as the size of the grain.

in a high yield environment to make it a cash crop," said Knapp. "At 80 to 90 bushels an acre, it will compete with 130 to 140 bushel corn."

There is also a seasonal plus to growing wheat as a cash crop. As Knapp put it, "It gives you a check when you need one—in early July when the Spring planting bills are coming due."

The thick, long straw of the HYBEX wheat, as well as being a desirable bedding material after harvest, allows heavy nitrogen fertilization with little or no fear of

lodging, while the increased tillering ability of the hybrids allows a lower seeding rate.

Hybrid wheat is the result of crossbreeding two parent wheats that exhibit desirable agronomic characteristics and high-yielding ability. Up until now, breeders could only transfer genetic traits biologically. A process taking eight to ten years. But Rohm and Haas has achieved a breakthrough by developing chemical agents to speed up the process.

With HYBEX technology, Rohm and Haas can develop and market a proven hybrid in only three to four years. The technology is based on a chemical hybridizing agent that inhibits the male pollen development in the wheat without affecting the fertility of the female portion of the plant. Then, another parent with desired characteristics can be introduced as the male pollinator.

In actual practice for the farmer, all of this translates into something brand new to this area—bonafide cash crop wheat.

Farmers who want to learn more about HYBEX hybrids and what they can do for a crop program should contact their Beachley-Hardy dealer and listen for upcoming field days in their areas.

Reviewing the progress of the Hybex field in Franklin County are, from left, Jim Haldeman of Beachley-Hardy, Jim Wilson of Agronomy, Inc., Jim Knapp of Rohm and Haas and John and Ed Brake, who hosted the wheat trials.

Show-Ease Stall Co.

honors dealers

Show-Ease Stall Company honored its top dealers at the company's dealer meeting on June 14.

Pictured above is Show-Ease owner John Kreider (left) presenting a pair of hand-carved decorative duck decoys to Bill Inman and his wife Mary, of Bovina Center, N.Y. Also honored was the firm's second-place dealer, Agri, Inc., of Ephrata, represented by Dave and Velma Leid.

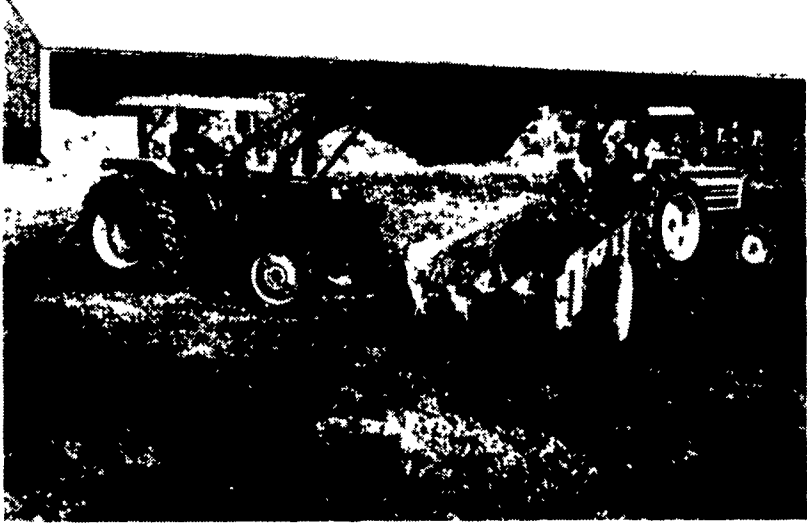

A Lancaster-based manufacturer of cow stalls and related equipment, Show-Ease hosted 25 dealers from Pennsylvania and surrounding states. In addition to the evening banquet and awards ceremonies, the company acquainted its dealers with Lancaster County through tours of Fulton Way Farms, the historic Hans Herr House and the Strasburg Railroad Museum.

UTILITY TRACTORS

To Suit All Needs

Two loader tractors designed especially for stockmen!

Livestock means loader tractors. And the new 2-55 and 2-65 Field Boss® utility tractors were designed with livestock operations in mind. They come with a lot of standard features (extra-cost options on most other makes) that can save you time and effort.

Shift-on-the-go. Our new synchromesh transmission lets you shift through four ranges without stopping. To let you choose from 16 forward speeds.

Tighter turning. You'll like the quickness and agility of the 2-55 and 2-65, too. Even the four wheel drive models turn almost as tight as most other two wheel drives. A big plus in feedlots and other tight spots.

These new tractors have so many work-saving features we can't list them all here. So come on in and count them up for yourself. It'll be worth the trip.

Put more utility in your utility tractor with a Power Front Axle

Nothing beats the 2-55 or 2-65 Field Boss® utilities when it comes to work-saving standard features. They're packed with equipment some manufacturers charge extra for as options.

Add a Power Front Axle. But one option that really pays off in productivity is our Power Front Axle. It adds performance to any job. From field to feedlot. Anytime the going gets tough.

High clearance, tight turns. Adding four-wheel-drive doesn't mean losing clearance or agility. Because our Power Front Axle is designed for more front axle clearance than most four-wheel-drive tractors. Plus, even with the Power Front Axle, our 2-55 and 2-65 tractors turn almost as short as our two-wheel drive models.

Come in to the dealership and see for yourself what a Power Front Axle can do. We think you'll be impressed.

We just got in a utility tractor you'll have to see to believe!

It's the new 2-75 Field Boss® utility tractor from White Farm Equipment Company and it's fresh off the truck. This tractor is put together with the precision of a classic automobile. Yet it works like a bigger field tractor.

Power to spare. The engine on this tractor is a beautiful 75* hp, direct-fuel-injected six cylinder diesel. Teamed with the big-tractor power train and hydraulics, it makes the 2-75 more tractor than most utilities could ever be.

More standard features. What some other manufacturers call options come standard on the 2-75. Synchromesh transmission. Both 540 and 1000 rpm PTO. Two batteries for more starting power. Adjustable lower links on the 3-pt. hitch. And more!

This tractor is so packed with standard work-saving features, we don't have room to list them all. So come on in and count 'em for yourself!

Seeder/spreader for ATVs developed by Worksaver

LITCHFIELD, IL — The GDTS-3, a three-bushel, trailer-type seeder/spreader featuring ground drive and designed for use with all-terrain vehicles is now available from Worksaver, Inc.

The GDTS-3, a three-bushel, trailer-type seeder/spreader featuring ground drive and designed for use with all-terrain vehicles is now available from Worksaver, Inc., Litchfield, Illinois. The new seeder/spreader can be used in rugged or hard-to-reach areas and is simple to operate, requiring no power take-off or electric drive motor.

The new seeder/spreader can be used in rugged or hard-to-reach areas and is simple to operate, requiring no power take-off or electric drive motor.

A heavy duty #50 roller chain and a sealed 90-degree gearbox transfer power smoothly from an axle-mounted sprocket to the seeder/spreader's fan and cast iron agitator.

A jaw-type clutch allows the drive line to be disengaged for easy movement between fields, and Worksaver's exclusive main hopper shut-off gate eliminates

locked drive lines by allowing the unit to be set in motion before broadcast material reaches the agitator.

The GDTS-3, which employs a 3.46 to 1 sprocket ratio to broadcast at nine miles per hour, features an optional elastic hopper cover, 21-

by-11-by-8-inch high-flotation tires, a swivel ball hitch, and controls which are easily accessible from the lead vehicle's seat. Three- and five-bushel hopper extensions are available to raise the unit's seed or fertilizer capacity to either six or eight l.

Murphy Bru-Mash... All The Time!

**Anytime of any year, Murphy Bru-Mash helps
boost production economically and efficiently
with top quality by-pass protein, digestibility
and palatability.**

As a source of protein and energy, Bru-Mash is hard to beat. And there's a lot more to the Bru-Mash story. Tests conducted at Michigan State University, The University of Tennessee, North Carolina State University, The University of Mississippi and many other schools show that Bru-Mash helps increase milk production more efficiently! So, don't think of Bru-Mash as an extender of your normal feeding program — think of Bru-Mash as part of your normal feeding program. You'll discover improved feed conversion, higher production, greater palatability and remarkable digestibility. Your Murphy representative has complete storage, handling, and feeding guidelines and he'll also help you analyze your forages and formulate a custom ration based on your herd's needs.

From farm to shelf, Weis controls milk for quality

BY MARGIE FUSCO
Staff Correspondent

SUNBURY — "We're particular about the quality of our milk," says Diane Neyhard. She and her husband Gary run a small dairy operation near Limestoneville, Northumberland County. They are justifiably proud of the purity of the milk they produce. Diane says, "We don't ship anything we wouldn't drink ourselves."

The Neyhards are among 400 dairy farmers who ship to Weis Markets through Interstate Milk Producers' Cooperative. Diane is pleased with the arrangement, noting that they previously shipped with another group. "With the other dairy, it didn't matter. They were slow about getting in touch. They didn't seem to share our concern about quality. Weis does."

Weis Markets, Inc., which processes milk through its Dutch Valley division, used Dairy Month to remind area farmers of that concern by holding an open house June 6. The corporation's commitment has been visible to the public as well, with advertisements that feature Pennsylvania-grown products. Weis has used public events such as regional fairs and the State Farm Show to set up sampling booths, display Pennsylvania products, and distribute cents-off coupons to consumers.

When Weis management decided to go into milk processing several years ago, in order to put a fresher product on the shelves, it was natural to call in Bryan Berry. A

native of Missouri and a dairyman, Berry holds a master's degree in dairy technology from the University of Missouri.

Weis lured him away from the Borden Company to create an ice cream processing operation. A few years later, Berry was called on to develop the milk processing plant he now heads.

The milk processing plant was opened in 1980 and expanded in 1983, at a total cost of \$5.1 million. Today the plant, located in the distribution center in Sunbury, produces 10.4 million gallons of milk a year (whole, 1%, 2%, low fat, and chocolate), as well as 1.1 million gallons of other drinks such as iced tea and orange and apple juices. The milk used is shipped from farms within a 70-mile radius of the plant.

Weis produces 1500 items through its own ice cream, meat processing, cheese packaging, milk processing, and delicatessen operations. The local processing is intended to reduce shelf costs to consumers, along with providing fresher merchandise.

Founded in 1912 by brothers Sigmund and Harry Weis, the chain began as a single "cash and carry" grocery store in Sunbury. By 1915, the operation had grown to three stores. In the mid-1920s, the Weis brothers opened their first "self-service supermarket" but found it was poorly received. They tried again in 1936. This time the economic climate was different; consumers were eager for lower-priced merchandise, and the idea

blossomed.

Today there are 120 Weis Markets in Pennsylvania, New York, Maryland, and West Virginia. In addition to the food processing operations, Weis also owns a food service division serving the restaurant and institutional markets, and eight Amity House restaurants. The entire operation had net sales of \$975 million in 1984.

Berry is proud of the milk processing plant and its role in Weis Markets' success. "I don't know of a better or more efficient operation," he says. It is one of the most up-to-date facilities in the country and the newest in the eastern United States.

Inside, the plant is a marvel of mechanization. The entire processing operation can be controlled by a single person at a control panel. The milk arrives in 7 to 12 truckloads a day and is stored briefly in three 71-foot high silos.

From the silos, the milk enters the processing system via stainless steel piping. The pipeline, which runs throughout the plant, is part of an effort to keep the product totally sanitized.

High-temperature pasteurization units purify 5,400 gallons of milk an hour. Every 20 seconds the milk is fat-tested and the butterfat content is regulated. While the homogenized milk is cooling, in a side area plastic pellets are melted and puffed into gallon jugs that are filled instantly, cased automatically, and sent by conveyor belt into refrigeration.

The processing operation involves quality checks every two hours from all points in the system, starting with the incoming tanker and ending with the finished product.

The milk is tested for flavor, odor, butterfat, acidity, freezing point, and bacteria count. Diane Neyhard notes that Weis is very quick to inform producers about the quality of their milk, notifying several times a month.

When the processing is complete, the entire system can be cleaned without dismantling. Sanitizers and cleaners are stored in tanks tied in to the system.

With the flick of a switch, the entire pipeline and processing equipment can be cleaned, flushed, and rinsed. Barry notes that this "clean in place" system has helped the plant earn top sanitation ratings from state and federal agencies.

"They're a Class One plant," says Bob Dever, assistant general manager of Interstate Milk Producers' Cooperative. "We want to put out a Class One product, and

A technician checks a sample in the quality assurance lab.

Plastic containers go through the production line and are filled with milk.

A view of the processing area.

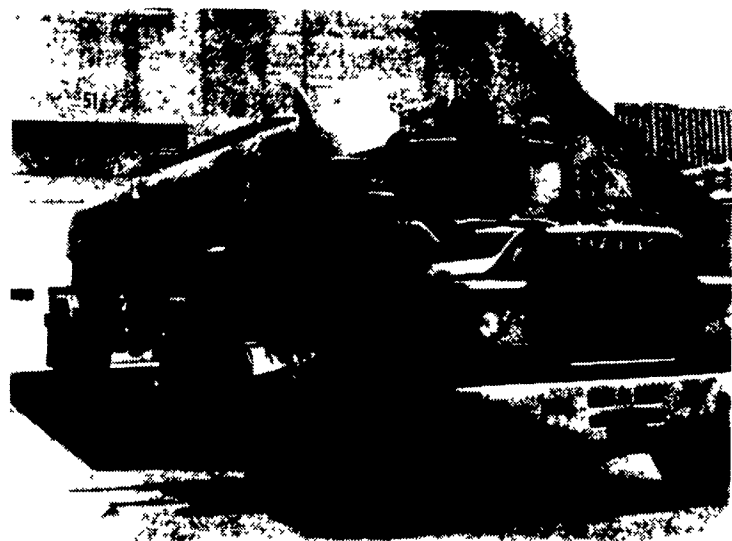

we've got an enjoyable and profitable relationship going for both them and us."

Interstate has been shipping to Weis since the processing plant opened. Dever adds that he's impressed by Weis's aggressive marketing approach as well as the concern about quality.

For the Neyhards, knowing their milk is processed and sold locally gives them extra reassurance about their product. "I like Weis as

a processor," Diane says. "I'm confident that if anything ever went wrong with our milk someone would call us real quick."

It comes down to a more personal level, too. When Diane goes shopping to the Weis Market in Milton, she can see her neighbors buying milk. She knows that the milk they buy today came fresh from her own farm yesterday morning. And she's pleased.

A truck from Inter-State delivers milk to Weis.

One of the huge silos where milk is stored.

Valiant dominates Holstein rankings

DEFOREST, Wis. — The top 2,000 Premier Performers List and the Locator List, compiled by the Holstein Association and based on the latest USDA Sire Summary, have been released.

The Locator List ranks the top 5,000 Holstein cows in the nation in order of their Cow Total Performance Index (CTPI). The list is compiled from the information on milk production and conformation available on over 400,000 registered cows. The top 5,000 genetically, represent the highest 2 percent of the breed.

Of these top cows, 1360, or 27 percent, are daughters of Valiant, the super bull at ABS, who continues to dominate the Holstein breed even after his death last August.

As the list narrows down to just the top 200 cows, Valiant dominates even more. Eighty of these cows, or 40 percent, are his offspring. He has more daughters listed on the top 200 list than the next six sires combined.

Valiant's impact on the breed also continues to multiply through

his many sons at ABS. With 148 now on the firm's sire roster to progeny test and select from, ABS will continue to be the major source of current generation Valiant genetics for many years to come.

Three sons, including Tri-Day

Valiant Gold, have completed their progeny test and are now on the regular production lineup. Gold, at +\$182, is the second highest Holstein bull in the nation for PD Dollar Value.

Rosafond Gold Flair, a two-year-old daughter of Tri-Day Valiant Gold, demonstrates the genetic impact Valiant has had on the Holstein breed through successive generations.

New diesel garden tractor unveiled by John Deere

MOLINE, IL — John Deere is following the latest trend in lawn and garden tractors is diesel power and John Deere is introducing its second hydrostatic drive lawn and garden tractor with a diesel engine.

This new model 330 tractor is powered by a 3-cylinder liquid-cooled diesel engine with full-pressure lubrication, replaceable oil filter, canister-type replaceable air filter, and fuel filter with replaceable element. For smooth and quiet operation, the engine features indirect injection pre-chamber combustion. A high-energy glow plug in each pre-chamber helps provide faster cold-weather starting.

Deere has aimed its new tractor at both the homeowner and commercial markets. People with lawns measured in acres will appreciate the fuel economy and

durability of a diesel engine just as much as a professional groundskeeper for a school or park. The new 16-hp diesel engine in the 330 tractor delivers up to 20 percent more torque and up to 40 percent better fuel economy than comparable gasoline engines. And the diesel is famous for longer engine life with a lot less maintenance.

The 330's radiator is "grass proofed" by protective screens that filter out clippings and debris. An electric fuel pump makes fuel readily available for faster starting. The fuel tank holds 4.5 U.S. gallons (17 L). John Deere engineers estimate fuel consumption at these rates: Full load: hour/hour (2.9 L/hour). One-half load: 0.39 gal./hour (1.45 L/hour).

The 330 uses No. 1 or No. 2 diesel fuel, depending on the outdoor temperature.

The lighter-weight chassis

minimizes ground compaction. If you roll too much weight across a lawn, you can tamp down the soil and actually impede the movement of air, water and fertilizer nutrients that a lawn needs. And a diesel engine provides outstanding durability.

The 330 tractor features a dash-mounted hydrostatic transmission lever that controls direction and speed. One set of front hydraulic outlets is standard; attached implements are controlled by a hydraulic lever. The seat can be adjusted without tools.

Automotive-type shoe brakes include a parking brake. An automotive-type manual steering system with ball and needle bearings is permanently lubricated and sealed in a cast iron housing.

Other standard features include a 12-volt electrical system,

headlights, electric front PTO, float fuel gauge, hourmeter, and dash-mounted indicator lights for PTO, battery voltage, oil pressure, coolant temperature and glow plugs.

A seat-PTO interlock switch automatically shuts off the PTO (mower drive) should the operator leave the seat while the PTO is still running. There are 16-inch diameter front tires and 23-inch rear tires.

Implements for the 330 diesel

tractor include three mid-mounted rotary mowers—38, 46 and 50 inches. A twin-bag material collection system can be teamed with the 38-inch mower; a Tilt Dump system can be used with the 46- and 50-inch mowers.

A 50-inch 3-point hitch rotary mower is available. A 30-inch hydraulic-drive rotary tiller can be attached to the tractor. A 54-inch front blade is available too. A 46-inch snowthrower can be raised by the tractor's built-in hydraulic system.

CLASSIFIEDS**

If you're looking for a manure handling system, look to the people who specialize

Patz

Inject manure for more profit

- Injector discharges manure in soil to preserve nutrients and boost crop yields
- All operating parts up front for easy viewing and control
- Hydraulically operated precision gate valve operated from tractor seat provides controlled rate of unloading
- All working parts removable from outside of tanker.
- Internal 4-bladed chopper homogenizes slurry
- Walking beam tandem axle with surge brakes on all 4 wheels
- 540 or 1000 R.P.M. P.T.O. available
- Four shanks are self-penetrating for easier pull, deep injecting and good covering.
- Shear bolt shanks feature replaceable points and leading edge
- Adjustable gauge wheels assure uniform depth.
- Independent injector uses 3-point hitch.

Genuine PATZ replacement chain.

- Rounded corners work smoothly on sprocket
- Painted to retard corrosion
- Two link sizes
- Links welded to 2" or 4" flites
- Proven for 35 years.

Patz

Hook up to the RUGGED ONE

- 3 200 Gallon Capacity
- Front Unloading — Left Hand Side Discharge
- Low Wide Spread Pattern
- Discharge Rate Controlled From Tractor Seat
- Four-Bladed Impeller & Four-Bladed Chopper

Here it is, the RUGGED ONE from PATZ, built as only PATZ will build them — to last, and last

The PATZ 3200 has a tank constructed of 3/16 inch steel and a tank frame and hitch of 1/4 inch steel with reinforced tank ends. The PATZ 3200 tank interior has an epoxy primer coating — the best known protection against the corrosive action of liquid manure

You can unload in minutes with a wide spread pattern of even distribution. All working parts are in the front of the tank within easy view and operation from the tractor seat. Safety, too, has been built into the PATZ 3200 with independent tandem beam walking axle and surge brakes on ALL FOUR WHEELS. Tires 19Lx16 1 or 48x25x20 Super Floatation Terra Tires

Dairy Maids standards: It's gotta be perfect!

BY JOYCE BUPP
Staff Correspondent

FREDERICK, Md. — Joseph Vona has his own strict personal quality standards about milk.

"If it's not perfect, I won't take it."

Vona, and his sons James and Jody, own and operate Dairy Maid Dairy, Inc., a fluid milk bottling plant, marketing primarily through the Baltimore-Washington area.

He's been on the front lines of the phenomenal changes that have taken place in the dairy industry since he purchased the plant in 1945. Not that he had ever really intended getting into the industry in the first place.

An engineer by profession, Vona purchased what was then known in Frederick as Excelsior Sanitary Dairy, as a business investment. Excelsior processed and sold

between 1200 to 1500 gallons of milk daily, all locally produced and marketed primarily on routed served by five home delivery trucks.

But by 1947, the investment had developed into a full-blown "good family business." Vona began adding, changing, improving. And, he's never really stopped since.

"It seems like every six months we've expanded something," chuckles this industry innovator.

What's also changed, he adamantly adds, is the quality of milk coming off the dairy farm.

"There have been a lot of improvements in milk coming into the plant in recent years. Today's milk is the best ever - quality wise."

That rigid adherence to starting with the very best quality has resulted in a longer-than-normal dairy case life for Dairy Maid's

products, up to 12 days. That's based on continued checks by the state's health inspection programs, and attests to the dairy's strict quality standards.

Dairy Maid is wholly supplied by members of the Middle Atlantic Division of Dairymen, Inc. The cooperative provides testing and antibiotic screening for milk supplies, with Dairy Maid running its own quality grading as the shipments are unloaded.

Incoming milk can be held until needed in the plant's two 25,000 gallon storage silos. Processing five days a week as needs demand, milk goes from storage through separation while raw. Platelet pasteurization assures continued quality, with temperatures to 160 degrees, and a 5,000 gallon-per-hour capability. Homogenization and standardization processes further finish the product to consumer needs.

As the face of the dairy industry has changed, so has Dairy Maid's response to marketing trends. In place of the historic home delivery, with emphasis on frequent sales of quarts, today's customer picks up milk at a market, often by the gallon.

About 65 percent of Dairy Maid's fluid milk business is in the gallon size. Twenty percent of sales are accounted for by skim products, and about 30 percent for lowfat, as consumers gear their lifestyles toward health and weight consciousness.

Dairy Maid also handles large school milk volumes, serving five county school districts in the state. Between ten and fifteen percent of the firm's business is with the military.

Packaging equipment is in place

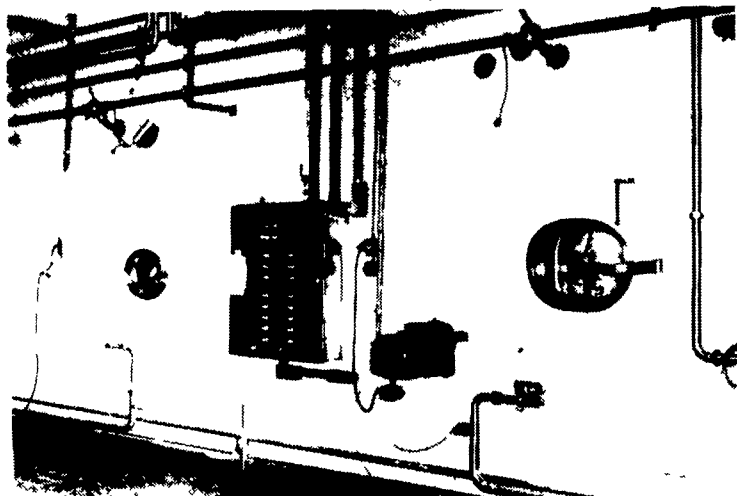

to meet the needs of this broad scope of customers. Filler machinery includes a standard size for handling half-gallon, quarts and pints. A gallon-size filler and one strictly for packaging bulk volume five-gallon containers serve other container needs.

To keep pace with their large

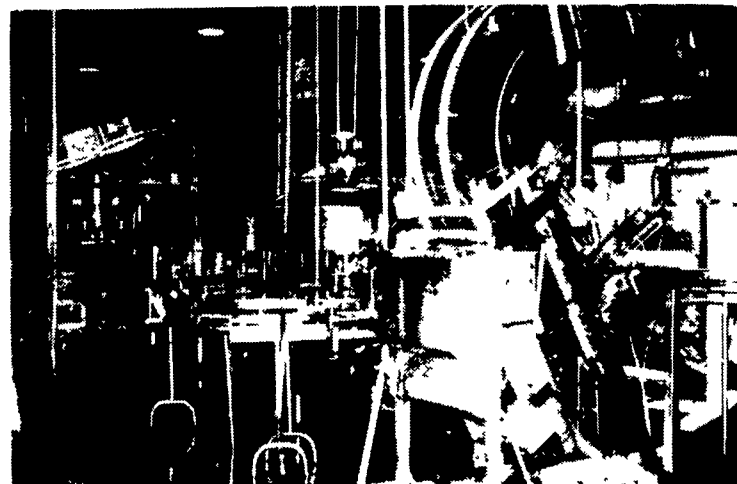

container utilization, the Vona's have integrated state-of-the-art blow mold technology, producing plastic gallon and half-gallon containers on site.

Natural gas and oil fuel the high technology needs of this modern dairy processing facility. Engineered to energy savings,

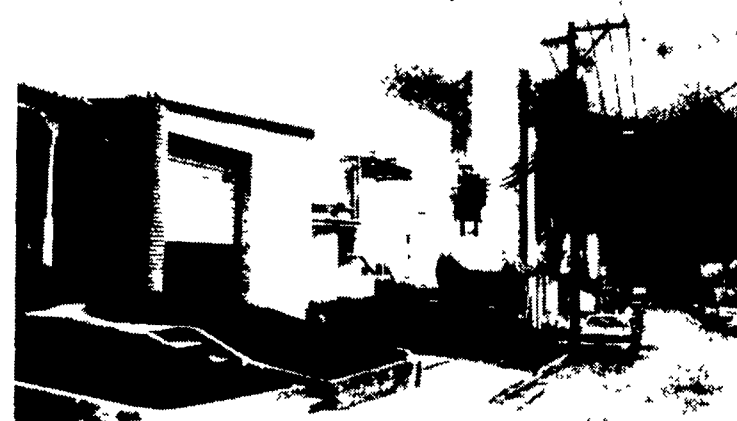

(Turn to Page D13)

Giant storage tanks line the walls of the plant, holding products as needed between the various processing steps. Tank readout gauges along the inside of the building make it easy for plant personnel to monitor the contents.

Automated filling equipment at Dairy Maid enables milk to be packaged in a variety of sizes, from school milk half-pints up to five-gallon bulk containers.

Dairy Maid Dairy, Inc., Frederick, Maryland, has grown from a 1500 gallon a day processor to a 40,000 gallon volume. It's owned and operated by the father-son team of Joseph Vona and his sons James and Jody.

(Continued from Page D12)

heat exchangers utilize the chilled temperatures of cold milk coming into processing to cool milk heated in the pasteurization procedures.

With 40 years now of dairy business experience, the dedication of this family trio is evident. James oversees the daily operations of the plant, while Jody is in charge of the marketing programs. And Joseph still keeps tabs on every corner of the plant, from milk being pumped in off the stainless steel tankers to overseeing the engineering details of yet another expansion.

For Dairy Maid is growing again, "going up, instead of out."

In planning is a larger, fully-computer-operated cooled storage facility for up 120,000 gallons of milk ready for marketing. It's just one more Vona response to the continuing changing needs of the dairy industry's consumers.

While the face of the plant has metamorphosed many times over the past four decades, the philosophy of Joseph Vona has not. In fact, his basic belief has only been strengthened in those years of growth and expansion.

If you start with a good product, you can put out a good product. And the customer will be the final judge.

WESTPORT, CT. — Although you've been fighting rootworms, cutworms, corn borers and the like for close to three months, the battle in your corn fields isn't over yet, warns an insect control specialist.

Second-generation corn borers, which often receive less attention than the first generation, may cause even greater yield losses, says Bill Pagano of Stauffer Chemical Company.

"They infest the corn plant at the

Corn borer war not over - second generation is here

most critical stage, during kernel development," he says. "Scouting and treating are just as important for second-brood corn borers as for early-season pests."

Egg laying of the second generation occurs from late July through August. Each female moth can lay several hundred eggs, and moths are attracted to recently tasseled corn plants on which to deposit these eggs.

During the silking and tasseling stage, most of the egg masses will be laid on the undersides of the two leaves above and below the ear, on the ear husk and on the undersides of the ear leaf.

The egg masses are flat and about one-fourth the size of a fingernail. Depending on weather conditions, the eggs will hatch in three to five days. About 75 percent of the larvae will move to the leaf axils and the remaining 25 percent to the ear to feed on sheath and collar tissue.

Late-planted fields will usually suffer the greatest losses, because second brood borers will hatch and enter the stalk at the time of kernel

fill. In this case, the infested plants will have smaller ears.

Pagano says corn borer populations are related to weather conditions, especially during the reproductive cycle. Mild weather with warm nights favors reproduction and large infestations.

"You can have a low first generation of borers with few moths, but if the weather is right, the population can just take off in the second generation," he adds.

When to Treat

Corn borer egg laying occurs on evenings when temperatures are above 65° and winds are calm. A few days after moths begin to fly, growers should examine 25 or more plants for egg masses.

Generally, Pagano says treatment is warranted when field counts show an average of one or more egg masses per plant.

Stauffer's Dyfonate 20-G* insecticide is registered for control of second generation borers in "over-the-top" applications.

New Gehl 1260 and 1060 forage harvesters with exclusive Auto-Max system

AUTOMATIC load management. MAXIMUM capacity design.

Gehl forage harvesters have been at the leading edge of engineering design for years. With innovations that speed material flow and reduce downtime, for top capacity harvesting. Now with Gehl's exclusive Auto-Max system the new 1260 and 1060 forage harvesters are truly state-of-the-art.

The Auto-Max system features automatic load sensors—one on the upper feedroll and one on the attachment drive—that eliminate the need for shear pins and let you manage overloads without leaving your tractor. By operating automatic electric controls you can smooth out an overload and start it feeding again in just seconds. Without fear of prolonged downtime due to overloading you can operate your harvester and tractor at near their top capacity.

Results 15 to 20 percent more capacity valuable time saved! Just as the load sensing system protects the harvester from overloads, a new speed monitoring system protects the unit from plugging the blower and deflector because of drops in tractor rpm.

The Auto Max system is standard on the 1260 optional on the 1060. Both machines can be equipped with a **Metal-Stop metal detector** to protect against ferrous metal entering the harvester. And a 30 gallon water tank can be added to prevent the problem of haylage gumming. Standard features on the 1260 and 1060 are impressive. For example, Gehl's exclusive patented spinner delivery system keeps material on the move all the time. No dead spots. No cross augers. Just continuous

load on the tractor pto brake and allows the harvester to free-wheel when power is cut. A simple in head hydraulic knife sharpener allows the cylinder knives to be sharpened quickly right in the field using tractor hydraulics. The cutterbar can be pulled out and finely refaced using the same system. And a patented single-station cutterbar adjustment system allows you to reset the cutterbar from just one point on the harvester.

There's more—lots more. But why not see for yourself? Ask your Gehl dealer to demonstrate one of the new 60 Series: the 1260, for tractors up to 300 hp; the 1060 for tractors up to 200 hp, or the economy 760 for tractors up to 150 hp. And move into a world of worry-free harvesting!

GEHL

Gehl Company West Bend WI 53095

flow of material from the cylinder into the offset blower. An overrunning clutch on the drive line eliminates the stopping

Control box
Automatic controls from a single easy-to-reach control box let you start, stop or reverse the crop with ease.

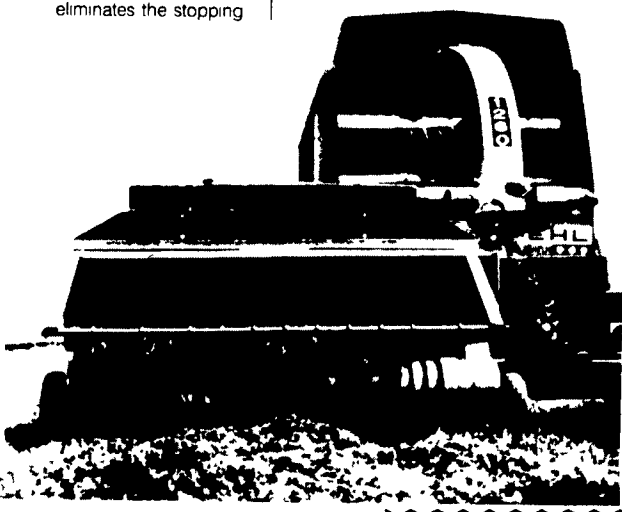

Electric clutch
on feedroll and attachment transmission can be reset simply by shifting back to neutral.

Speed monitor
on spinner drive automatically opens the electric clutch, shutting down feedrolls and attachment when tractor drops below 70% of its operating rpm.

Load sensor
on attachment drive. When there's an overload, one of the load sensors disengages electric clutch, stopping feedrolls and attachment.

Waiver of Interest On Most Gehl Equipment Until November 1, 1985

'Little Switzerland' welcomes goat cheese dairy

BY DEBBIE STILES-RENZI
Staff Correspondent

BIRCH RIVER, W. Va. — Verena and Greg Sava moved to Nicholas county, West Virginia, 10 years ago. Soon after, the couple purchased a goat because they wanted to have their own milk, and their largely undeveloped woodlot and neglected farmland homestead did not have enough pasture then to support a cow.

Now, a generation (of goats) or so after the acquisition of "Barbara", their foundation doe, the Savas have a total of 24 goats, with 11 milking at present. And they're in the process of completing West Virginia's first-ever goat cheese dairy.

"First we just made it (the cheese) for ourselves," relates Verena Sava. Then, Greg's mother tried it, liked it, and wanted to buy some. And others tasted the hard cheese, which the Savas named Swiss Mountain, and liked it, and a steadily growing network of customers was formed.

Now the Savas make 1000 pounds yearly, not nearly enough to satisfy a growing demand for the

mild cheese. Swiss Mountain gets its name from the culture used in making it; the Savas obtained it from the mountain country of Switzerland.

The Savas make cheese once every six days. They had been doing ten gallons at a time, which makes one eight-pound wheel of cheese. but with their new building, soon they will be able to handle 100 gallons of milk at a time. Cheese production will remain at about the same level this year, but the Savas expect production to increase considerably in years to come.

Now the Savas are considering getting into the soft cheese-making business. After doing some market research, Greg Sava has concluded that Chevre, soft, cream-like cheese, is in demand locally by gourmet-type restaurants and similar clientele. Approximately two pounds of Chevre can be made from one gallon of goat's milk (twice the amount possible of hard cheese); and with the wholesale price of Chevre at \$5 a pound, a profit margin is definitely there.

"Our ultimate goal is to get

everything from the farm," says Greg. They are looking at the goat cheese business not as a way to become rich, but as a means to make a steady, comfortable income from their 160-acre hillside farm.

How will they accomplish this, with good breeding animals garnering \$500 to \$1000 a head? "What we're doing is cutting down on our outputs," explains Greg Sava. To this end, the Savas try to feed the best diet possible in order to minimize health problems.

"We're not trying to get huge amounts of milk," Verena Sava emphasizes, "but instead, we're concentrating on keeping a healthy animal."

Although it's somewhat the trend now to feed rather large amounts of grain to maximize production, the Savas stick mainly to high quality hay and their own pasture, which they are gradually improving. Verena explains: "We stay away from that (feeding lots of grain); in Switzerland, where I am from, you just don't have the grain." Perhaps West Virginia's other nickname, 'Little Switzerland' is quite appropriate in these circumstances; the Swiss forage utilization philosophy appears to work as well on the steep mountainsides of West Virginia to reduce costs for the Savas.

In another cost-reducing measure, Verena has returned to teaching (both she and her husband were teachers in upstate New York before settling in West Virginia) in order to pay for the construction of their new dairy, negating the expense of taking out a loan and making interest payments to a bank. The Savas also have a small sheep flock, a ¼-acre PYO strawberry operation,

and Verena also sells bedding plants to augment their income.

The Sava's new dairy is a modest, chalet-style building made up of two sparkling-white rooms,

concrete floor, and heavily insulated walls and ceiling to maintain a steady room temperature of 68-70°F. With their new

(Turn to Page D15)

The Savas also raise Komondorok, Hungarian dogs bred to guard livestock.

Greg Sava demonstrates the docile nature of his herd buck, a purebred Nubian purchased in California.

ARTS-WAY

MID-MOUNTS

Out Ahead In Design And Value

Compare any other mid-mount with Arts-Way and see why these mowers have led the field since 1939

Arts-Way uses a separate power belt between tractor PTO and the mower's drive pulley, with a second belt to drive the three blades. This 2-belt system eliminates the need for belt twisting, prolongs belt life, makes tension adjustments and belt changing easy. (Compare with some makes that use a single belt turning and twisting around as many as 7 pulleys and PTO.)

Other features: 7-gauge steel decks ■ High-suction, drop-design blades for a smoother cut ■ Full 1" diameter machined spindles with Timken roller bearings top and bottom ■ Sealed bearings on PTO idler pulleys ■ Puncture-proof semi-pneumatic tires ■ Designed for side, rear or front-PTO drive tractors up to 49 HP ■ Cutting height adjustable from 1" to 5" ■ One-Year Limited Warranty.

And Arts-Way mid-mounts fit a wide range of tractors from the newest models (including imports) to old farm favorites. See your dealer for a complete list.

Bush Hog unveils Ro-Till

SELMA, AL — Bush Hog, has introduced its new Ro-Till, the first implement designed from the ground up for Precision Applied Tillage (PAT).

PAT is a revolutionary new single-pass tillage system that offers farmers yields exceeding those available with conventional tillage systems and soil and water conservation features comparable to no-till techniques.

A new four-page brochure describes how the Ro-Till makes PAT. It cuts through the crop residue with notched coulters, clearing the way for parabolic subsoil shanks that penetrate the soil compaction zone and open up

the rich subsoil to root penetration and water storage.

Waffle coulters or disc blades,

working in conjunction with rolling baskets, then form the high-yield seedbed.

New deep-tillage points cut plow sidedrafting

GRAETTINGER, IA. — Deep tillage has just become far easier with the new DeepRRipR® from Shaver Mfg. Co.

New generation DeepRRipR® Minimum Till Sub-Soiler Points are now fitted with a LandSide to minimize sidedrafting and to make

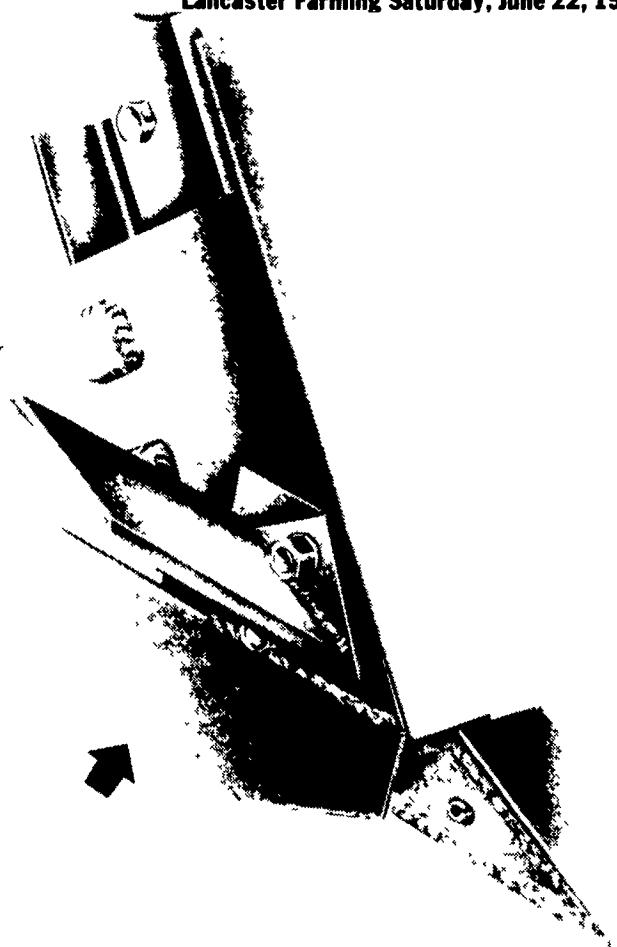

plow adjustment far easier.

There's no longer a need to fight the steering wheel to hold the plow on a straight path.

DeepRRipR® Points convert most standard moldboard plows into a deep tillage tool. DeepRRipR® loosens, shatters hardpan to a depth of 12 inches-18 inches, depending upon plow clearance.

Wings adjust from 10°-30° to control surface cover. Wings, points and LandSide sole edge are all hardened to extend service.

Even with LandSide added, DeepRRipR® prices remain unchanged, and LandSide will be available for retrofit to bring first generation DeepRRipR® Points current.

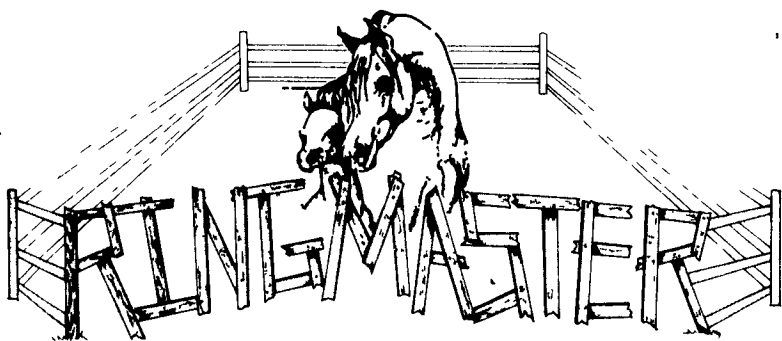

'Little Switzerland'

(Continued from Page D14)

100-gallon pasteurizer and bulk tank, the Savas expect to run batches at about half capacity on the average. At present, they are awaiting the delivery of doors and a stainless steel table for the dairy, the next stages of completion.

"Come back when it's finished,"

Verena Sava says proudly. Then the Swiss Mountain Chevre goats' milk cheese the Savas make will be in greater supply—and probably still greater demands—thanks to the bigger facilities available for their production.

Conservation District sets cost sharing signup

LANCASTER - The Lancaster County Conservation District announces the initial sign up period for farmers to receive Cost Sharing Financial Assistance to help clean up the Chesapeake Bay through improved management practices on their farms. The first sign up will take place June 17, 1985, through July 17, 1985.

The Chesapeake Bay Program is designed to improve water quality and reduce nutrient loading of streams and waterways that flow into the Susquehanna River. This first program covers farmers in the Conestoga River Watershed.

After a landowner becomes a

cooperator with the Conservation District and requests technical advice and cost sharing, a technician will visit the farm to verify the needs and prepare a report in order that each request can be classified according to a high to low priority rating established by guidelines set up by the Chesapeake Bay Commission.

Robert Gregory, Administrator for the Lancaster Conservation District says landowners in the Conestoga River Watershed must apply at the County ASCS or Conservation District Office located in the Farm & Home Center.

USDA offers tillage info

DOYLESTOWN - "Conservation Tillage: Things to Consider," is a new publication to help farmers decide how conservation practices can be used in their operation. From the U.S. Department of Agriculture, this publication provides information on basic conservation systems, their advantages and disad-

vantages; costs; and effects on erosion, crop yields, pest control and soil fertility.

For a copy of the publication, "Conservation Tillage: Things to Consider," Agriculture Information Bulletin No. 461, write the U.S. Government Printing Office, Washington, DC 20402. Price is \$1.50 each.

EAR CORN

QUALITY WORK AT OUR END MEANS QUALITY WORK AT YOURS.

The Melroe Company insists on maintaining the highest standards of quality in design and manufacturing in their versatile Bobcat loader line. Like farmers, we demand high quality materials and workmanship, and that goes into every machine we build. Even with those stringent requirements, we supply you with a top quality loader at a competitive price.

That quality is reflected in ever-increasing demands for Bobcat loaders and attachments by farmers in every segment of the farming industry. Bobcat durability, ease of operation and maintenance, comfort and safety, parts and service reliability, and a strong dealer support network, give you job performance that can't be equalled by any other loader.

The Melroe Company's dedication to building quality machines is your assurance of value and performance. Farmers have learned to rely on Bobcat quality to help build their own business on that same reputation.

Quality work - we're in it together!

CALL US FOR FREE ESTIMATES

on TOP QUALITY BARN SPRAY & BRUSH PAINTING

- Try Our New Concept In Penetration And Adhesion. In 1985

To earn a dollar give a dollars worth of service and work. Pay only \$750 for the best kind of barn painting on an average barn if you pay more you paid too much

Being self-employed, enables me to take the time to properly apply my barn paint & sealer at prices below suggested retail cost. Proper application requires adjusting the viscosity of the paint to attain the best penetration and adhesion — thereby assuring you an excellent paint job

I will share helpful guidelines on roof maintenance of steel roofs by brushing on at prime time

The farmers in Lancaster Co. are lucky because of the amount of competition in barn painting.

Check with us for the best deal!

SOYBEAN ROASTING ON YOUR FARM

DON'T WASTE IT - ROAST IT

Roast Your Barley, Wheat & Oats

Cut your barley earlier with higher moisture and have it roasted for drying and better digestability and sow your soybeans earlier.

Moldy or musty grain, have it restored to useable condition by roasting.

These heifers are all bred for summer and are bred to a Valiant Son. There will
be many more registered cows and heifers of the same quality as these men-
tioned.

This will be one of the best groups of cattle to be offered for sale this year.

Also selling a fancy Registered Red and White breeding age bull sired by
Wileda Citation R.

The Grades selling are of the same caliber as the registered, many with
records, including a fancy grade Lime Hollow Elevation Mars with records to
20,000 lbs. of milk. This cow if registered would easily score Excellent.

There will be 50 fresh cows with many milking from 75 to 100 lbs. 100 close
springers and the balance due summer and fall.

There will be approximately 75 registered cattle.

All cattle blood and TB tested.

Interstate health charts issued day of sale.

High Octane® Hog Chow®

brand rations

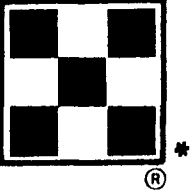

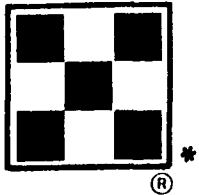

For feed conversion below the 3.0 barrier.

You thought 3.5 was good, 3.0 was great, and any rate below that was a breakthrough. High Octane® Hog Chow® 2.6 brand rations bring that breakthrough to your farm.

No other feed can match the new 2.6 feed conversion standard. Today, 2.6 is fast becoming the goal for top producers. New High Octane 2.6 beat previous high energy leaders by 9% in feed conversion and 4% in average daily gain.

With High Octane 2.6 growing and finishing rations you're always assured of the highest energy levels available. So hogs achieve optimum gains on about one-third less feed. And they get to market faster for a higher head turnover in the same space.

See your Purina Dealer for information on High Octane 2.6. He can help with any questions and provide your hogs with the balanced ration they need to break the 3.0 feed conversion barrier. High Octane Hog Chow 2.6, the highest energy available for your hogs' optimum gains. And yours, too.
